Subject: [EXT] Formal objection to injection well

Mr, Goetze:

My name is Brad Linneman. My wife and I own the Lot 21A and our address is 20 N. Lake St.

We are the lot next to Jennifer and Kyle Mervine who have spoke with you.

Please consider this to be my formal objection to Solaris Water Misstream LLC's "Texas Ranger SWD No. 1" well.

My concern is primarily due to the following questions:

- 1- Has a geological survey for potable water aquifer impact been completed?
- 1a-What safety procedures/contingency plans are in place?
- 2-Does this well carry a bond in case of an emergency situation?
- 2a-Is that bond local?
- 3- What are the projected noise levels?
- 3a-What are the projected maximum decibel levels?
- 4-What is the projected traffic increase?
- 4a-Who is responsible for road repairs?
- 5-What are the projected hours of operation?
- 6-What kinds of safety features will be in place?
- 7-How will surface spillage be addressed?
- 7a-In case of (inevitable) toxic spillage, what measures will be employed for:
 - 7a1- clean up
 - 7a2-prevention of runoff
- 8-Will this site be equipped with air quality monitoring devices (it it understood H2S isn't really an issue with dump sites, but it is in the area)
- 9-Will this site be fenced?
- 10- Has there been an environmental impact survey completed?
- 11- Has there been an archeological survey for Native American importance completed?
- 12- Although this site is on private property, it will require maintenance and inspections. Who is responsible for these duties, and what are their frequencies?

I may have additional questions which I will be directing to other agencies, however I believe the above list begins to address my concerns.

Thank you for your time.

Brad Linneman
