DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

To drill a test well for oil with cable tools to a depth of approximately 900 feet.
Approximately 15' of 10-3/4" surface casing will be used and 5-1/2" pipe will be set on top of the pay should oil be found in the Allison member of the Mesaverde formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
