APPLICATIONS OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

CASE NOS. 24198, 24206

APPLICATIONS OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING AND, TO THE EXTENT NECESSARY, APPROVAL OF AN OVERLAPPING SPACING UNIT, LEA COUNTY, NEW MEXICO

CASE NOS. 24199, 24205

#### NOTICE OF AMENDED EXHIBITS

As requested by the Hearing Examiner during the August 27, 2024 hearing for these cases, Franklin Mountain Energy 3, LLC is submitting the attached amended exhibit packet, which includes the following amended Lease Tract Map and Summary of Interests and Pooled Parties exhibits: **B-15-b**; **B-15-d**; **B-16-b**; **B-16-d**; **B-17-b**; **B-17-d**; **B-18-b**; and **B-18-d**.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS & SISK, P.A.

#### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATIONS OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

CASE NOS. 24198, 24206

APPLICATIONS OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING AND, TO THE EXTENT NECESSARY, APPROVAL OF AN OVERLAPPING SPACING UNIT, LEA COUNTY, NEW MEXICO

CASE NOS. 24199, 24205

APPLICATIONS OF MRC PERMIAN COMPANY FOR APPROVAL OF AN OVERLAPPING HORIZONTAL WELL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

CASE NOS. 24367-24368

APPLICATIONS OF MRC PERMIAN COMPANY FOR APPROVAL COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

CASE NOS. 24369-24370

#### SELF-AFFIRMED STATEMENT OF DON JOHNSON

Don Johnson hereby states and declares as follows:

#### **BACKGROUND**

- 1. I am a Landman with Franklin Mountain Energy 3, LLC ("FME3"), over the age of 18, and have personal knowledge of the matters stated herein.
- 2. I have testified before the New Mexico Oil Conservation Division (the "Division") and my credentials were accepted as a matter of record.

- 3. My work for FME3 includes the area of Lea County in New Mexico. I am involved in title, ownership, and leasing.
- 4. I am familiar with the applications FME3 filed in Case Nos.24198, 24199, 24205, and 24206. I am also familiar with the applications filed by MRC Permian Company ("MRC") in Case Numbers 24367-24370. I am familiar with the land matters involved in these cases.
- 5. My testimony and exhibits addresses the information common to all cases and then addresses case specific information on a case-by-case basis.

#### **TESTIMONY AND EXHIBITS APPLICABLE TO ALL CASES**

- 6. These cases involve competing applications for a 640-acre development comprised of Bone Spring and Wolfcamp horizontal spacing units underlying the W/2 of Sections 20 and 29, Township 18 South, Range 35 East. With respect to the W/2 acreage, FME3 has proposed a total of eight wells, known as its Ball State Com wells. MRC has proposed a total of four wells, known as its Condor wells. FME3 also has proposed eight Ball wells in the E/2 of Sections 20 and 29, in Case Nos. 24195-24197, and 24207, and those cases are uncontested.
- 7. In its four cases, FME3 is seeking orders from the Division for compulsory pooling of interest owners who have refused to voluntarily pool their interests for the proposed Bone Spring and Wolfcamp horizontal spacing units described below, and in the wells to be drilled in the horizontal spacing units. FME3 also is requesting that it be designated operator of the wells. FME3 requests, to the extent necessary, approval of overlapping spacing units. Finally, FME3 requests that the Division deny MRC's competing pooling applications.
- 8. The purpose of my testimony is to demonstrate, from a land perspective, why FME3 should be designated operator of the acreage at issue in the cases, which I refer to as the Ball West

Development Area, and why FME3's development plan for the Ball West Development Area is superior to MRC's plan.

- 9. There are several reasons, from a land perspective, that FME3 should be designated operator of this acreage. First, as I will discuss in more detail, FME3 has the highest working interest in the proposed units. Second, FME3's development plan will reduce surface facilities and surface impacts. Third, FME3 is a prudent operator, with the ability to develop the surface and is planning on developing this acreage in the near term. FME3 has extensive experience in developing this area and in investing in the infrastructure required for water management and gas takeaway necessary to support the development.
  - 10. **Exhibit B-1** is a map showing the general location and the spacing units at issue.
- and why MRC's applications should be denied. Each of the factors will be discussed by FME3's witnesses as relevant to each witness' area of expertise. I will be focusing on ownership, FME3's ability to prudently and timely drill, complete and operate the wells in development area and prevent waste.
- 12. **Exhibit B-3** provides an overview of working interest ownership within the Ball West Development Area and an overview of the Ball West Development Plan.
- 13. As shown on **Exhibit B-3**, FME3 has 50% working interest ownership in the W/2W/2 and in the E/2W/2 for both the Bone Spring and the Wolfcamp.
- 14. Conversely, MRC only has 25% working interest ownership in the W/2W/2 and in the E/2W/2 and, to my knowledge, does not have the support of any working interest owners.
- 15. FME3 seeks to develop acreage where it owns most of the working interest or has majority interest control as it has done and plans to do in this area.

- 16. FME3 has the highest working interest and should be awarded operatorship.
- 17. **Exhibit B-4** provides a comparison of FME3's development plans as compared to MRC's. As you can see from Exhibit B-4, in the W/2, FME3 is planning four Bone Spring wells and four Wolfcamp wells (total of 8 wells) in the W/2 Ball West Development Area whereas MRC proposes only two Bone Spring wells and only two Wolfcamp wells (total of 4 wells).
  - 18. FME3's Wolfcamp B and MRC's Wolfcamp D are targeting the same formation.
- 19. FME3's development plan includes targeting the Third Bone Spring. Significantly, MRC's applications do not include the Third Bone Spring, which will result in waste and will negatively impact correlative rights.
- 20. FME3's development plan includes targeting the Wolfcamp A. Significantly, MRC's applications do not include the Wolfcamp A, which will result in waste and will negatively impact correlative rights.
- 21. In addition, FME3 is proposing a similar development plan in the E/2 of Sections 20 and 29, with an additional 8 wells proposed following the same development plan.
- 22. Because FME3 is targeting two benches that MRC is excluding, FME3 should be awarded operatorship.
- 23. Because FME3's Ball West Development Plan encompasses both the W/2 and the E/2 of Sections 20 and 29, FME3's development plan allows for more efficiencies, which, in turn reduces surface impacts and costs.
- 24. I will now discuss FME3's ability to prudently operate the property and, thereby, prevent waste and FME3's ability to timely locate well sites and to operate on the surface.
  - 25. **Exhibit B-5** is a map showing the Ball West Development Plan.

