OIL CONSERVATION COMMISSION, Santa Fe, New Mexico.

Gentlemen:

Following is a notice of intention to do certain work as described below at the Mid-Continent Petroleum Corp., - Eva Owen (Unit C) Well No. Two NE/4 NW/4 Company or Operator Three 22 S. Lease 37 East Penrose-Skelly of Sec. Lea T. R. N. M. P. M., Field, Lea County.

FULL DETAILS OF PROPOSED PLAN OF WORK

FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION. This well was completed Aug. 9, 1940, total depth of 3936; it was plugged back with cement to 3740 and shot with 400 quarts and has been producing since that time. This well has gradually decreased in production until it now makes about 2 barrels per day. The well was drilled with cable tools and the following casing was left in the well: 118' of 16" surface pipe cemented with 100 sacks and 3561' of 7" casing cemented with 300 sacks. We wish to move in rotary rig and deepen this well to the Holt Pay, or approximately 5500'. We expect to cement off the pay section we are now producing from, and if we find the Holt Pay productive we will run a string of 4 1/2" casing to the Holt Pay to protect all formations between the 7" and the Holt Pay.

Approved OCT 15 1945, 19 except as follows:
