DEPARTMENT OF THE INTERIOR  
BUREAU OF LAND MANAGEMENTOCD Hobbs  
HOBBS OCDFORM APPROVED  
OMB No. 1004-0137  
Expires: January 31, 2018SUNDRY NOTICES AND REPORTS ON WELLS  
Do not use this form for proposals to drill or to re-enter an  
abandoned well. Use Form 3160-3 (APD) for such proposals.

MAY 08 2019

RECEIVED

5. Lease Serial No. NMNM 072477

6. If Indian, Allottee or Tribe Name

SUBMIT IN TRIPLICATE - Other instructions on page 2

7. If Unit of CA/Agreement, Name and/or No.

## 1. Type of Well

☒ Oil Well ☐ Gas Well ☐ Other

8. Well Name and No. Dolly #1

## 2. Name of Operator

Jay Management Company, LLC

9. API Well No. 30-025-22370

3a. Address 1001 West Loop South # 750  
Houston, TX 770273b. Phone No. (include area code)  
(713) 621-678510. Field and Pool or Exploratory Area  
Wolfcamp4. Location of Well (Footage, Sec., T., R., M., or Survey Description)  
1980' FSL & 1980' FEL of SEC 17, T-11S, R-33E11. Country or Parish, State  
Lea, NM

## 12. CHECK THE APPROPRIATE BOX(ES) TO INDICATE NATURE OF NOTICE, REPORT OR OTHER DATA

TYPE OF SUBMISSION	TYPE OF ACTION			
<input type="checkbox"/> Notice of Intent	<input type="checkbox"/> Acidize	<input type="checkbox"/> Deepen	<input type="checkbox"/> Production (Start/Resume)	<input type="checkbox"/> Water Shut-Off
<input checked="" type="checkbox"/> Subsequent Report	<input type="checkbox"/> Alter Casing	<input type="checkbox"/> Hydraulic Fracturing	<input type="checkbox"/> Reclamation	<input type="checkbox"/> Well Integrity
<input type="checkbox"/> Final Abandonment Notice	<input type="checkbox"/> Casing Repair	<input type="checkbox"/> New Construction	<input type="checkbox"/> Recomplete	<input type="checkbox"/> Other
	<input type="checkbox"/> Change Plans	<input checked="" type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

09/20/2018 NU BOP. RIH 2-3/8" tubing and CIBP. Set CIBP @ 8426'. Circulate well. Pressure test casing. Held 500 PSI (Notified Jim/BLM).

09/21/2018 CAP CIBP w/25 sx class H cement. TOOH with tubing. TIH RIH with wireline. Perf @ 7300'. TOOH with wireline.

09/24/2018 RIH w/tubing. Pressure test casing. Held 750 PSI. RIH w/tubing. 1494' of 2-3/8" tubing w/ 4-1/2" packer left in the hole (Notified Jim/BLM).

Pull tubing to 6594'. WOC. RIH w/wireline and tag plug @ 6594'. TOOH w/wireline. Unable to TOOH w/tubing. (Notified Jim/BLM).

09/25/2018 to 10/09/2018 Fishing operation on tubing and packer (Per Jim/BLM). Unable to fish tubing and packer (Notified James and Jim/BLM).

10/10/2018 Cut tubing @ 5100' (Per James & Jim/BLM). TOOH w/wireline. 1494' of 2-3/8" tubing w/ 4-1/2" packer left in the hole (Notified Jim/BLM).

10/11/2018 RIH w/tubing. Pressure test casing. Held 500 PSI. RIH w/wireline. Perf @ 5044' (Per Jim/BLM). TOOH w/wireline.

Pressure test casing. Held 500 PSI. Pull tubing to 4795'. SQZ 30 sx class C cement (Per Jim/BLM). WOC.

10/12/2018 RIH w/wireline. Tag plug @ 4976'. TOOH w/wireline. Pull tubing to 3444'. RIH w/wireline. Perf @ 3744'. SQZ 35 sx class C cement. W/O

10/15/2018 Attempt to release packer fail. RIH w/wireline. Tag cement in the tubing @ 3066'. TOOH w/wireline (Notified Jim/BLM).

10/16/2018 RIH w/wireline. Cut tubing @ 3058' (Per Jim/BLM). TOOH w/wireline. TOOH w/tubing. 386' of 2-3/8" tubing & 4-1/2" packer left in hole.

RIH w/wireline. Perf @ 3050' (Per Jim/BLM). TOOH w/wireline.

10/17/2018 RIH w/tubing and Packer to 2685'. Attempt to SQZ.

10/18/2018 Circulate 35 sx class C cement & displace cement to 2900' (Per Jim/BLM). WOC. TOOH w/tubing & packer. RIH w/wireline.

Tag plug @ 2878'. Perf @ 2519'. TOOH w/wireline. RIH w/tubing to 2200' Circ w/35 sx class C cement & displace to 2400' (Per Jim). WOC.