- 26. **Exhibit B-6** outlines how FME3's development plan minimizes surface disturbance and reduces waste. FME3's plan reduces waste because the Ball W/2 development shares a central tank battery (CTB) with the Ball E/2 development. FME3's plan reduces waste as the Ball W/2 development shares a drill pad with the Ball E/2 development.
- 27. Conversely, under MRC's plans, additional surface disturbance will be required for drilling pads and CTB.
- 28. **Exhibit B-7** discusses other benefits of FME3's plan. FME3's development plan provides the ability to decommission an old tank battery and to P&A an older horizontal well, including fully reclaiming the well pad.
- 29. Consolidation of Ball W/2 production into the Ball CTB with Ball E/2 production creates a single point for Third Party connections
- 30. When compared to MRC's plan, on a per well basis, FME3's plan is superior because there is less equipment needed by third parties; less pipeline infrastructure and disturbance by third parties; and helps prevent third-party waste
- 31. FME3 understands the take-away constraints in this area and is taking steps to proactively address them.
- 32. **Exhibit B-8** provides an overview of the operational and logistical constraints in this area, as well as an overview of FME3's plans to address those constraints. **Exhibits B-9 to 11** provide greater detail on the constraints and FME3's proactive approach to resolve them.
- 33. **Exhibit B-9** discusses water takeaway constraints and steps FME3 is taking to address those constraints, including investing \$24 million of capital. FME3 is investing to expand the pipeline system to increase capacity, including approximately 25 miles of pipeline infrastructure. Approximately 17 miles of new pipeline infrastructure has been placed into service

over the last 12 months and the remaining approximately 8 miles have a target in service date of late Q3 2024.

- 34. **Exhibit B-10** discusses gas takeaway constraints and FME3's approach to address them. FME3 is investing approximately \$20 million to address the gas takeaway constraints. FME3 is investing in gathering to gather gas to a single point, which has several benefits. It increases the appeal for third-party midstream operators and allows multiple third parties to connect, increasing flow assurance to prevent waste. FME3 is proposing to construct approximately 16 miles of pipeline infrastructure. FME3 already has or is securing the rights-of-way in place for those pipelines. Approximately 8 miles of new pipeline infrastructure and two H2S central treatment points have been placed in service over last 12 months with the remaining approximately 8 miles having a targeted in service date late Q3 2024.
- 35. FME3 also signed an acreage dedication with Northwind to facilitate Northwind's buildout to reach FME3's operated acreage.
- 36. **Exhibit B-11** demonstrates FME3's reliable oil pipeline solution. FME3 signed an acreage dedication with Plains to ensure oil pipeline takeaway would be in place day one for FME3's new development projects, including Ball.
- 37. **Exhibit B-12** outlines FME3's recent activity in this area. FME3 has been active in the area and is committed to developing its acreage in this area. FME3 has turned on production 18 wells between October 2023 and June 2024.
- 38. FME3 has 2 drilling rigs on the Alpha (6) well project as of August 2024. FME3 will start completions on the Satellite (9) well project October 2024.
- 39. Conversely, MRC's last well drilled and completed in this area was in 2019 and MRC has no active permits within this six mile radius.

- 40. FME3 has been diligently working to develop this area. **Exhibit B-13** identifies the timeline and future target dates.
- 41. As indicated on B-13, FME3 acquired its initial lease in this area in December 2022 and FME3 has continued to acquire leases.
- 42. FME3 sent out proposal letters in January 2024. FME3 originally filed its pooling cases in February 2024, and anticipates commencing drilling operations in December 2024.
  - 43. Significantly, FME3 has a term assignment expiration in January 2025.
- 44. Prior to filing its applications, FME3 made a good faith effort to obtain voluntary joinder of the working interest owners in the proposed wells. To locate interest owners, FME3 conducted a diligent search of the public records in the county where the wells will be located and conducted phone directory and computer searches to locate contact information for parties entitled to notification. I mailed all working interest owners well proposals and an Authorization for Expenditure, and a form of Operating Agreement upon request.
- 45. FME3 sent its well proposal letters to the working interest owners and unleased mineral interest owners in January 2024.
- 46. **Exhibit B-14** is a summary of FME3's communications with working interest owners and unleased mineral interest owners, including MRC.
  - 47. FME3 negotiated with the uncommitted interest owners in good faith.
  - 48. I now provide specific testimony and exhibits for each of the Ball State Com cases.

#### **CASE NO. 24205 SPECIFIC TESTIMONY AND EXHIBITS**

- 49. Below is a brief description of the facts and exhibits for Case No. 24205.
- 50. In this case, FME3 seeks an order from the Division pooling all uncommitted mineral interests within a 320.00-acre, more or less, Bone Spring horizontal spacing unit

comprising the W/2W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Ball State Com 301H and Ball State Com 501H wells**, to be horizontally drilled. The producing area for the wells is expected to be orthodox. A copy of the application for Case No. 24205 is attached as **Exhibit B-15**.

- 51. Attached as **Exhibit B-15-a** are the C-102s for the wells proposed in Case No. 24205. The wells will develop the Airstrip, Bone Spring (Pool Code 960) and WC-025 G-06 S183518A;Bone Spring (Pool Code 97930).
  - 52. The producing area for the wells will be orthodox.
- 53. Attached as **Exhibit B-15-b** is a lease tract map for Case No. 24205. This map shows the ownership breakdown and again confirms that FME3 has higher working interest ownership than MRC. FME3 has 50% working interest. MRC only has 25% working interest.
- 54. Attached as **Exhibit B-15-c** is an example proposal letter and the Authorizations for Expenditure ("AFEs") for the proposed wells. The proposal letter identifies the proposed surface hole location and bottom hole location, and the approximate TVD. It also contains separate elections for each well. In my opinion, the estimated costs reflected on the AFEs are fair and reasonable, and are comparable to the costs of other wells of similar depth, length and completion method being drilled in this area of New Mexico.
  - 55. There are no depth severances within the proposed spacing unit.
  - 56. **Exhibit B-15-d** is a list of the parties to be pooled in Case 24205.

#### CASE NO. 24206 SPECIFIC TESTIMONY AND EXHIBITS

- 57. Below is a brief description of the facts and exhibits for Case No. 24206.
- 58. In this case, FME3 seeks an order from the Division pooling all uncommitted mineral interests within a 320.00-acre, more or less, Wolfcamp horizontal spacing unit comprising

the W/2W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Ball State Com 701H and Ball State**Com 801H wells, to be horizontally drilled. The producing area for the wells is expected to be orthodox. A copy of the application for Case No. 24205 is attached as **Exhibit B-16**.

