The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. **In such an event a site does not achieve successful restoration, or future issues with contaminants are encountered, the operator will be asked to address these issues until they are fully mitigated and the location is successfully reclaimed.** In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Dear Ms. Karrigan:

Thank you for the photos. Much appreciated.

The available information indicates **OPERATOR** has met the requirements of 19.15.29 NMAC and no further corrective action is required. NMOCD considers **1RP-4755 & 1RP-4848** closed. This determination by the Oil Conservation Division does not relieve Operator of responsibility should future information indicate a threat to ground water, surface water, human health, or the environment. Furthermore, it does not relieve Operator of

responsibility for compliance with any federal, state, or local laws and/or regulations.

Like approval from BLM required.

Thanks,

Olivia,

Pardon my delay. The notes I have cite on the lease road but SMA and I were able to reach out to the Madera wells Operator to confirm the fire location. Both were in the same location and SMA sampled.

Attached are pictures from 5/23/18.

Callie

Beware of links/attachments.

Ms. Karrigan:

NMOCD did not receive any additional information regarding the location of the fire of the gas sale lines for 1RP-4848. To the best of your internal database, as I know these incidents occurred prior to your employment, do you have information verifying that the Madera lines fire on October 4, 2017, occurred in the same location as the one on June 27, 2017 (1RP-4755)?

Also, to complete documentation, please provide current dated photos of the impacted area for 1RP-4755 and 1RP-4848.

Thanks,

Olivia
