## APPLICATION FOR POOL LEASE COMMINGLING AND OFF-LEASE MEASUREMENT, STORAGE & SALES

### Commingling Proposal for Oil Production at the Cedar Canyon 22 Satellite Train 6 (L 22 T24S R29E)

OXY USA INC requests to amend PLC 489 for oil production at the Cedar Canyon 22 Satellite Train 6 to add Vortec 27 #002 (30-015-35492). This well is in the same Communitization Agreement as currently approved well Cedar Canyon 27 Federal Com 5H (30-015-43775) : S/2 N/2 Section 27 T24S R29E. Commingling will allow production from Vortec 27 #002 to be optimized. The Vortec 27-2 Battery currently has capacity restrictions. Commingling production at Cedar Canyon 22 Satellite Train 6 will eliminate these capacity restrictions for Vortec 27 #002.

This commingle request includes the existing and future wells dedicated to the lease/spacing units comprised of the sections in the Communitization Agreements listed below.

#### Process Description:

Production is sent through a 6' X 20' three-phase production separator. The production separator is equipped with an oil turbine meter, gas orifice meter and water turbine meter. After separation, the oil stream flows to a tank then to a LACT unit. The aforementioned LACT unit serves as the point of royalty payment.

Oil production is allocated back to each well based on well test. For testing purposes, the facility is equipped with a 6' x 10' three-phase test separator. It is equipped with an oil turbine meter, gas orifice meter and water turbine meter.

All wells have been online for over 7 years and are in Range 3 of decline. They are tested at least once per month.

Gas production from all wells is measured at the orifice meters off the aforementioned production and test separators then sent to sales. These meters serve as the BLM gas FMPs for the purpose of BLM royalty payment. Gas production is allocated back to the wells using the aforementioned well testing guidelines. Gas commingling is handled through PLC 750G. Within approved Order PLC 750G, Vortec 27 #002 will be moved from individual train L1 to train G6 with the aforementioned existing wells at Cedar Canyon 22 Satellite Train 6. Because Vortec 27 #002 will no longer be at an individual measurement train, it will be removed from exemption from well test allocation requirements, as previously stated in the Order. Vortec 27 #002 facility location (train L1) will be removed from PLC 750G.

All water from the Cedar Canyon Satellite is sent to the Cedar Canyon Water Disposal System.

**Additional Application Components:**

The flow of production is shown in detail on the enclosed facility diagram. Also enclosed is a map detailing the lease boundaries, well and battery locations.

The oil and gas meters are calibrated on a regular basis per API, NMOCD and BLM specifications.