- 59. Attached as **Exhibit B-16-a** are the C-102s for the wells proposed in Case No. 24206. The wells will develop the Scharb; Wolfcamp Pool (Pool Code 55640). The producing area for the wells will be orthodox.
- 60. Attached as **Exhibit B-16-b** is a lease tract map for Case No. 24205. This map shows the ownership breakdown and again confirms that FME3 has higher working interest ownership than MRC. FME3 has 50% working interest. MRC only has 25% working interest.
- 61. Attached as **Exhibit B-16-c** is an example proposal letter and the Authorizations for Expenditure ("AFEs") for the proposed wells. The proposal letter identifies the proposed surface hole location and bottom hole location, and the approximate TVD. It also contains separate elections for each well. In my opinion, the estimated costs reflected on the AFEs are fair and reasonable, and are comparable to the costs of other wells of similar depth, length and completion method being drilled in this area of New Mexico.
  - 62. There are no depth severances within the proposed spacing unit.
  - 63. **Exhibit B-16-d** is a list of the parties to be pooled in Case 24206.

#### CASE NO. 24199 SPECIFIC TESTIMONY AND EXHIBITS

- 64. Below is a brief description of the facts and exhibits for Case No. 24199.
- 65. In this case, FME3 seeks an order from the Division pooling all uncommitted mineral interests within a 320.00-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea

County, New Mexico. This spacing unit will be dedicated to the **Ball State Com 302H and Ball State Com 502H wells**, to be horizontally drilled. The producing area for the wells is expected to be orthodox. A copy of the application for Case No. 24199 is attached as **Exhibit B-17**.

- 66. Attached as **Exhibit B-17-a** are the C-102s for the wells proposed in Case No. 24199. The wells will develop the Airstrip, Bone Spring (Pool Code 960) and WC-025 G-06 S183518A;Bone Spring (Pool Code 97930). The producing area for the wells will be orthodox.
- 67. Attached as **Exhibit B-17-b** is a lease tract map for Case No. 24199. This map shows the ownership breakdown and again confirms that FME3 has higher working interest ownership than MRC. FME3 has 50% working interest. MRC only has 25% working interest.
- 68. Attached as **Exhibit B-17-c** is an example proposal letter and the Authorizations for Expenditure ("AFEs") for the proposed wells. The proposal letter identifies the proposed surface hole location and bottom hole location, and the approximate TVD. It also contains separate elections for each well. In my opinion, the estimated costs reflected on the AFEs are fair and reasonable, and are comparable to the costs of other wells of similar depth, length and completion method being drilled in this area of New Mexico.
  - 69. There are no depth severances within the proposed spacing unit.
  - 70. **Exhibit B-17-d** is a list of the parties to be pooled in Case 24199.

#### CASE NO. 24198 SPECIFIC TESTIMONY AND EXHIBITS

- 71. Below is a brief description of the facts and exhibits for Case No. 24198.
- 72. In this case, FME3 seeks an order from the Division pooling all uncommitted mineral interests within a 320.00-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Ball State Com 702H and Ball**

**State Com 802H wells**, to be horizontally drilled. The producing area for the wells is expected to be orthodox. A copy of the application for Case No. 24198 is attached as **Exhibit B-18**.

- 73. Attached as **Exhibit B-18-a** are the C-102s for the wells proposed in Case No. 24198. The wells will develop the Scharb; Wolfcamp Pool (Pool Code 55640). The producing area for the wells will be orthodox.
- 74. Attached as **Exhibit B-18-b** is a lease tract map for Case No. 24199. This map shows the ownership breakdown and again confirms that FME3 has higher working interest ownership than MRC. FME3 has 50% working interest. MRC only has 25% working interest.
- 75. Attached as **Exhibit B-18-c** is an example proposal letter and the Authorizations for Expenditure ("AFEs") for the proposed wells. The proposal letter identifies the proposed surface hole location and bottom hole location, and the approximate TVD. It also contains separate elections for each well. In my opinion, the estimated costs reflected on the AFEs are fair and reasonable, and are comparable to the costs of other wells of similar depth, length and completion method being drilled in this area of New Mexico.
  - 76. There are no depth severances within the proposed spacing unit.
  - 77. **Exhibit B-18-d** is a list of the parties to be pooled in Case 24198.

#### ADDITIONAL TESTIMONY AND EXHIBITS APPLICABLE TO ALL CASES

78. FME3 requests overhead and administrative rates of \$9,000/month during drilling and \$900/month while producing. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of Southeastern, New Mexico and consistent with the rates awarded by the Division in in recent compulsory pooling orders. FME3 requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

- 79. FME3 requests the maximum cost plus 200% risk charge be assessed against nonconsenting pooled working interest owners.
  - 80. FME3 requests that it be designated operator of the wells.
  - 81. FME3 requests that overriding royalty interest owners be pooled.
  - 82. To the extent necessary, FME3 requests approval of overlapping spacing units.
- 83. I provided Modrall with the names and addresses of uncommitted interest owners and overriding royalty interests owners of record in the Ball units. I also provided information regarding operators or working interest owners in any of the in any of the spacing units the Ball applications will overlap.
- 84. Based upon my knowledge of the land matters involved in these cases, education and training, it is my expert opinion that FME3's development plan will protect correlative rights and prevent waste.
- 85. The attachments to my Declaration were prepared by me or compiled from company business records.
- 86. I attest under penalty of perjury the laws of the State of New Mexico that the information provided herein is correct and complete to the best of my knowledge and belief and I will adopt this testimony at the hearing in this matter.

