

8. WELLSITE LAYOUT:

- A. Exhibit "C" shows the relative location and dimensions of the wellpad, mud pits, reserve pit, trash pit, and location of major rig components.
- B. Only minor levelling of the wellsite will be required. No significant cuts and fills will be necessary.
- C. The reserve pit will be plastic lined.
- D. The pad and pit area has been staked and flagged.

9. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and locations cleaned of all trash and junk to leave the well-site in an aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluid will be fenced until they are filled.
- C. After abandonment of the well, surface restoration will be in accordance with the agreement with the surface owner. Pits will be filled and location will be cleaned. The pit area and well pad will be ripped to promote revegetation. Access roads will remain as per agreement with the surface owner.

10. OTHER INFORMATION:

- A. Topography - Land surface is undulatory and dung, sloping gently toward the south at about 30 feet per mile.
- B. Soil- Soil conditions are variable. Generally soil is a deep fine sand underlain by claiche.
- C. Flora and Fauna - The vegetation cover is moderate and is primarily shinnery with some perennial native grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles and some birds.
- D. Ponds and streams - There are no rivers, streams, lakes or ponds in the area.
- E. Residences and other structures - None. There are no water wells in the area
- F. Archaeological, Historical and Cultural Sites - None found in the area as per NMAS Archaeological report of September 15, 1981.
- G. Land Use - Grazing and hunting in season.

11. ANCILLARY FACILITIES:

- A. None required.
