	<input type="checkbox"/> Change Plans	<input type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	taken.
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplate in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

On March 2, 2015 there was a leak in the flow line, causing a release and overspray of crude oil (2 Bbls) and produced water (3 Bbls). Backhoe was called to remove impacted soil. An approximate area of 150'X 105' was affected with 110'X 43' being off location. The flow line was repaired and impacted soils were excavated and hauled to a NMOC approved facility. An Initial/Final Report, C-141 is submitted to OCD requesting closure. Depth to Ground Water: >100' (approximately 235', Section 35, T19S-32E, per Chevron/Texaco Trend Map), Wellhead Protection Area: No. Distance to Surface Water Body: >1000', SITE RANKING IS 0. Based on analytical results (3/10/2015 enclosed), Yates Petroleum Corporation requests closure.
