(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

June 6, 1955

Well No. 1 is located 1980 ft. from N line and 1980 ft. from EW line of sec. 18

SE NW (1/4 Sec. and Sec. No.) 22-5 (Twp.) 36-E (Range) NMPM (Meridian)  
Jalmat (Field) Lee (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 3607 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Closson "B" No. 1 is producing approximately 2 barrel of oil and 75 barrel of water per day as an oil well in the Jalmat Pool. It has reached its economic limit and the best prospect for increasing earnings is to plug back and recomplect as a gas well in the Jalmat Pool with a drainage of 320 acres.

It is proposed to squeeze cement the present producing horizon and perforate the upper lates from 3480 to 3530' with 2 jet shots per foot and fracture the gas zone. It is believed that this well can be recomplected as a top allowable gas well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
