Re: Plug and Abandon
Dickinson Cattle Co. 33 #2-M 33-14-38
Dickinson Cattle Co. 33 #3-0 33-14-38

Gentlemen:

We are in the process of trying to inspect and release the plugging of wells which have been plugged for some time.

Our records do not indicate that you ever submitted a subsequent C-103 covering the actual plugging of your Dickinson Cattle Co. 33 #2-M in 33-14-38. Please submit this subsequent report as soon as possible. Also, there was no above ground marker at this location, so please state that the P&A marker was cut below ground level on this well at the request of the surface owner due to location in a cultivated field.

We have a subsequent P&A report on the #3 well; however, it does not indicate that the P&A marker was cut below ground level. Please submit a statement to that effect for our records.

*see notation
on C-103
approval*

When we have received the above, we will release the plugging of these two wells.

Very truly yours,

OIL CONSERVATION DIVISION
