13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

On 12/15/2018, Enstor conducted pre-workover diagnostics on Grama Ridge GRM Unit #8 Well which included pressure testing the tubing / casing annulus per MIT testing guidelines and also pressure testing the injection / withdrawal tubing to confirm integrity. Both tests were successful and were witnessed and approved by John Staton, Petroleum Engineer Technician with the BLM.

Immediately following the test, MIT results were communicated to BLM Petroleum Engineer, Mustafa Haque, via telephone along with Enstor's plan to move forward with coiled tubing cleanout / stimulation operations. BLM granted approval both over the phone and in a follow up email on 12/17/2018.

Once cleanout / stimulation operations are complete, GRM Unit #8 will be placed back into active injection / withdrawal service.
