**APPLICATION OF MEWBOURNE
OIL COMPANY FOR COMPULSORY
POOLING, EDDY COUNTY, NEW MEXICO.**

CASE NO. 23171

APPLICATION

Mewbourne Oil Company (“Mewbourne” or “Applicant”) (OGRID No. 14744), through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Wolfcamp formation underlying a standard 309.91-acre, more or less, horizontal spacing unit comprised of Lot 6 (NW4SW4 equivalent), NE4SW4, N2SE4 of irregular Section 6 and N2S2 of Section 5, Township 20 South, Range 29 East, NMPM, Eddy County, New Mexico. In support of its application, Mewbourne states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.
2. Applicant seeks to initially dedicate the above-referenced spacing unit to the proposed **Sig 6-5 WOLI Fed 1H** well to be horizontally drilled from a surface location in Lot 7 (SW4SW4 equivalent) of irregular Section 6 to a bottom hole location in NE4SE4 (Unit I) of Section 5, Township 20 South, Range 29 East.
3. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all the working interest owners in the subject spacing unit.
4. The pooling of interests will avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

5. To allow the recovery of Applicant's just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this horizontal spacing unit should be pooled, and Applicant should be designated the operator of the proposed horizontal wells and spacing unit.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on November 3, 2022, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the horizontal spacing unit and approving the initial well thereon;
- B. Designating Applicant as operator of the horizontal spacing unit and the horizontal wells to be drilled thereon;
- C. Authorizing Applicant to recover its costs of drilling, equipping, and completing the well;
- D. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- E. Imposing a 200% charge for the risk assumed by Applicant in drilling and completing the wells against any working interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

CASE NOS. 23171 & 23172

SELF AFFIRMED STATEMENT OF TYLER JOLLY, LANDMAN

1. My name is Tyler Jolly, and I am employed by Mewbourne Oil Company (“Mewbourne”) as a Landman. My responsibilities include the Permian Basin of New Mexico. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters and my credentials have been accepted by the Division and made a matter of record.

2. I am familiar with the applications filed by Mewbourne in these consolidated matters and the status of the lands in the subject area. None of the mineral owners to be pooled have expressed opposition to this proceeding, so I do not expect any opposition at the hearing.

3. Mewbourne seeks an order pooling all uncommitted interests in the Wolfcamp formation [Gatuna Canyon; Wolfcamp Pool (27191)] underlying the S/2 equivalent of irregular Sections 5 and 6, Township 20 South, Range 29 East, NMPM, Eddy County, New Mexico as follows:

- Under **Case 23171**, Mewbourne seeks to pool a standard 309.91-acre horizontal well spacing unit in the Wolfcamp formation comprised of Lot 6 (NW4SW4 equivalent), NE4SW4, N2SE4 of irregular Section 6 and N2S2 of Section 5. Said horizontal spacing unit is to be initially dedicated to the proposed **Sig 6/5 WOLI Fed 1H** well to be horizontally drilled from a surface location in

Lot 7 (SW4SW4 equivalent) of irregular Section 6 to a bottom hole location in NE4SE4 (Unit I) of Section 5.

- Under **Case 23172**, Mewbourne seeks to pool a standard a standard 309.93-acre horizontal well spacing unit in the Wolfcamp formation comprised of Lot 6 (NW4SW4 equivalent), SE4SW4, S2SE4 of irregular Section 6 and S2S2 of Section 5. Said horizontal spacing unit is to be initially dedicated to the proposed **Sig 6/5 WOMP Fed 1H** well to be horizontally drilled from a surface location in Lot 7 (SW4SW4 equivalent) of irregular Section 6 to a bottom hole location in SE4SE4 (Unit P) of Section 5.

4. **Exhibit A-1** contains the Form C-102s for the proposed initial wells. They reflect that the wells will be at standard locations under the Division's statewide rules for oil wells.

