The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well has been plugged back from 3925' to 3970' and 5 1/2" casing has been performed from 3970'-3970' w/ 102 spots. After this work was performed, the well tested no oil, gas or water.

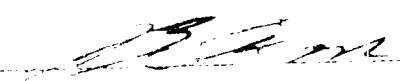

Permission is requested to acidize zone from 3915' to 3965' with 1000 gals. 20% acid in an effort to obtain oil or gas production from this well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
