

NEW MEXICO STATE LAND OFFICE
 OFFICE OF THE STATE GEOLOGIST
 SANTA FE, NEW MEXICO

MISCELLANEOUS REPORTS ON WELLS

Submit this report in duplicate to the State Geologist or proper Oil and Gas Inspector within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of water shut-off, result of abandonment of well, and other important operations, even though the work was witnessed by the State Geologist or Oil and Gas Inspector. Reports on minor operations need not be signed and sworn to before a notary public, but such operations should be witnessed by an Oil and Gas Inspector if possible.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF SHOOTING WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF WATER SHUT-OFF		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF ABANDONMENT OF WELL		Intention to shoot well	X

 NAME TITLE

Section 1: Introduction
This document outlines the project goals and objectives. The primary focus is on developing a comprehensive system that meets the needs of the stakeholders. The project is divided into several phases, each with specific tasks and deliverables.

Section 2: Project Scope
The project scope defines the boundaries of the work. It includes the identification of key features and the exclusion of out-of-scope items. The scope is subject to change based on stakeholder feedback and evolving requirements.

Section 3: Methodology
The methodology describes the approach used to manage the project. This includes the selection of tools, the assignment of roles, and the implementation of communication protocols. Regular meetings and reporting are essential for maintaining project momentum.

Section 4: Risk Management
Risk management involves identifying potential challenges and developing mitigation strategies. Key risks include resource availability, budget constraints, and technical complexities. Proactive monitoring and communication are critical to minimizing these risks.

Section 5: Conclusion
The project is expected to deliver significant value to the organization. By adhering to the outlined methodology and risk management practices, the team is confident in achieving the project's goals. Continued collaboration and communication are vital for the project's success.
