Ms. Jones

Panther Energy Services, LLC (Panther) is doing a remediation for Fulfer Oil & Cattle Company (Fulfer). The location is "South Langlie Jal Unit Injection Station." Fulfer filed the original C-141 on August 31, 2015 by production foreman, Gary Wink. The site was assigned Remediation Permit RP-3831.

SITE DESCRIPTION

The site is located approximately 1 mile north of Jal, New Mexico. The legal location for this location is Letter I, Section 7, Township 25S, Rnage 37E, in Lea County New Mexico.

Latitude: 32.14467550 Longitude: -103.2013370

DRIVING DIRECTIONS

From intersection NM-18/NM-128 turn west – Drive 0.2 miles, turn north on 3rd Street drive for 1.4 miles. Turn west, drive 0.2 miles, turn north drive 400 feet.

BACKGROUND INFORMATION

On August 22, 2015 it was discovered that lightning struck a 500 barrel produced water tank and it was reported to Mark Whitaker by Fulfer Oil & Cattle. It was then that the remaining fluid got recovered.

On August 31, 2015 the initial C-141 was submitted.

On September 11, 2015 Panther was contacted to asses and remediate a 50' x 50' area where the fluid went outside of the location.

On September 15, 2015 Panther made the one call to make sure the area was clear.

WORK PLAN

Panther proposes to excavate the impacted area which measures approximately 50 feet in length and 50 feet in width. We plan on pushing up and disposing of the first 2 feet of contaminated soil and then take samples to see how far it seeped into the ground. Once we know the depth, and get the samples back from the lab, we will submit to OCD. If no further action has to be taken, we will backfill area.

No remedial action has been taken yet, due to the approval from OCD on our work plan.

GROUND WATER

Per New Mexico Office of State Engineers, the ground water is approximately 50-99 feet deep.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
