Request for Administrative Approval of Unorthodox Well Location

Corral 20-29 Fed Com 403H well E/2 of Sections 20 and 29, T25S-R29E, Eddy County, New Mexico Purple Sage; Wolfcamp [98220] API No. 30-015-56371

Dear Mr. Chang:

XTO Energy Inc. (OGRID No. 005380), pursuant to Division Rules 19.15.16.15(C)(6) and 19.15.15.13 NMAC and applicable special rules governing acreage and well location requirements for the Purple Sage; Wolfcamp [98220], seeks administrative approval of an unorthodox well location for its **Corral 20-29 Fed Com 403H** well (API No. 30-015-56371), in a 640-acre, more or less, spacing unit underlying the E/2 of Sections 20 and 29, Township 25 South, Range 29 East, Eddy County, New Mexico.

The location of the Corral 20-29 Fed Com 403H well is as follows:

- Surface location: 1,091' FNL and 70' FEL (Unit A) of Section 20
- First take point: 100' FNL and 550' FEL (Unit A) of Section 20
- Last take point: 330' FSL and 550' FEL (Unit P) of Section 29
- Bottom hole location: 50' FSL and 550' FEL (Unit P) of Section 29

Since this acreage is governed by the Division's Special Pool Rules for the Purple Sage, the interval for this well is unorthodox because the first take point is closer than the standard offsets to the northern boundary of the spacing unit—thus, encroaching on the spacing units to the north comprising the E/2 of Sections 8 and 17 (XTO's Corral 17-8 spacing unit), as well as the spacing unit comprising the S/2 of Section 8 and All of Section 17 (XTO's Corral 17 spacing unit).

XTO respectfully requests administrative approval of a non-standard location for the Corral 20-29 Fed Com 403H. Approval of the unorthodox interval is necessary to allow XTO to use its preferred well spacing plan for horizontal wells in this area, which will maximize recovery and prevent waste.

Exhibit A is a Form C-102 showing that the first take point of the Corral 20-29 Fed Com 403H well encroaches on the spacing units to the north in the E/2 of Sections 8 and 17, T25S-R29E (XTO's Corral 17-8 spacing unit), as well as the spacing unit comprising the S/2 of Section 8 and All of Section 17 (XTO's Corral 17 spacing unit).

Exhibit B is a plat for the subject area that shows the proposed Corral 20-29 Fed Com 403H well in relation to the offsetting adjoining spacing units to the north, which are operated by XTO. The exhibit also identifies the other working interest owners in the offsetting adjoining spacing unit, which include: B.F. Albritton LLC, Ernie Grodi, G.E. Rogers, L.E. Oppermann, Moon Royalty LLC, Penroc Oil Corporation, Sonic Oil & Gas Inc, T.C. Energy LLC, and the Allar Company. In addition, the exhibit identifies that these are Bureau of Land Management ("BLM") leases. Accordingly, the "affected persons" are the other working interest owners and the BLM.

Exhibit C is a spreadsheet listing all affected persons and includes tracking information demonstrating that each of the affected persons was sent a copy of this application with all attachments by certified mail advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application. The following are the affected persons:

¹ See NMAC §§ 19.15.2.7.A(8) [defining "affected persons" as, "in the absence of an operator, or with respect to an application wherein the operator of the spacing unit or identified tract is the applicant, each working interest owner"] and 19.15.4.12.A(2)(a).

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
