**Subject:** RE: Marathon Oil Company - Initial/Final C141 - Tonto 15 State 1

Dear Ms. Karrigan:

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-5135** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from NMSLO required.

Thanks,

Olivia Yu  
Environmental Specialist  
NMOCD, District I  
[Olivia.yu@state.nm.us](mailto:Olivia.yu@state.nm.us)  
575-393-6161 x113

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

---

Good morning,

Attached is the initial and final C141 for the small fire at the Tonto 15 State 1 as described below. There is a picture attached in the document; however, the fire was pretty faint.

Please let me know if you have any questions.

Callie

**Subject:** Marathon Oil Company - 24 hour notification - Tonto 15 State 1

Good evening,

At approximately 10:30 am, the Operator arrived on location and found the enardo valve on top of the water tank was on fire. The Operator immediately shut-in all four wells that flow into the facility. The incident is pending investigation and the enardo valve will be replaced. There was no spill or ground disturbance associated with this incident.

A C141 will be submitted shortly.

Callie
