Move in Well Machine, "pull tubing and packer, drill deeper from 3372' to 3400 T.D., and shoot pay section with from 150 to 200 quarts S.N.G, gravel tamp and oil load, 7" OD casing is set at 2,849'. Well is making no water, production has declined to approximately 6-7 barrels per day, with high gas oil ratio. It is expected that this deepening and shot will materially increase ultimate recovery of oil in place and reduce gas production, although there is market for all gas produced.
