Re: State "C" Tract 11, Wells #3 & #4, 2-21-36

According to the provisions of Division Order R-7766, concerning the Eunice Monument South Unit Waterflood project, all wells in the area of review must have sufficient cement to shut off the Eumont zone.

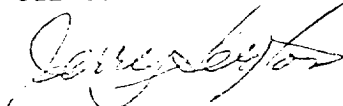

Our records indicate that the top of the cement on the two referenced is below the necessary level.

You have the option of running a cement bond log and submitting them to this office to confirm the location of the top of cement. Otherwise these wells will need to be perforated above the top of the cement and sufficient cement squeezed to bring these wells into compliance with this order.

We request that one of these options be completed by November 1, 1986.

Very truly yours

OIL CONSERVATION DIVISION

  
Jerry Sexton
