well shall be no closer than 100 feet in the horizontal plane, to any outer boundary of the horizontal spacing unit.

The request to deviate from an orthodox location has met all requirements of 19.15.16.15 (C)(5)(a) NMAC. It is understood that you are seeking this exception in order to create a non-standard location, comprised of Take Points referenced above, within the described Horizontal Spacing Unit.

This well's completed interval is as close as 110 feet to the eastern edge of the horizontal spacing unit. Encroachment will impact the following tracts.

- Section 03, encroachment to the E/2 E/2
- Section 10, encroachment to the E/2 E/2

The Division understands you have given notice of this application to all operators or owners who are "affected persons," as defined in 19.15.2.7(A)(8) NMAC, in all adjoining units towards which the proposed location encroaches.

The Division understands you are seeking this unorthodox location in order to allow for optimal well spacing, to avoid wasting resources, and reducing the production of the well within the unit. All while protecting the correlative rights within the Bone Spring formation underlying the W/2 E/2 of Section 03 and the W/2 E/2 of Section 10.

Your application has been filed under 19.15.16.15(C)(6) NMAC, 19.15.15.13 NMAC and 19.15.4.12 (A)(2) NMAC.

Per 19.15.15.13 (B) NMAC, **Division approves this unorthodox location.**

Reference this NSL order number on the As Drilled C-102 submitted with the Authorization to Transport, to place this well into production.

The above approvals are subject to your following all other applicable Division rules.

Jurisdiction of this case is retained for the entry of further orders as the Division deems necessary.

The completed interval of the well will be unorthodox because it is located less than 330' from the western boundary line of the offset tract. As explained in the engineering statement, included as **Exhibit A**, approval of the unorthodox, completed interval is necessary to allow Permian Resources to ensure optimal spacing of the wells, and improve overall productivity of the wells, which will prevent waste and protect correlative rights.

Exhibit B is a Form C-102 showing the location of the Riddler Federal Com #403H well in relation to the offset tracts.

Exhibit C is a plat for Sections 3 and 10 of Township 20 South, Range 34 East, that shows the Riddler Federal Com #403H well in relation to the adjoining tracts/proposed spacing units. Permian Resources is the offset operator.

Exhibit D is a spreadsheet that identifies all affected persons who were sent a copy of this application and attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application.

Thank you for your attention to this matter. Please let me know if you require additional information.

Very truly yours,

To Whom it May Concern,

Permian Resources Operating, LLC ("Permian") respectfully requests administrative approval on a non-standard location for the Riddler Fed Com 403H to allow the completed interval to be less than 330 feet from the eastern boundary of the existing 320-acre horizontal spacing unit. This well is located in the [50461] Quail Ridge; Bone Spring, South. Due to the optimal spacing of the planned wells in this section, Permian has planned the Riddler Fed Com 113H, Riddler Fed Com 114H, Riddler Fed Com 124H, Riddler Fed Com 126H, and Riddler Fed Com 125H wells with at least 880 feet of spacing between each well. This spacing pattern causes the Riddler Fed Com 403H to be drilled less than 330 feet from the eastern boundary of the spacing unit. Permian requests approval of this non-standard location to avoid causing wasted resources and reducing the production of the wells listed above.

Sincerely,
