RE: Reclassification of Well  
 JALMAT TANSILL YATES SR  
 Etz. #2-E, Sec. 7-T25S, R37E

Gentlemen:

Due to the recently submitted scheduled gas/oil ratio test the above-referenced well will be reclassified from a oil well to a gas well in the Jalmat Pool effective July 1, 1993, and the oil allowable cancelled effective that date.

If for some reason you feel this test does not reflect the proper classification of this well, please submit another test for our consideration by May 28, 1993.

If the well is to be reclassified to a gas, you need to take in to consideration the Etz #3 located in the same unit letter, and classified as a Jalmat oil well. This well will need to be kept shut-in or if returned to production it must be a gas well.

If the well is to be reclassified to a gas, please furnish this office with the following:

- 1.) Application for a Non-Standard Proration Unit
- 2.) C-102 outling acreage to be dedicated to this gas well.
- 3.) C-104 showing reclass from oil to gas and designating condensate & dry gas transporters, and indicate if gas well is separate metered.

If you have further questions, please fell free to talk to Evelyn or Donna at District I office, Hobbs NM (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION
