Memo

To: Bill Olson
From: Donna Williams
Date: 10/12/99
Re: EOTT

Bill,

I am sending you a copy of a Final C-141. EOTT submitted to us for closure. I am somewhat confused or should I say hesitant to give closure. My thinking is they did impact groundwater ...so did they submit anything to you up in Santa Fe? If not why not? And yeah these numbers look good....but, what proof do I have that the water is definitely clean?? What proof do you have/ or we??? I feel there is a miss and maybe I cannot pin point where. I believe she has visited with you on this manner and if you feel that the site is closed, then I will go along with that. However, until then, I feel that something is a miss..?

Thank you,

Donna Williams

Attached are the analyticals for bottomhole, side walls, & water. Request Closure

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

**RE: Leaksite
Sec. 8, T-20-S, R-37-E
Lea County, NM**

Dear Mr. Olson:

Please be advised that on June 11, 1999, while excavating at the above captioned leaksite, EOTT encountered groundwater at approximately 17 feet. There was slight free phase hydrocarbon on the water.

EOTT plans to continue to excavate the soil to remove the source of water contamination. Upon obtaining a clean bottom hole and sidewall samples, the excavation will be backed off with red bed clay to prevent any future contamination of the water table. We will also install one monitor well directly adjacent to and slightly down gradient from the source of the leak to determine with downgradient groundwater has been contaminated.

I will notify the Hobbs District office as to the date that the monitor well will be installed. I hope all meets with your approval but if you have any questions, please don't hesitate to call me at 915/684-3467.

Sincerely,

Lennah Frost
Sr. Environmental Engineer
