Subject: [EXTERNAL] RE: [EXT] surface commingling application CTB-1065

CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Good Morning Dean,

The later application with 5 wells included is the only application we need approved. The other application with 2 wells can be withdrawn. We are in the process of curing the notification of this application with a public notice. Also, I cant find anything on NMSLO being notified so I will get that taken care of today.

Thanks

Subject: [EXT] surface commingling application CTB-1065

I am reviewing surface commingling application CTB-1065 which involves a commingling project that includes the Inland 26 23 B2OJ State Com 1H Battery and is operated by Mewbourne Oil Company (14744).

Please confirm that the NMSLO has been notified of this application.

Additionally, several of the notifications of this application appear to have been returned. Mewbourne will need to cure the notification of this application.

It appears that 2 applications were submitted that each relate to this commingling project; that being action IDs 26774 and 64445. The later application has 5 wells included rather than the 2 wells

which were included on the first application. My presumption is that Mewbourne intends for the second application to go forward and for the first one to be withdrawn. Please confirm that is the case.

Please note that failure to take steps to address each of the topics addressed in this email within 10 business days of receipt of this email may result in the Division rejecting the application requiring the submittal of a new application by the applicant once the topics have been fully addressed.