5. **Exhibit A-2** is a general location map noting the location of the acreage being pooled and the lateral trajectory of the proposed wells. The acreage is comprised of federal lands.

6. **Exhibit A-3** identifies the tracts of land comprising the proposed spacing unit, the working interest ownership in each tract and their respective interest in the horizontal spacing unit. Mewbourne has identified the "uncommitted" working interest owners that remain to be pooled in red italics font.

7. Mewbourne has been able to locate all the mineral owners that it seeks to pool.

8. **Exhibit A-4** contains a sample of the well proposal letter and AFE for the proposed wells submitted to the working interest owners Mewbourne has been able to locate. The costs reflected in these AFEs are consistent with what Mewbourne and other operators have incurred for drilling similar horizontal wells in the area in this formation.

9. **Exhibit A-5** contains a chronology of the contacts with the uncommitted mineral owners. Mewbourne has made a good faith effort to obtain voluntary joinder of these owners in the proposed spacing unit and initial wells.

10. Mewbourne requests overhead and administrative rates of \$8,000 per month for drilling and \$800 per month for a producing well. These rates are consistent with the rates charged by Mewbourne and other operators for similar wells in this area.

11. I have provided the law firm of Holland and Hart, LLP, with the names and addresses of the mineral owners that remain to be pooled and instructed that they be notified of this hearing.

12. Exhibits A-1 through A-5 were prepared by me or compiled under my direction from company business records.

13. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

CASE NOS. 23171 & 23172

SELF AFFIRMMENT STATEMENT OF CHARLES CROSBY, GEOLOGIST

1. My name is Charles Crosby, and I am employed by Mewbourne Oil Company (“Mewbourne”) as a petroleum geologist. My responsibilities include the Permian Basin of New Mexico. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology.

2. I am familiar with the application filed by Mewbourne in these matters, and I have conducted a geologic study of the lands in the subject area.

3. The target interval for the proposed initial Sig 6/5 wells is the Wolfcamp sand.

4. **Exhibit B-1** is a subsea structure map that I prepared for the top of the Wolfcamp formation. The contour intervals are 100 feet. The area comprising the proposed spacing units is outlined with a dashed black box, and the approximate location and orientation of the initial wells noted with dashed purple arrows. The structure map shows the Wolfcamp formation dipping to the east/southeast. The structure appears consistent across the proposed spacing units, and I do not observe any faulting, pinch outs, or other geologic impediments to drilling horizontal wells.

5. Exhibit B-1 also shows a line of cross section through the proposed horizontal spacing units from A to A’. I chose the logs from these wells to create a cross section because they penetrate the targeted interval, are of good quality and have been subjected to petrophysical analysis of the targeted interval. In my opinion, these well logs are representative of the geology in the subject area.

**BEFORE THE OIL CONSERVATION DIVISION

Exhibit No. B
Submitted by: Mewbourne Oil Company
Hearing Date: November 3, 2022
Case Nos. 23171-232172**

6. **Exhibit B-2** is a stratigraphic cross-section that I prepared using the logs from the representative wells shown on Exhibit B-1. Each well on the cross-section contains gamma ray, resistivity, and porosity logs. The target interval for the proposed wells is marked on the cross section by a red arrow. The cross-section demonstrates that the targeted interval is continuous across the proposed spacing units.

7. My geologic study indicates the Wolfcamp formation underlying the subject area is suitable for development by horizontal wells and the acreage comprising the proposed horizontal spacing units will be productive and contribute proportionately to the production from the wells.

8. Exhibit B-1 also shows the existing Wolfcamp development in this area. In my opinion, the laydown orientation of the proposed wells is appropriate because of the stress regime in this area. Recently, operators in the area have overwhelmingly drilled wells in the laydown orientation based on the above referenced regional stress regime and improved results.

9. In my opinion, approval of this application is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

10. Exhibits B-1 through B-2 were either prepared by me or compiled under my direction and supervision.

11. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.
