Re: Application to Dually Complete  
Gulf Oil Corporation H. T. Orcutt  
"C" No. 2, Eunice Pool, Lea County,  
New Mexico

Gentlemen:

By this letter of application Gulf Oil Corporation wishes to state the following:

(a) That Gulf Oil Corporation H. T. Orcutt "C" No. 2, located in the NE/4 NE/4 of Section 6, T-21-S, R-36-E, was completed November 25, 1936 at a total depth of 3855'. The attached Exhibit "A" shows the location of this well on the Gulf Oil Corporation Orcutt "C" Lease together with the location of all offset wells.

(b) That subject well has 5-1/2" casing set at 3740' and cemented with 150 sacks cement. The well is an oil well producing from the open hole interval from 3740-3855' in the Eunice Pool.

(c) That the applicant proposes to dually complete the well in the following manner:

(1) Perforate the 5-1/2" casing within the approximate interval of 3365-3600' in the Eumont Gas Pool.

(2) Set production type packer below these perforations at approximately 3650' to separate the two pay zones.

(3) Produce the Eunice Pool oil through the tubing and the Eumont gas through the tubing-casing annulus.

(d) That the granting of this application for permission to produce the well as a dual completion with gas from the Eumont and oil from the Eunice is in the interest of conservation and the protection of correlative rights.

(e) That the applicant will comply with all rules and regulations of the New Mexico Oil Conservation Commission to maintain separation of production from the two pay zones.

(f) That the manner and method of the proposed dual completion is mechanically feasible and practical.

(g) That by copy of this letter of application, all offset operators are notified of the proposed dual completion.

Therefore, Gulf Oil Corporation requests that the Oil Conservation Commission grant permission to the applicant to dually complete the subject well as proposed in this application.

Respectfully submitted,

C. F. TAYLOR
