**Re: Renewal of Temporary Permission to Discharge Hydrostatic Test Water
Transwestern Pipeline Company, LLC - OGRID 329750
Permit: HBP - 42**

Dear Mr. Egan:

The New Mexico Oil Conservation Division (OCD) has completed its review of Transwestern Pipeline Company, LLC's (Transwestern) renewal request, dated June 21, 2022, for approval of a 120-day temporary permission to discharge small quantities of hydrostatic test wastewater generated from the testing of new transmission pipelines of oil and gas or products thereof throughout the State of New Mexico, which expired on January 14, 2022. OCD acknowledges receipt of the filing fee (\$100.00) and temporary permission fee (\$50.00) provided in the separate submittal mailed to the OCD Santa Fe office and received on July 6, 2022.

Based on the information provided in the request, *temporary permission is hereby granted to Transwestern for the discharge of the hydrostatic test wastewater generated from all new pipeline hydrostatic tests* an operator may perform during the approved 120-day period with the following understandings and conditions:

1. the volume of the discharge does not exceed 25,000 gallons per hydrostatic test;
2. water from a public/municipal water supply or other OCD approved sources (upon a written request to OCD) is used for each test;
3. email or written notification must be provided to the OCD 72 hours prior to each hydrostatic discharge event. The notice shall contain the following information:
 - a. the proposed location of hydrostatic test discharge (Section/Township/Range or GPS coordinates);
 - b. the date of the proposed discharge;

Transwestern Pipeline Company, LLC
Permit: HBP - 42
July 6, 2022
Page 2 of 3

- c. the volume of the proposed discharge; and
 - d. the source of hydrostatic test water;
4. no discharge shall enter any lake, perennial stream, river, or their respective tributaries that may be seasonal;
5. no discharge shall occur:
 - a. where ground water is less than 10 feet below ground surface.
 - b. within 200 feet of a watercourse (19.15.2.7.W(4) NMAC), lakebed, sinkhole, or playa lake (19.15.2.7.P(4) NMAC);
 - c. within an existing wellhead protection area (19.15.2.7.W(8) NMAC);
 - d. within 500 feet of a wetland (19.15.2.7.W(9) NMAC); or
 - e. within 500 feet from the nearest permanent residence, school, hospital, institution, or church;
6. no discharge shall occur to a surface water body without obtaining a National Pollution Discharge Elimination Systems (NPDES) permit from the US EPA, NMED, and OCD prior to the discharge;
7. best management practices must be implemented to contain the discharge onsite, to ensure that the discharge does not impact adjacent property, and to control erosion;
8. the discharge does not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC (the Water Quality Regulations);
9. Transwestern shall report all unauthorized discharges, spills, leaks, and releases of hydrostatic test wastewater and conduct corrective action pursuant to the Water Quality Regulations of 20.6.2.1203 NMAC and release notification pursuant to OCD Rule 29 (19.15.29 NMAC);
10. the landowner(s) of each proposed discharge and/or collection/retention or alternative discharge location must be properly notified of the activities prior to each proposed hydrostatic test event; and
11. a report, summarizing each test of new pipeline with less than 25,000 gallons per hydrostatic test per discharge event performed within the approved 120-day period, shall be submitted to OCD within 45 days after the temporary permission expiration date and shall contain the following information:
 - a. the location of hydrostatic test discharge (Section/Township/Range or GPS coordinates);
 - b. the date of each discharge;
 - c. the volume of each discharge; and
 - d. the source and quality of test water (laboratory analysis, if necessary).

Transwestern Pipeline Company, LLC
Permit: HBP - 42
July 6, 2022
Page 3 of 3

This temporary permission shall expire 120-days after issuance. **This temporary permission will expire on November 3, 2022.** Renewal requests for a 120-day temporary permission to discharge shall be submitted forty-five (45) days prior to the expiration date. A 120-day temporary permission may be revoked or suspended for violation of any applicable provisions and/or conditions of this approval.

Please be advised that approval of this request does not relieve Transwestern of liability should operations result in pollution of surface water, ground water or the environment. Nor does approval relieve Transwestern of its responsibility to comply with any other applicable governmental authority's rules and regulations.

If there are any questions, please do not hesitate to contact me at (505) 469-7486 or brad.a.jones@state.nm.us.

Respectfully,

RE: Transwestern Pipeline Company, LLC (OGRID ID #329750)

HBP-42, 120 Day Temporary Permission to Discharge Hydrostatic Test Water

Updated Discharge Reporting

Dear Mr. Jones,

Per our phone conversation on 06/21/2022 Transwestern Pipeline Company LLC, (Transwestern) is submitting this updated report of discharge activities under authorization HBP-42. HBP-42 previously authorized testing and discharge activities from 09/16/2021 – 01/14/2022.