## Comparison of Operator's Development Plans – FME3 vs. MRC

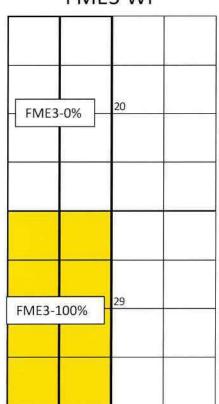

Factor	FME3	MRC	Comments
Working Interest Control	$ \checkmark $	×	<ul> <li>FME3 has highest working interest.</li> <li>FME3 has leasehold and working interest ownership of 50% in the units compared to MRC's 25%.</li> </ul>
Risk		×	<ul> <li>FME3's plan is vetted, thorough, and proven.</li> <li>Based on seismic, other review.</li> </ul>
Surface Factor		×	<ul> <li>FME3's development plan and demonstrated pace of development proves we plan to timely drill these assets.</li> <li>FME3 can develop the Ball development area with minimal surface impacts.</li> <li>FME3 has pooling hearings for the E2 of the Ball Unit and pooling orders under advisement in the Foxtail unit direction to the south.</li> <li>FME3 has permits necessary to commence drilling and third-party contracts in place demonstrating readiness.</li> <li>Ball State Com wells are on FME3's plan to develop in 2024 to meet leasehold expirations.</li> <li>FME3 has ~77,000 acres under executed Surface Use Agreements in the area.</li> </ul>
Prudent Operator/Prevent Waste		×	<ul> <li>FME3 has existing operations in the area.</li> <li>FME3 has been active in this area since 2022 whereas MRC hasn't been since 2019.</li> <li>FME3's plan is part of a holistic development in this area, is efficient, thoughtful and reduces overall footprint and disturbance.</li> </ul>
Infrastructure		×	<ul> <li>FME3 is actively solving for gas and water constraints to support larger developments.</li> <li>FME3 is investing significant capital on infrastructure to ensure gas and water are on pipe.</li> </ul>
Geologic/Reservoir Evidence	$ \checkmark $	×	<ul> <li>FME3's (4)Third Bone Spring &amp; Wolfcamp A wells will add reserves MRC's development plan overlooks.</li> <li>FME3's well placement and density is proven.</li> </ul>
Cost Estimates		×	FME3's cost estimates are lower than MRC's.

## Ownership Comparison Table – Bone Spring & Wolfcamp Overview

	Interest by Slot		
	W2W2	E2W2	
Franklin Mountain Energy 3, LLC	50%	50%	
MRC Permian Company	25%	25%	

### MRC WI

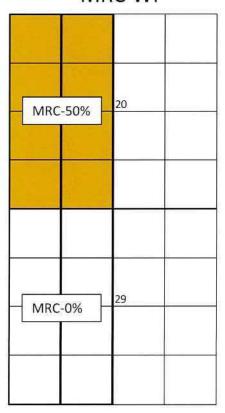

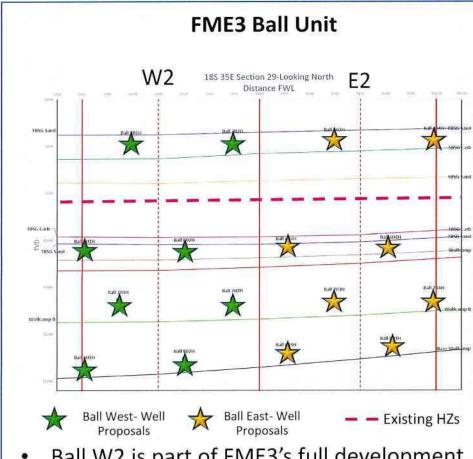

EXHIBIT 8.3

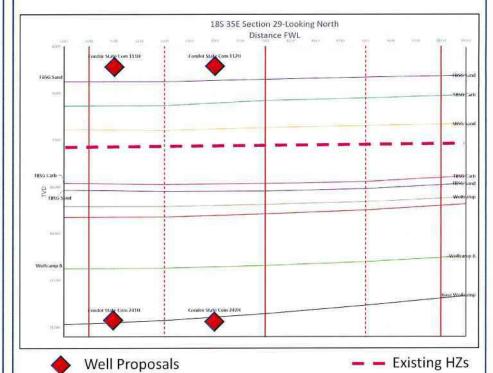

## Development Comparison: FME3's Development Plan Is Superior

- Ball W2 is part of FME3's full development of proven geologic targets
- FME3 is targeting the 1<sup>st</sup> Bone Spring, 3<sup>rd</sup>
  Bone Spring, Wolfcamp A and Wolfcamp B
  formations

- MRC Permian not targeting 3<sup>rd</sup> Bone Spring
- MRC Permian is not targeting Wolfcamp A

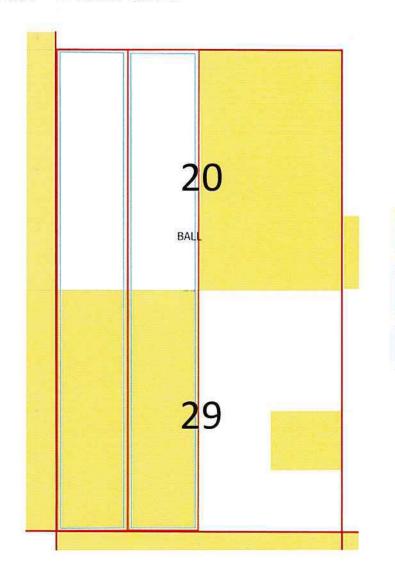

### Ball State Com Unit Case Overview

Received by OCD: 8/28/2024 12:01:23 PM

FME3's Interest

**Bone Spring Spacing** Units

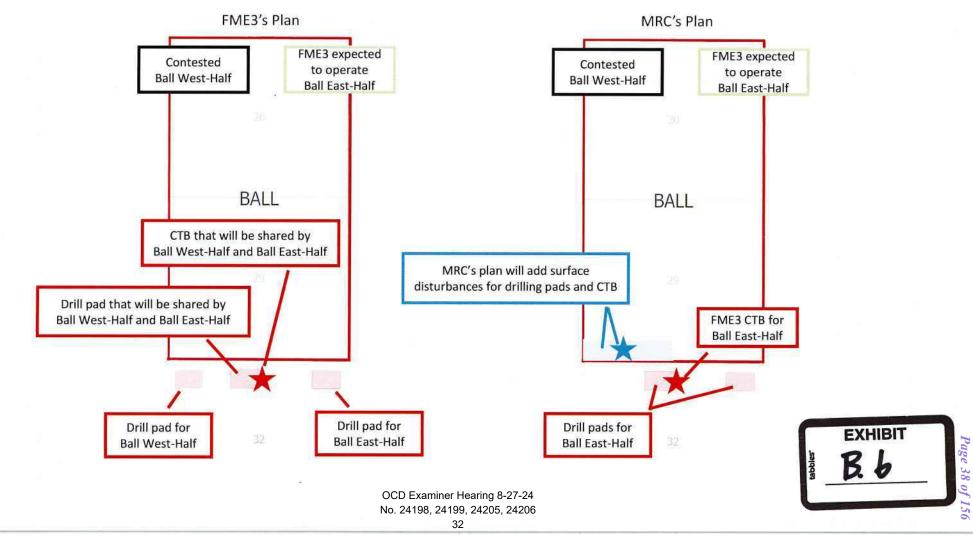

**Wolfcamp Spacing** Units

## FME3's Development Plan Minimizes Surface Disturbances

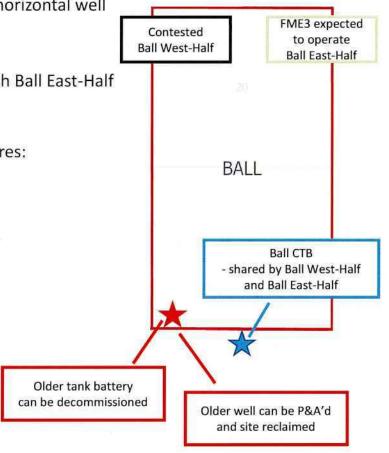

- FME3's plan reduces waste as the Ball West-Half development shares a CTB with the Ball East-Half development
- FME3's plan reduces waste as the Ball West-Half development shares a drill pad with the Ball East-Half development
- MRC's plan will result in waste
  - Additional surface disturbances will be required for drilling pads and CTB

