Re: Application of EOG Resources, Inc. for administrative approval of an unorthodox well location for its Rattlesnake 28 Fed Com No. 744H well in the E/2W/2 of Section 28 and the E/2NW/4 of Section 33, Township 26 South, Range 33 East, NMPM, Lea County, New Mexico.

Dear Director Sandoval,

EOG Resources, Inc. (OGRID No. 7377) seeks administrative approval of an unorthodox well location for its Rattlesnake 28 Fed Com No. 744H well (API No. 30-025-48353). The spacing unit dedicated to the well is comprised of the E/2W/2 of Section 28 and the E/2NW/4 of Section 33, Township 26 South, Range 33 East, Lea County, New Mexico and is within the Sanders Tank; Upper Wolfcamp pool.

The well has been drilled and is proposed to be completed as follows:

- The surface location is located 1188 feet from the North line, 2551 feet from the East line (Unit B) of Section 28,
- The bottom hole location is located 2438 feet from the North line, 2587 feet from the West line (Lot 3) of irregular Section 33,
- The first take point is located 100 feet from the North line, 2592 feet from the West line (Unit C) of Section 28,
- The last take point is located 2438 feet from the North line, 2587 feet from the West line (Lot 3) of irregular Section 33.

The acreage is governed by the Division's statewide rules. Accordingly, the proposed completed interval is unorthodox because it is closer than the 330 feet to the eastern boundary. It encroaches on the spacing unit in the W/2E/2 of Section 28 and the W/2NE/4 of Section 33. Approval of the

unorthodox location will allow EOG to use its preferred well spacing plan for horizontal wells, which will prevent waste. EOG intends to develop Sections 28 and 33 with 14 horizontal wells.

Exhibit A is the Form C-102 showing the location of the well, including the proposed unorthodox completed interval. The proposed completed interval encroaches on the spacing unit/tracts to the east.

Exhibit B is a plat for Sections 28 and 33 that shows the proposed Rattlesnake 28 Fed Com No. 744H well in relation to the adjoining spacing units/tracts to the east.

Ownership is diverse between the subject spacing unit and the affected spacing unit/tracts to the east. While the other working interest owner is the same, they own in a different percent in the adjacent tract. **Exhibit C** is a certification from the landman indicating that he has reviewed the tracts affected by this request. Exhibit C includes a list of the affected parties and proof that a copy of this application with all attachments has been sent by certified mail to each affected party. This notice advises affected parties that any objection must be filed in writing with the Division within 20 days from the date the Division receives the application.

Exhibit D is a statement from a petroleum engineer providing justification for the requested non-standard location.

Thank you for your attention to this matter.

Very truly yours,

Rattlesnake 28 Fed Com #744H

To whom it may concern:

A non-standard location is necessary to develop the Wolfcamp formation in this section efficiently and in an economic manner. A non-standard location optimizes pressures related to the completion and production drawdown of the wells and is expected to yield a higher ultimate recovery than a standard location, thereby preventing waste and protecting correlative rights.
