Re: Langley Boren Com. No. 1
Packer Test

Mr. Sexton:

We are requesting an exemption from performing the packer test for the subject well. At present the Devonian is producing 150 MCFGPD and 250 BWP. We feel that the Devonian will not return to production if it is shut-in.

If any other information is needed, please call me at 392-3551. Thank you for your cooperation in this matter.

Sincerely,

Larry Megert
Engineering Technician