## FME3's Development Plan Cleans Up Asset and Reduces 3<sup>rd</sup> Party Surface Disturbances

- FME3's development plan provides the ability to decommission an old tank battery
- FME3's development plan provides the ability to P&A an older horizontal well
- Well pad can be fully reclaimed
- Consolidation of Ball West-Half production into the Ball CTB with Ball East-Half production creates a single point for 3<sup>rd</sup> Party connections
- When compared to MRC, on a per well basis, FME3's plan requires:
  - Less equipment by 3<sup>rd</sup> parties
  - Less pipeline infrastructure and disturbance by 3<sup>rd</sup> parties
  - Reduces 3<sup>rd</sup> party surface disturbances

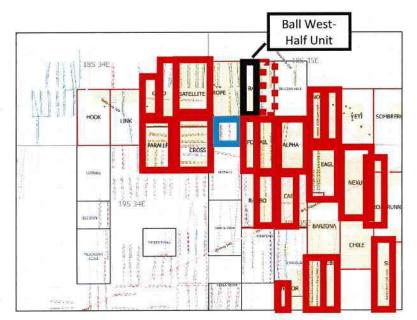

## FME3 Is Addressing Gas and Water Takeaway Constraints

- FME3 is investing significant capital into gas and water infrastructure to ensure pipeline solutions are in place
  - \$44mm of approved projects
    - 2024 budget of \$37mm
    - \$34mm invested to date, \$44mm by the end of 2024
  - FME3's consolidated position supports FME3's significant investment in infrastructure
- Existing infrastructure is not sized to support a 16-well horizontal project
  - Investments in pipelines are necessary
- 3<sup>rd</sup> party gas and water midstream companies are reluctant to spend the necessary capital
  - Operators need to be willing to help with the solution to foster development and prevent waste

= MRC Operated Project

= FME3 Operated Projects

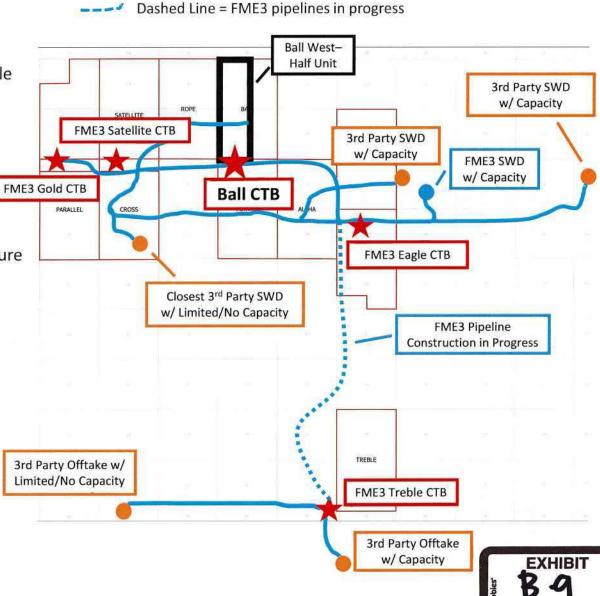

= Unit expected to be taken under advisement in Aug 2024

## FME3 Is Investing \$24mm of Capital to Solve Water Takeaway Constraints

- Adequate water takeaway does not exist to support large horizontal projects
  - Closest 3<sup>rd</sup> Party SWD to project has limited to no capacity
- FME3's recent projects at Eagle, Treble and Gold have pushed 3<sup>rd</sup> party capacities
- FME3 has existing company owned capacity and is investing to expand capacity
  - \$24mm of approved projects
  - ~17 miles of new pipeline infrastructure in-service over last 12 months
  - Remaining ~8 miles target in service late Q3 2024
  - FME3 has tied in 4 CTBs over last 12 months
- FME3 disposal access will include:
  - FME3 owned SWD
  - Firm takeaway contracts
  - Interruptible takeaway contracts

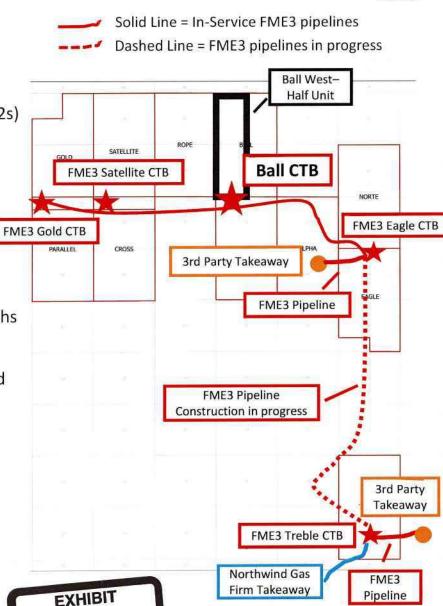

Solid Line = In-Service FME3 pipelines

OCD Examiner Hearing 8-27-24 No. 24198, 24199, 24205, 24206

## FME3 Is Investing \$20mm of Capital to Solve Gas Takeaway Constraints

- Adequate gas takeaway does not exist to support large horizontal projects
  - FME3's recent projects at Eagle, Treble and Gold have maxed out 3<sup>rd</sup> party capacities
- Existing capacity is for sweet gas (no hydrogen sulfide, h2s)
  - Shallower 1BS/2BS zones expected to have h2s
- FME3 is investing in gathering gas to a single point
- Increases appeal for 3<sup>rd</sup> party midstream companies
- Allows multiple 3<sup>rd</sup> parties to connect, increasing flow assurance to prevent waste
- \$20mm of approved projects
  - ~8 miles of new pipeline infrastructure and two H2S central treatment points in-service over last 12 months
  - Remaining ~8 miles target in service late Q3 2024
- 3<sup>rd</sup> Party Investment is required Northwind is a new build
  - FME3 is anchor customer for this area
  - Northwind's initial build stopped ~8 miles to South
  - FME3 signed an acreage dedication to facilitate build
  - Northwind will gather h2s gas
- FME3 gas takeaway will include:
- Firm Northwind offload with 100% capacity for FME3 forecasted volumes
- Interruptible offloads
- Potential for other options for flow assurance

