Re: Hughes Federal #3-N  
Section 17, T23S, R37E  
Jalmat Gas

Gentlemen:

This will confirm conversation between your Vertis Diamond and Evelyn Downs of the OCD that the recompletion of the above-referenced well from the Langlie Mattix Pool to the Jalmat Gas Pool cannot be approved until you have obtain approval of an unorthodox location and a non-standard proration unit. Since this is a recompletion there should not be a problem.

Please make your application to Santa Fe for the above exceptions and furnish this office with a copy of your application.

Also, please submit a Form C-102, acreage dedication plat outlining the acreage to be dedicated to the Jalmat completion.

When the unorthodox location and the non-standard proration unit have been approved and the acreage dedication plat has been received, we will approve your C-104 for an allowable assignment.

Very truly yours,

OIL CONSERVATION DIVISION

P.S. In view of your second conversation with Evelyn Downs the following situation may exist. If you plan to dedicate the SE/4 SW/4 and the S/2SE/4 & NE/4 SE/4 for your 160 acre proration unit the location will be ok. However, the non-standard proration unit will not all lie within one quarter section and cannot be approved administratively.