As discussed previously, Transwestern pipeline did not conduct any hydrostatic testing or subsequent discharges of test water to the ground's surface within the State of New Mexico, during the above referenced period. Additionally, Transwestern has not conducted any hydrostatic testing or test water discharges from 01/14/2022 to the present.

2021 - 2022 Activity Report Transwestern Pipeline Company, Permit No. HBP-42			
Location of Discharge (Lat/Long)	Date of Discharge	Volume of Discharge (Gallons)	Source of Water Used
N/A	N/A	0	N/A

This report is being submitted in conjunction with a request to renew HBP-42 for 120 days.

Please review at your earliest convenience and let me know if you have any questions, comments, or concerns regarding this submission.

Should you have any questions, please feel free to contact me at (575-808-9402); or by email at kerry.egan@energytransfer.com.

Respectfully,

Kerry Egan

RE: Transwestern Pipeline Company, LLC (OGRID ID #329750)

**Renewal Request of HBP-42, 120 Day Temporary Permission to Discharge
Hydrostatic Test Water**

Dear Mr. Jones,

As per our phone conversation on 06/21/2022 Transwestern Pipeline Company LLC, (Transwestern) is submitting this revised request for renewal of Permit No. HBP-42 for Temporary Permission to discharge hydrostatic test water from new natural gas pipelines owned and operated by Transwestern Pipeline Company in the State of New Mexico. Discharge will occur within Transwestern's easements and rights-of-way and on private parcels that contain our facilities. Our easements and rights-of-way occur on federal, state, and private land. Discharge will be performed in a manner that controls runoff, soil erosion and discharging sediment from the sites. Methods of controlling runoff include detention basins and trenches that provide soil percolation and evaporation, water truck spraying for dust suppression, and application to excavated soils and backfill to aid in compaction.

Permit No HBP-42 was last issued by your office on September 16, 2021 for a period of 120 days. As outlined in the permit conditions renewal for continued coverage is required 45 days prior to expiration. However, no covered discharge activities occurred during the 120-day period for Transwestern to report to your office, nor did we anticipate any subject discharges occurring in the near future. As such, we had determined to not renew permit HBP-42.

Recently a decision was made by engineering and construction personnel to reapply and request coverage of a temporary permission to discharge. This is being done to facilitate projects which may potentially begin in the next several months.

Therefore, this application, filing fee (\$100.00) and temporary permission fee (\$50.00) are being submitted for your review. The fee payment will be made with a hard copy check in the amount of \$150.00, made payable to the *Water Quality Management Fund*.

Transwestern understands that the temporary permission authorizes the discharge of hydrostatic test water throughout the State of New Mexico under the following conditions:

- 1) the volume of the discharge is less than 25,000 gallons per hydrostatic test;
- 2) water from a public/municipal water supply or other OCD approved sources, by written request and analytical results, is used for each hydrostatic test;
- 3) email or written notification must be provided to the OCD 72 hours prior to each hydrostatic discharge event. Each notice shall contain the following information:
 - a) the proposed location of hydrostatic test discharge (Section/Township/Range or GPS coordinates);
 - b) the date of the proposed discharge;
 - c) the volume of the proposed discharge; and
 - d) the source of hydrostatic test water;
- 4) the discharge will not enter any lake, perennial stream, river, or their respective tributaries that may be seasonal;
- 5) no discharge shall occur:
 - a) where ground water is less than 10 feet below ground surface.
 - b) within 200 feet of a watercourse (defined in 19.15.2.7.W(4) NMAC), lakebed, sinkhole, or playa lake (defined in 19.15.2.7.P(4) NMAC);
 - c) within an existing wellhead protection area (defined in 19.15.2.7.W(8) NMAC);
 - d) within 500 feet of a wetland (defined in 19.15.2.7.W(9) NMAC); or
 - e) within 500 feet from the nearest permanent residence, school, hospital, institution, or church;
- 6) best management practices must be implemented to contain the discharge onsite, to ensure the discharge does not impact adjacent property, and to control erosion;
- 7) the discharge does not cause any fresh water supplies to be degraded or to exceed standards as set forth in Subsections A, B, and C of the 20.6.2.3103 NMAC;
- 8) the landowner(s) of each proposed discharge and/or collection/retention or alternative discharge location must be properly notified of the activities prior to each proposed hydrostatic test discharge event; and
- 9) A report, summarizing all hydrostatic test wastewater discharges of less than 25,000 gallons per hydrostatic test event, will be submitted to the OCD within 45 days after the temporary permission expiration date and shall contain the following information:
 - a) the location of each hydrostatic test water discharge (Section/Township/Range or GPS coordinates);
 - i) the date of each discharge;
 - ii) the volume of each discharge; and
 - iii) the source and quality of test water (laboratory analysis, if necessary).

Please review at your earliest convenience and let me know if you have any questions, comments, or concerns regarding this submission.

Should you have any questions, please feel free to contact me at (575-808-9402); or by email at kerry.egan@energytransfer.com.
