The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Dear Ms. Baker:

Please note that this release occurred in Lea, not Eddy, County.

NMOCD approves for the proposed delineation workplan for 1RP-4815 with these clarifications:

1. Each delineation sample location must demonstrate at least 2 depths of permissible BTEX, TPH extended, and chloride levels in laboratory analyses to be considered complete: depth obtained and depth maintained at least 2 ft. further.
2. Please be advised that auger refusal is not an acceptable rationale for not completing vertical delineation.
3. Include soil bore logs in the subsequent delineation/remediation report.

Like approval from BLM required. BLM may have additional stipulations.

Thanks,

Olivia Yu

Subject: Sharp Nose Federal #1/1RP-4815 and 1RP-4771

Good afternoon,

On behalf of XTO energy, I have attached two documents for Sharp Nose Federal #1, a sampling event and closure request report for 1RP -4771 and a revised work plan for 1RP-4815. Based on your request to combine the two releases into one work plan, XTO did a document search and identified the sampling results for the RP-4771 that had been collected last year. We then revised the original work plan for the RP-4815 to include a site map with proposed sample locations.

Please let Kyle or Ashley or myself know if you have any questions or concerns.

Thank you

Adrian Baker

Ms. Ager:

NMOCD requests that a proposed delineation workplan be resubmitted for 1RP-4815 with the inclusion of an appropriately scaled map. The map (i.e., Google Earth) must have the proposed delineation sample locations demarcated with GPS coordinates and the release area outlined. Also, as there is another release on location (1RP-4771), NMOCD recommends that both 1RPs be addressed under the same workplan.

Please be advised that as the surface owner is Federal, Shelly Tucker (cc'd) need to be included in all communications. Like approval from BLM is required for all delineation and remediation activities.

Thanks,

Olivia Yu

Olivia,

On behalf of XTO Energy, I have attached a sampling work plan for the Sharp Nose Federal/1RP-4815 for your review. I am working with Kyle Littrell, the new EH&S Coordinator for XTO's Delaware Division. Please let Kyle or myself know if you have any questions or concerns.

Thank You,

Ashley