10/19/2018 RIH w/tubing. Tag plug @ 2332'. Pull tubing. RIH w/wireline. Perf @ 1840'. TOOH w/wireline. Attempt to SQZ. Spot 35 sx (Per Jim). WOC.

10/20/2018 RIH w/tubing. Tag plug @ 1735'. TOOH w/tubing. RIH wireline. Perf @ 423'. TOOH w/wireline. Circ 120 sx cement to surface (Per Jim).

11/02/2018 Cut wellhead and verify cement to surface. Install dry hole marker.

14. I hereby certify that the foregoing is true and correct. Name (Printed/Typed)

Clay Griffin

### Reclamation Objectives and Procedures

**Reclamation Objective:** Oil and gas development is one of many uses of the public lands and resources. While development may have a short- or long-term effect on the land, successful reclamation can ensure the effect is not permanent. During the life of the development, all disturbed areas not needed for active support of production operations should undergo "interim" reclamation in order to minimize the environmental impacts of development on other resources and uses. At final abandonment, well locations, production facilities, and access roads must undergo "final" reclamation so that the character and productivity of the land and water are restored.

The long-term objective of final reclamation is to set the course for eventual ecosystem restoration, including the restoration of the natural vegetation community, hydrology, and wildlife habitats. In most cases this means returning the land to a condition approximating or equal to that which existed prior to the disturbance. The final goal of reclamation is to restore the character of the land and water to its pre-disturbance condition. The operator is generally not responsible for achieving full ecological restoration of the site. Instead, the operator must achieve the short-term stability, visual, hydrological, and productivity objectives of the surface management agency and take steps necessary to ensure that long-term objectives will be reached through natural processes.

To achieve these objectives, remove any and all contaminants, scrap/trash, equipment, pipelines and powerlines. Strip and remove caliche, contour the location to blend with the surrounding landscape, re-distribute the native soils, provide erosion control as needed, rip and seed as specified in the original APD COA. This will apply to well pads, facilities, and access roads. Barricade access road at the starting point. If reserve pits have not reclaimed due to salts or other contaminants, submit a plan for approval, as to how you propose to provide adequate restoration of the pit area.

1. The Application for Permit to Drill or Reenter (APD, Form 3160-3), Surface Use Plan of Operations must include adequate measures for stabilization and reclamation of disturbed lands. Oil and Gas operators must plan for reclamation, both interim and final, up front in the APD process as per Onshore Oil and Gas Order No. 1.
2. For wells and/or access roads not having an approved plan, or an inadequate plan for surface reclamation (either interim or final reclamation), the operator must submit a proposal describing the procedures for reclamation. For interim reclamation, the appropriate time for submittal would be when filing the Well Completion or Recompletion Report and Log (Form 3160-4). For final reclamation, the appropriate time for submittal would be when filing the Notice of Intent, or the Subsequent Report of Abandonment, Sundry Notices and Reports on Wells (Form 3160-5). Interim reclamation is to be completed within 6 months of well completion, and final reclamation is to be completed within 6 months of well abandonment.
3. The operator must file a Subsequent Report Plug and Abandonment (Form 3160-5) following the plugging of a well.
4. Previous instruction had you waiting for a BLM specialist to inspect the location and provide you with reclamation requirements. If you have an approved Surface Use Plan of Operation and/or an approved Sundry Notice, you are free to proceed with reclamation as per approved APD. If you have issues or concerns, contact a BLM specialist to assist you. It would be in your interest to have a BLM specialist look at the location and access road prior to the removal of reclamation

equipment to ensure that it meets BLM objectives. Upon conclusion submit a Form 3160-5, Subsequent Report of Reclamation. This will prompt a specialist to inspect the location to verify work was completed as per approved plans.

5. The approved Subsequent Report of Reclamation will be your notice that the native soils, contour and seedbed have been reestablished. If the BLM objectives have not been met the operator will be notified and corrective actions may be required.
6. It is the responsibility of the operator to monitor these locations and/or access roads until such time as the operator feels that the BLM objective has been met. If after two growing seasons the location and/or access roads are not showing the potential for successful revegetation, additional actions may be needed. When you feel the BLM objectives have been met submit a Final Abandonment Notice (FAN), Form 3160-5, stating that all reclamation requirements have been achieved and the location and/or access road is ready for a final abandonment inspection.
7. At this time the BLM specialist will inspect the location and/or access road. If the native soils and contour have been restored, and the revegetation is successful, the FAN will be approved, releasing the operator of any further liability of the location and/or access road. If the location and/or access road have not achieved the objective, you will be notified as to additional work needed or additional time being needed to achieve the objective.

If there are any questions, please feel free to contact any of the following specialists:

Jim Amos  
Supervisory Petroleum Engineering Tech
