Describe Cause of Problem and Remedial Action Taken.\* Failure to recognize hazard of the removal of a blind from an active system with no use of lock-out-tag-out and failure to identify the need for coordination on simultaneous tasks on the same equipment resulted in a release of crude oil.

Describe Area Affected and Cleanup Action Taken. The released crude oil impacted an area of approximately 53,000 square feet inside the facility the release fluid then flowed south and impacted an area of approximately 2,800 square feet along the outside of the fence line. The released fluid continued south impacting an area of approximately 450 square feet off the caliche pad. The impacted area will be remediated as per applicable NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
