Re: Langely 21 COM No. 1 P & A / Pad & Road Closure
API No.: 30-025-39377
U/L H Sec 21 23S 36E 1980' FNL 800' FEL

Dear Mr. Leking:

Nadel & Gussman Permian, LLC (NGP) herewith notifies the New Mexico Oil Conservation Division (NMOCD) that remediation of the Langely 21 COM No. 1 well location, which was plugged and the P&A Marker installed on 22 March 2010, has completed all site remediation pursuant to the New Mexico Administrative Code 19.15.29. NMOCD was notified of the closure and visited the site during the remediation of the pad and the access road. NGP, henceforth, considers the Langely 21 COM No. 1 well location closed as approved by the NMOCD without further action.

Due to the significant dunal environment of the area and the presence of large amounts of native seed in the sand itself, no additional seed was introduced as approved by NMOCD. Samples were taken to verify no hydrocarbon or soil chloride contaminants in excess of NMOCD standards were present prior to commencement of remediation activities.

Please refer to the attached C-103 for additional information. Should you have questions please call 432-682-4429.

Thank you for your assistance during this project.

Sincerely,

Joel Martin
