tate names of and expected depths to objective sands; s ing points, s	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, ceme and all other important proposed work)
tate names of and expected depths to objective sands; s ing points, s	
Propose 10: Set 30° of 5 5/8	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) ***********************************
Propose To: Set 300° of 8 5/8	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and casent to surface. to total depth of 7110 or through Dakota
Propose for met 300° of 8 5/8 Drill with rotary to approximation. Fun 45° meting to	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and casent to surface. The total depth of 7110° or through Dakota total depth and casent with 350 ax. Set
Propose for met 300° of 6 5/8 Drill with rotary to approximation. Fun by meeting to	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and casent to surface. to total depth of 7110 or through Dakota
Propose for Set 30° of 8 9/8 Drill with rotary to approximations. Fundable set 30° of 8 9/8	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and casent to surface. The total depth of 7110° or through Dakota total depth and casent with 350 ax. Set
Propose for met 300° of 8 5/8 Propose for met 300° of 8 5/8 Drill with rotary to approximation. Fun "j" casing to 2-biase coment collar approximation and vith 150 ax.	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and occent to surface. Its total depth of 7110' or through Dakota total depth and occent with 190 ax. Set mately 100' below Firebased Cliffs formation
ate names of and expected depths to objective sands; ing points, a Propose for met 300° of 8 5/8 Drill with rotary to approximation. Fun by casing to Medican coment collar approximation coment with 150 ex.	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and casent to surface. The total depth of 7110' or through Dakota total depth and depent with 150 ax. Set mately 100' below Fireburst Cliffs formation the four shots per foot. Sand-sater frac
Propose for Set 300° of 8 5/8 Propose for Set 300° of 8 5/8 Prill with rotary to approximation. Fun 4/3° casing to 2-biase rement collar approximant. Section of the section of the section with 150 sx.	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and occent to surface. Its total depth of 7110' or through Dakota total depth and occent with 190 ax. Set mately 100' below Firebased Cliffs formation
Propose for Set 300° of 8 5/8 Drill with rotary to approximation. Fun with collar approximation. Sum with approximation collar approximation with 150 sx.	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemerand all other important proposed work) " surface casing and casent to surface. The total depth of 7110' or through Dakota total depth and depent with 150 ax. Set mately 100' below Fireburst Cliffs formation the four shots per foot. Sand-sater frac
Propose for met 300° of 8 5/8 Propose for met 300° of 8 5/8 Prill with rotary to approximation. Fun 44° masing to 200 ment collar approximant means with 150 ex. Perforate Dakota formation with 100,000% sand and 100,000	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, came and all other important proposed work) " saurface casing and ozesent to surface. Ite total depth of 7110' or through Dakota total depth and cement with 350 ax. Set mately 100' below Firstured Cliffs formation ch four shots per foot. Saud-exter free gals. weter. Fun 2 /6' tabling
Propose for met 300° of 8 5/8 Propose for met 300° of 8 5/8 Prill with rotary to approximation. Funday osting to 2-stage osment collar approximation with 150 sx.	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, came and all other important proposed work) " saurface casing and ozesent to surface. Ite total depth of 7110' or through Dakota total depth and cement with 350 ax. Set mately 100' below Firstured Cliffs formation ch four shots per foot. Saud-exter free gals. weter. Fun 2 /6' tabling
ate names of and expected depths to objective sands; ing points, a propose for that 300° of 8 5/8 prill with rotary to approximation. Fund by casing to 2-btage cement collar approximation content with 150 ax. Ferforate Pakota formation with 100,000, sand and 100,000 with 100,000, sand and 100,000 went one-half of Section 12,	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cemeral all other important proposed work) " surface casing and casent to surface. The total depth of 7110' or through Dakota total depth and descent with 150 ax. Set mately 100' below Firstured Cliffs formation th Pour shots per foot. Sand-sater free gals. weter. Fun 2 /5' thoing
ate names of and expected depths to objective sands; ing points, a propose for met 300° of 8 5/8 Drill with rotary to approximation. Fam by casing to Mestage coment collar approximation coment with 150 ex. Ferforate Pakota formation with 100,000, sand and 100,000 with 100,000, sand and 100,000 weeks one-half of Section 12,	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, came and all other important proposed work) " saurface casing and ozesent to surface. Ite total depth of 7110' or through Dakota total depth and cement with 350 ax. Set mately 100' below Firstured Cliffs formation ch four shots per foot. Saud-exter free gals. weter. Fun 2 /6' tabling
Propose for met 300° of 8 9/8 Propose for met 300° of 8 9/8 Prill with rotary to approximation. Fun 49° macing to 200 tags coment collar approximation with 190 tx. Perforate Dakota formation with 190 tx. I understand that this plan of work must receive approximate of 1 and 1 an	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, came and all other important proposed work) " saarfson casing and casent to surface. The total depth of 7110' or through Dakots total depth and casent with 350 ax. Set mately 100' below Firstured Cliffs formation th four shots per foot. Saude-sater fract gals. water. Fun 2 /5' babing proval in writing by the Geological Survey before operations may be compagned.
Propose for met 300° of 8 5/8 Propose for met 300° of 8 5/8 Prill with rotary to approximation, funday oscing to 2-5tage oscent collar approximation with 100 ex. Perforate Pakota formation with 100,000, sould and 100,000 with 100,000 sould and 100,000 with 100,000 sould and 100,	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, came and all other important proposed work) " sairface casing and ozesent to authors. The total depth of 7110' or through Dakota total depth and casent with 350 ax. Set mately 100' below Firstured Cliffs formation th four shots per foot. Saint-water fraction gals. weter. Fun 2 /8' mining proval in writing by the Geological Survey before operations may be somptoneed.
Propose for met 300° of 8 9/8 Propose for met 300° of 8 9/8 Prill with rotary to approximation. Fun 49° maxing to 200 ment collar approximation with 190 m. Perforate Dakota formation with 190 mest one-half of Section 12, 3 I understand that this plan of work must receive approximate Oil and One Octa	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, ceme and all other important proposed work) " surface casing and casent to surface. The total depth of 7110' or through Dakota total depth and casent with 150 ax. Set sately 100' below Fiedured Cliffs formation th four shots per foot. Saude-sater fra: Sals. water. Fun 2 /3' babing proval in writing by the Geological Survey before operations may be compansed.
Propose for met 300° of 8 5/8 Propose for met 300° of 8 5/8 Prill with rotary to approximation. Fun by oscing to 2-stage coment collar approximation with 190 sx. Perforate Pakota formation with 100,000 seed one-half of Section 12, 3 I understand that this plan of work must receive approximation with 190 sx. Antee Oil and One Company	show sizes, weights, and lengths of proposed casings; indicate mudding jobs, ceme and all other important proposed work) " surface casing and occent to surface. The total depth of 7110' or through Dakota total depth and occent with 150 ax. Bet cately 100' below Firstured Cliffs formation th Pour shots per foot. Sand-sater free gals. weter. Fun 2 /5' bibling The total mutting by the Geological Survey before operations may be companied. The proval in writing by the Geological Survey before operations may be companied.
