Attachments: approved_1RP-4802 revised proposed delineation.pdf

Mr. Yocham:

NMOCD will approve of the proposed delineation plan for 1RP-4802 with these conditions:

1. In addition to the 4 proposed sample locations on the lease road, at least 1 sample location must be established in the vicinity of the tanks, where the release originated. Please be advised that additional sample locations probably will be necessary to fully characterize the release.
2. Permissible levels for horizontal and vertical delineation is 600 mg/kg.
3. Each sample location must demonstrate permissible levels of BTEX, TPH extended, and chlorides for at least 2 depths: depth obtained and depth maintained at least 5 ft. further.
4. All laboratory analyses should have accompanying field data.

Like approval from NMSLO required. Mark Naranjo is the correspondent in the interim.

Thanks,

Olivia Yu

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Dear Ms. Yu,

Thank you for your approval of the proposed delineation plan for 1RP-4819.

Attached please find the revised proposed delineation plan for 1 RP-4802. I have added 2 more sample points to track further down the road.

Thanks,

Todd Yocham

Subject: RE: Penroc Oil Corporation - State E 10 Strawn Tank Battery and State E 14 Soil Contamination Characterization Work Plans

Dear Mr. Yocham:

NMOCD rejects the proposed delineation plan for 1RP-4802. Please review the Google Earth image from November 2017. The impacted area is larger than indicated in the workplan.

NMOCD will accept the proposed delineation plan for 1RP-4819.

Please be advised that for complete vertical delineation, soil samples analyzed by an accredited laboratory must demonstrate permissible levels of BTEX, TPH extended, and chlorides for at least 2 depths: depth obtained and depth maintained at least 5 feet further in depth. Permissible levels for horizontal and vertical delineation is 600 mg/kg.

Like approval from NMSLO is required. NMSLO may have additional stipulations.

Thanks,

Olivia Yu

Ms. Yu,

Attached please find the submitted work plans for the characterization of impacts associated with the release of produced water and crude oil for the following Remediation Cases:

Remediation Case No. 1RP-4802
State E 10 Strawn Tank Battery
And
Remediation Case No. 1RP-4819
State E 14

Please let me know if you have any questions.

Thank you,

Todd
