Mr. F. H. Soyster, District Engineer
U. S. Geological Survey
Roswell, New Mexico

Dear Mr. Soyster:

We have your letter of November 24 requesting exact location for National Cooperative Refining Company well No. 1 State - Skarda (formerly C & B Oil Company). Please accept our apology for a long delay.

On October 20 we wrote to the National Cooperative Refiners' lawyer in Clovis, Mr. Otto Smith, and requested that we be given the correct location on transfer form before Ray Pool's bond could be cancelled.

Notice of Intention to drill filed by Ray Pool et al and approved May 29, 1948, gave Skarda No. 1 location as 490 feet from the south and east lines of section 3, T.2 N, R.32 E. We believe this location to be correct, but expect confirmation from the present owners before this bond may be cancelled.

The interval 797 to 1163 feet shows drilling in red beds and sand.

Very truly yours,

bpw

Secretary and Director
