Subject: Re: Old well geometry

Steve

Its good to know who the new geologist is in the Aztec office. What follows is what we have on these 2 wells.

George Goodrum No. 2 Will Hare
2310 FNL 1650 FEL Sec 23 T 29N R11W
Spud 5/15/1938
Completed 12/14/1938
TD 1774 ft
PBSD 715 ft
Our reports indicates top pay at 705 ft
Casing:
10 inch to 75 ft
8 1/4 inch to 700 ft
6 5/8 inch to 1062 ft
5 3/6 (3/16?) to 1498 ft
4 inch to 1694 ft

George Goodrum No. 3 Will Hare
1980 FNL 1650 FEL Sec 23 T29N R11W
Spud 11/16/1938
Completed 4/?/1939
TD 755 ft
Our records indicate this well P&A
Casing:
8 1/4 inch to 54 ft
6 5/8 inch to 671 ft

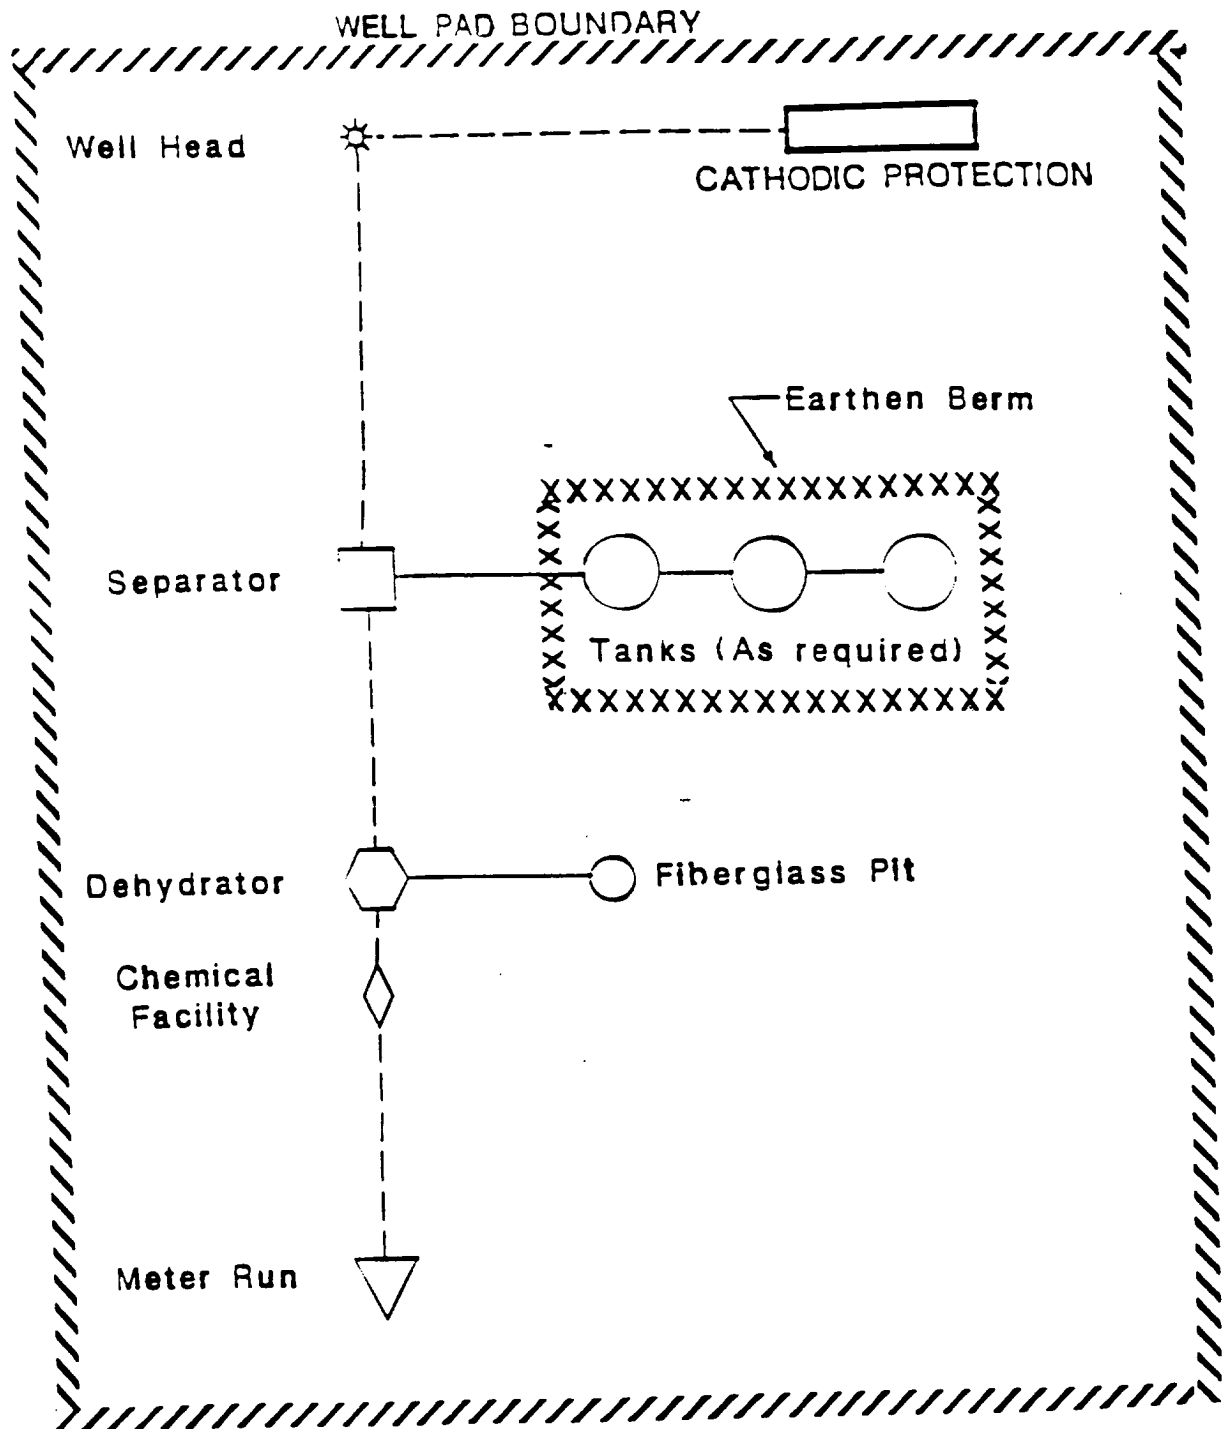

We have some fairly detailed lithologic logs on these wells that indicate sand zones, water-bearing zones, gas-bearing zones, and oil-bearing zones. If these would be of use, let us know and we can FAX them to you. Please e-mail your FAX number if you need this information.

regards,

Ron broadhead