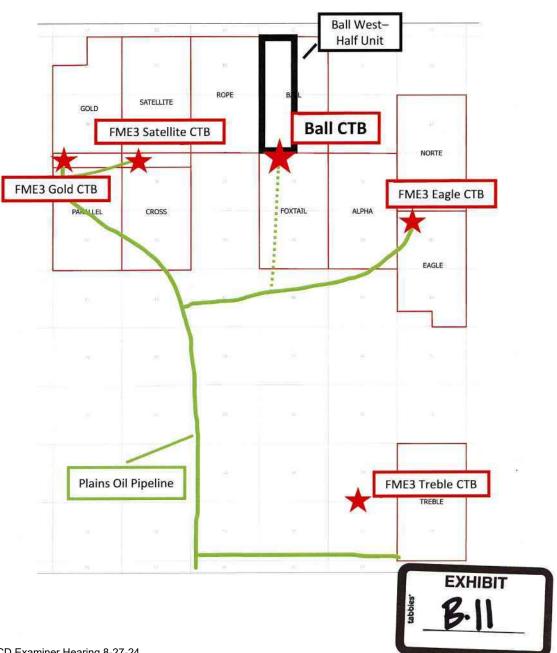

OCD Examiner Hearing 8-27-24 No. 24198, 24199, 24205, 2420

## FME3 Has a Reliable Oil Pipeline Solution in Place

Received by OCD: 8/28/2024 12:01:23 PM

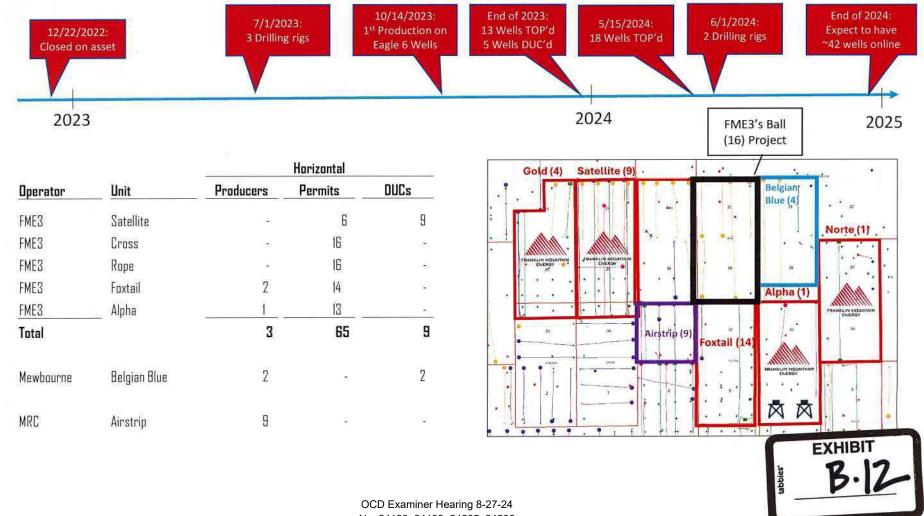

- FME3 strives to get all production on pipeline to reduce truck traffic and associated waste
- FME3 signed an acreage dedication with Plains to ensure oil pipeline takeaway would be in place day 1 for new developments
- Plains oil pipeline is ~2 miles for Ball CTB

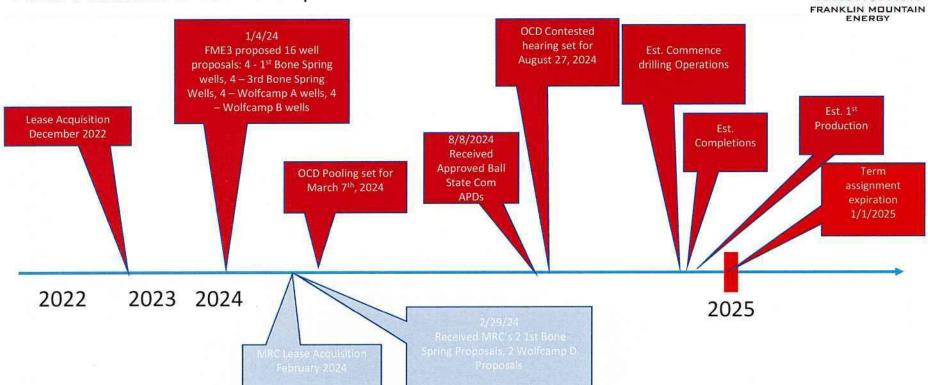

## FME3 Is All Systems Go

- FME3 is active in the of Ball Development Area
  - FME3 has turned on production 18 wells between October 2023 and June 2024
  - FME3 has 2 drilling rigs on the Alpha (6) well project as of August 2024
  - FME3 will start completions on the Satellite (9) well project October 2024
- MRC's last well drilled and completed was 2019 (Airstrip)

### FME3's Timeline of Ball Development

- FME3's timeline from lease acquisitions, to initiated development plans, to commencing drilling operations, to 1<sup>st</sup> production in the Ball State Unit is estimated at ~24 months
- December 2022: Closes on its initial transactions in Northern Lea County, establishing its position in the Ball Development Area
- January 2024: FME3 sends out 16 Ball well proposals
- January 2024: FME3 acquires additional interest in Ball Unit through a major acquisition

- February 2024: MRC Acquires interest in Ball
- February 2024: FME3 Receives 4 MRC well proposals
- August 2024: Contested Hearing
- December 2024: FME3 estimates to commence drilling operations
- January 1<sup>st</sup>, 2025: FME3 has an assignment expiration

## Summary of Communication

Date	Owner	Exchange
	MRC Permian Company (Formerly owned by COG	
1/9/2024	Operating)	Well proposals received
1/16/2024	Marathon Oil Permian LLC	Well proposals received, Reached out to MRO on 2/29/2024 to make sure they received elections. They were received on 1/16/2024, but not internally processed until I reached out. Withdrew objections in E2 of Ball.
1/27/2024	Hanley Petroleum, Inc.	Well proposals received, have had multiple email exchanges. Most current email 8/14/2024 stating they are still reviewing AFEs and JOA and will process after hearing.

## STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, AND, TO THE EXTENT NECESSARY, APPROVAL OF AN OVERLAPPING SPACING UNIT, LEA COUNTY, NEW MEXICO.

CASE NO. 24205

#### APPLICATION

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprised of the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

- 1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
- Franklin seeks to dedicate the spacing unit to the Ball State Com 301H and Ball State Com 601H wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. This proposed horizontal spacing unit will overlap with the following existing Bone Spring spacing units:

Released to Imaging: 2/7/2024 11:27:08 AM Released to Imaging: 8/29/2024 10:11:27 AM

41

- a. A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #001H well (API 30-025-40814);
- b. A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 29 dedicated to Marathon Oil Permian LLC's Nighthawk State Com #001H well (API 30-025-41519).
- 5. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
- 6. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law, the Division enter its order:

- A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
  - B. Approving, to the extent necessary, the proposed overlapping spacing unit;
  - C. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

- E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS & SISK, P.A.

Attorneys for Franklin Mountain Energy 3, LLC

CASE NO. 24205: Application of Franklin Mountain Energy 3, LLC for compulsory pooling and, to the extent necessary, approval of an overlapping spacing unit, Lea County, New Mexico. Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprising the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. This spacing unit will be dedicated to the Ball State Com 301H and Ball State Com 601H wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20. The producing area for the wells is expected to be orthodox. The proposed horizontal spacing unit will overlap with the following existing Bone Spring spacing units:

- A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #001H well (API 30-025-40814);
- A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 29 dedicated to Marathon Oil Permian LLC's Nighthawk State Com #001H well (API 30-025-41519).

Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles West of Hobbs, New Mexico.

Ball State Com 801H	WCB	11,132*	21,132'	Sec 32- T18S- R35E 575 FNL 300 FWL	Sec 20- T18S- R35E 100 FNL 360 FWL	\$12,164,281.44	N/A

FME3 reserves the right to modify the locations and drilling plans described above in order to comply with any requirements from a governing regulatory agency or to address any topography, environmental and/or cultural concerns.

FME3 is proposing to drill and complete the aforementioned wells under the terms of a modified, wellbore specific 1989 AAPL form Operating Agreement with the following general provisions:

- 100/300% Non-Consenting Penalty
- \$9,000/\$900 Drilling and Producing Rate
- Franklin Mountain Energy 3, LLC designated as Operator

Should you be interested in participating under an Operating Agreement, with your working interest, FME3 will send you our proposed form.

Please indicate your election in the space provided on the following page, sign and return this letter, along with a signed copy of the enclosed AFE. If you do not wish to participate, FME3 proposes a term assignment or lease at the following terms:

The foregoing offer is non-binding in nature until a definitive agreement and/or conveyance documents are negotiated and agreed to by each party. FME3 is under no obligation to negotiate, lease or purchase your interest.

Please return your signed documents to Jon Rutledge at <u>jrutledge@fmellc.com</u> or to the address provided below at your earliest convenience.

FME3 looks forward to working with you or your company on this proposed development and encourages you to call with any questions pertaining to these plans. However, please be advised that, in the near term, FME3 will file an application for compulsory pooling to pool any uncommitted owners.

Should you have any questions, please do not hesitate to contact the undersigned at (303) 709-7007.

Respectfully,

Franklin Mountain Energy 3, LLC

Jon Rutledge Landman

## STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. 24206

#### APPLICATION

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprised of the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. In support of this application, Franklin states as follows:

- Franklin has an interest in the subject lands and has a right to drill and operate a
  well thereon.
- 2. Franklin seeks to dedicate the spacing unit to the **Ball State Com 701H** and **Ball State Com 801H** wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
- 5. The pooling of all interests in the Wolfcamp formation underlying the proposed unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

Received by OCD: 2/6/2024 10:18:06 AM

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law, the Division enter its order:

- A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
  - B. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells:
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS & SISK, P.A.

Attorneys for Franklin Mountain Energy 3, LLC

CASE NO. 24206: Application of Franklin Mountain Energy 3, LLC for compulsory pooling, Lea County, New Mexico. Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprising the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the Ball State Com 701H and Ball State Com 801H wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20. The producing area for the wells is expected to be orthodox. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles west of Hobbs, New Mexico.

Ball State Com 801H	WCB	11,132'	21,132'	Sec 32- T18S- R35E 575 FNL 300 FWL	Sec 20- T18S- R35E 100 FNL 360 FWL	\$12,164,281.44	N/A

FME3 reserves the right to modify the locations and drilling plans described above in order to comply with any requirements from a governing regulatory agency or to address any topography, environmental and/or cultural concerns.

FME3 is proposing to drill and complete the aforementioned wells under the terms of a modified, wellbore specific 1989 AAPL form Operating Agreement with the following general provisions:

- 100/300% Non-Consenting Penalty
- \$9,000/\$900 Drilling and Producing Rate
- Franklin Mountain Energy 3, LLC designated as Operator

Should you be interested in participating under an Operating Agreement, with your working interest, FME3 will send you our proposed form.

Please indicate your election in the space provided on the following page, sign and return this letter, along with a signed copy of the enclosed AFE. If you do not wish to participate, FME3 proposes a term assignment or lease at the following terms:

The foregoing offer is non-binding in nature until a definitive agreement and/or conveyance documents are negotiated and agreed to by each party. FME3 is under no obligation to negotiate, lease or purchase your interest.

Please return your signed documents to Jon Rutledge at <u>jrutledge@fmellc.com</u> or to the address provided below at your earliest convenience.

FME3 looks forward to working with you or your company on this proposed development and encourages you to call with any questions pertaining to these plans. However, please be advised that, in the near term, FME3 will file an application for compulsory pooling to pool any uncommitted owners.

Should you have any questions, please do not hesitate to contact the undersigned at (303) 709-7007.

Respectfully,

Franklin Mountain Energy 3, LLC

Jon Rutledge Landman

# STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, AND, TO THE EXTENT NECESSARY, APPROVAL OF AN OVERLAPPING SPACING UNIT, LEA COUNTY, NEW MEXICO.

CASE NO. 24199

# APPLICATION

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprised of the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

- Franklin has an interest in the subject lands and has a right to drill and operate a
  well thereon.
- Franklin seeks to dedicate the spacing unit to the Ball State Com 302H and Ball State Com 602H wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. This proposed horizontal spacing unit will overlap with a 160-acre horizontal spacing unit comprised of the E/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #002H well (API 30-025-41025).