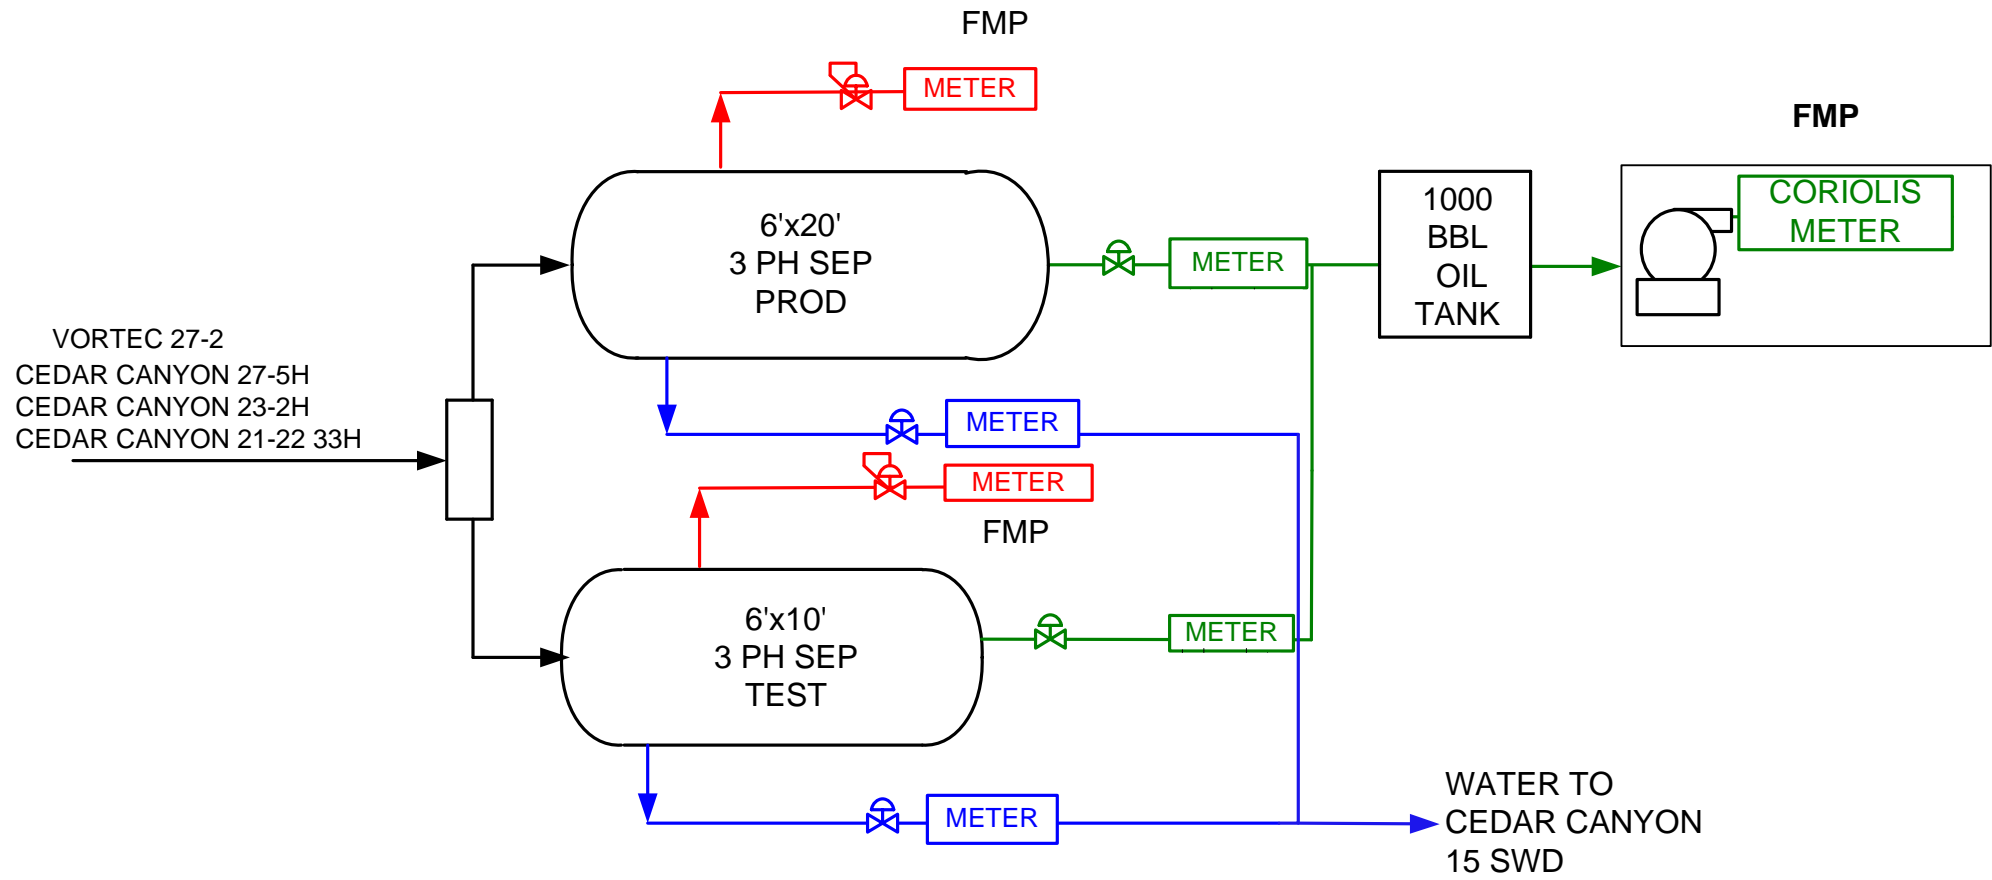

Pursuant to Statewide rule 19.15.12.10(C)(4)(g) OXY USA INC requests the option to include additional pools or leases within the defined parameters set forth in the Order for future additions.

Commingling will not reduce the individual wells' production value or otherwise adversely affect the interest owners. It is the most effective means of producing the reserves.

The surface commingle application will be submitted separately for approval per NMOCD and BLM regulations.

OXY USA INC understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument.

Re: Request for Pool and Lease Commingling, Off-lease Measurement, Sales, & Storage for  
Oil Production at Cedar Canyon 22 Satellite Train 6

Dear Interest Owner:

This is to advise you that OXY USA INC is filing an amendment to previously approved order PLC 489 for oil production at Cedar Canyon 22 Satellite Train 6. A copy of the application submitted to the New Mexico Oil Conservation Division is attached. The commingle request includes the current and future wells dedicated to the pools and leases/communitization agreements listed in the application.

Any objections or requests for a hearing regarding this application must be submitted to the New Mexico Oil Conservation Division Santa Fe Office within 20 Days from the date of this letter.

Pursuant to Statewide rule 19.15.12.10(C)(4)(g) OXY USA INC requests the option to include additional pools or leases within the defined parameters set forth in the order for future additions.

For questions regarding this application, please contact Sandra Musallam at (713) 366-5106.

Respectfully,

**IN RE: OXY USA INC. REQUEST FOR AMENDMENT  
TO ORDER PLC-489 RELATING TO OIL PRODUCTION  
FROM CEDAR CANYON 22 SATELLITE TRAIN 6**

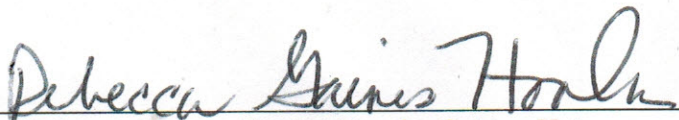

**Order No.: PLC-489**

**OBJECTION TO REQUEST FOR AMENDMENT**

Rebecca Gaines Hooks, Micaella Gaines Klapuch, Robert E. Gaines, Jr., and Mary Martha Gaines England (collectively the "Gaines Heirs"). Applicant seeks to measure oil volumes and presumably quality at an off-lease measurement site for the above referenced well and for future wells and leases or CA's and pools of wells included in PLC-489. The Gaines Heirs, as interest owners, object for the following reasons:

1. Entry of an Order pertaining to unnamed future wells, leases, or CA's and pools would deprive interest owners in those unspecified wells of notice and due process.
2. Measurement of oil and gas production at other than a test meter at the wellhead, plus inclusion, as oil production, of condensate and drip NGLs removed from production stream between well head and third party transfer meter, would not be in compliance with OCD reporting requirements for production of wells as reported on the C-115s and would have the effect of depriving these interest owners of an appropriated production accounting for royalty purposes thereby adversely affecting the interest owners.
