Re: New Mexico G State #1  
Oil Center Glorietta (Oil)  
1U, 2, 21S, 36E

Dear Ms. Downs:

We received notice that the above referenced well was over-produced and that production must be ceased until over-production was made up. We would like to request permission to produce this well at 50% rate of it's allowable until the over-production is made up instead of ceasing production completely.

Please advise if this is acceptable to you. You may contact me at 915/688-0411 if you have any questions or concerns.

Sincerely,

Oryx Energy Company
