Re: Meyer A 29 Lease, Sec. 29, T22S, R36E

Dear Mr. Huff:

An inspection of the above referenced area shows the following problems:

Meyer A 29 #12 located in Unit B, has a drilling pit still in place. Sufficient time has elapsed for the fluids to dissipate. We request that you cut and level the pit and clean the area as needed.

The Meyer A 29 Well No. 9 located in Unit E, has a workover pit in place. There are no fluids in it at this time; however, the fence is down. We request that you repair the fence and insure that no fluids collect in the pit.

To insure compliance, we will make another inspection of the area in the near future.

Very truly yours
