RE: Administrative Order SWD-2609 Extension of Injection Authority

Well: Outskirts Federal SWD No.1
Surface location: 224 feet FNL, 845 feet FWL,
Unit D, Section 22, Township 19 South, Range 33 East, NMPM, Eddy County, New
Mexico
(Latitude: 32.6523783°N; Longitude: -103.6567663°W NAD83)
Order Date: September 25, 2024
Injection formations: Devonian formation, 14,649 feet – 15,659 feet.

Greetings Mr. Fisher:

Reference is made to your July 11, 2025, request on behalf of Permian Oilfield Partners, LLC (the current “operator”) to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The current deadline date to commence injection under said order is one year after issuance of the order: September 25, 2025.

The Oil Conservation Division (“OCD”) has reviewed your correspondence which states that since the date of issuance of this permit, no additional wells that penetrate the approved injection interval were drilled in the one-mile Area of Review (“AOR”). Additionally, no new Affected Parties have been identified within the one-mile AOR. Therefore, the extension request could be reviewed administratively for approval.

The OCD finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment. Therefore, the deadline to commence injection for the existing order is **hereby**

SWD-2609: Extension of Injection Authority
Permian Oilfield Partners, LLC.
Page 2 of 2

extended until September 25, 2026. This extension is solely for the extension to injection authority and does not extend the APD for the referenced well.

All requirements of the above-mentioned administrative order and agreements in the application remain in full force and effect. Any additional extension of the deadline to commence injection for this administrative order will not be considered unless the operator has already commenced drilling of the referenced well. Otherwise, the injection authority shall expire under the terms of the extended administrative order, and the operator shall be required to submit a new application to obtain injection authority for the referenced well.

ALBERT CHANG
Division Director