- 5. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
- 6. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law, the Division enter its order:

- A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
  - B. Approving, to the extent necessary, the proposed overlapping spacing unit;
  - C. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- D. Authorizing Franklin to recover its costs of drilling, equipping and completing the
   wells;
- E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS & SISK, P.A.

Received by OCD: 2/6/2024 10:00:36 AM

CASE NO. 24199 : Application of Franklin Mountain Energy 3, LLC for compulsory pooling and, to the extent necessary, approval of an overlapping spacing unit, Lea County, New Mexico. Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. This spacing unit will be dedicated to the Ball State Com 302H and Ball State Com 602H wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20. The producing area for the wells is expected to be orthodox. The proposed horizontal spacing unit will overlap with a 160-acre horizontal spacing unit comprised of the E/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #002H well (API 30-025-41025). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles West of Hobbs, New Mexico.

B.17-C

FME3 reserves the right to modify the locations and drilling plans described above in order to comply with any requirements from a governing regulatory agency or to address any topography, environmental and/or cultural concerns.

FME3 is proposing to drill and complete the aforementioned wells under the terms of a modified, wellbore specific 1989 AAPL form Operating Agreement with the following general provisions:

- 100/300% Non-Consenting Penalty
- \$9,000/\$900 Drilling and Producing Rate
- Franklin Mountain Energy 3, LLC designated as Operator

Should you be interested in participating under an Operating Agreement, with your working interest, FME3 will send you our proposed form.

Please indicate your election in the space provided on the following page, sign and return this letter, along with a signed copy of the enclosed AFE. If you do not wish to participate, FME3 proposes a term assignment or lease at the following terms:

The foregoing offer is non-binding in nature until a definitive agreement and/or conveyance documents are negotiated and agreed to by each party. FME3 is under no obligation to negotiate, lease or purchase your interest.

Please return your signed documents to Jon Rutledge at <u>jrutledge@fmellc.com</u> or to the address provided below at your earliest convenience.

FME3 looks forward to working with you or your company on this proposed development and encourages you to call with any questions pertaining to these plans. However, please be advised that, in the near term, FME3 will file an application for compulsory pooling to pool any uncommitted owners.

Should you have any questions, please do not hesitate to contact the undersigned at (303) 709-7007.

Respectfully,

Franklin Mountain Energy 3, LLC

# STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. 24198

# <u>APPLICATION</u>

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprised of the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. In support of this application, Franklin states as follows:

- Franklin has an interest in the subject lands and has a right to drill and operate a
  well thereon.
- 2. Franklin seeks to dedicate the spacing unit to the **Ball State Com 702H** and **Ball State Com 802H** wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
- The pooling of all interests in the Wolfcamp formation underlying the proposed unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law, the Division enter its order:

- A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
  - B. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells:
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS & SISK, P.A.

CASE NO. 24198: Application of Franklin Mountain Energy 3, LLC for compulsory pooling, Lea County, New Mexico. Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the Ball State Com 702H and Ball State Com 802H wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20. The producing area for the wells is expected to be orthodox. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles west of Hobbs, New Mexico.

Ball State Com 802H	om WCB 11,067' 21,067'		Sec 32- T18S- R35E 575 FNL 2310 FWL	Sec 20- T18S- R35E 100 FNL 1660 FWL	\$12,164,281.44	N/A XHIBIT	

FME3 reserves the right to modify the locations and drilling plans described above in order to comply with any requirements from a governing regulatory agency or to address any topography, environmental and/or cultural concerns.

FME3 is proposing to drill and complete the aforementioned wells under the terms of a modified, wellbore specific 1989 AAPL form Operating Agreement with the following general provisions:

- 100/300% Non-Consenting Penalty
- \$9,000/\$900 Drilling and Producing Rate
- Franklin Mountain Energy 3, LLC designated as Operator

Should you be interested in participating under an Operating Agreement, with your working interest, FME3 will send you our proposed form.

Please indicate your election in the space provided on the following page, sign and return this letter, along with a signed copy of the enclosed AFE. If you do not wish to participate, FME3 proposes a term assignment or lease at the following terms:

The foregoing offer is non-binding in nature until a definitive agreement and/or conveyance documents are negotiated and agreed to by each party. FME3 is under no obligation to negotiate, lease or purchase your interest.

Please return your signed documents to Jon Rutledge at <u>jrutledge@fmellc.com</u> or to the address provided below at your earliest convenience.

FME3 looks forward to working with you or your company on this proposed development and encourages you to call with any questions pertaining to these plans. However, please be advised that, in the near term, FME3 will file an application for compulsory pooling to pool any uncommitted owners.

Should you have any questions, please do not hesitate to contact the undersigned at (303) 709-7007.

Respectfully,

Franklin Mountain Energy 3, LLC

Jon Rutledge Landman

CASE NOS. 24369-24370

# SELF-AFFIRMED STATEMENT OF BEN KESSEL

Ben Kessel hereby states and declares as follows:

- I am over the age of 18, I am the Director of Geology for Franklin Mountain Energy
   LLC ("FME3"), and have personal knowledge of the matters stated herein.
- 2. I have testified before the New Mexico Oil Conservation Division (the "Division") and my credentials were accepted as a matter of record.
  - 3. My work for FME3 includes the Permian Basin and Lea County.
- 4. I am familiar with the applications FME3 filed in Case Nos.24198, 24199, 24205, and 24206.

- 5. I conducted a geological study of the Bone Spring and Wolfcamp formations underlying FME3's Ball State Com Development Area ("Ball West Development Area").
- 6. **Exhibit C-1** is a locator map, which identifies the general location of the Ball West Development Area within the Permian Basin.
- 7. **Exhibit C-2** is an excerpt from Snee & Zoback, 2018, identifying the horizontal stress orientation in this area. The preferred well orientation in this area is North South due to the  $S_{Hmax}$  direction.

# **BONE SPRING GEOLOGY STUDY—CASES 24199 & 24205**

- 8. The exhibits behind **Tab C-3** are the geology study I prepared for the Bone Spring formation. In case numbers 24199 and 24205, FME3 proposes to drill a total of four wells—two First Bone wells and two Third Bone Spring wells. I have prepared two separate sets of slides for each target formation.
- 9. **Exhibit C-3-a** is the First Bone Spring Structure map. The Ball West Development Area is identified by the pink box and the approximate location of the First Bone Spring wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the structure dips gently to the south. This map also identifies the five wells I used for the cross-section, running from A to A'.
- 10. **Exhibit C-3-b** is a stratigraphic cross section of the First Bone Spring. In my opinion, the well logs on the cross-section give a representative sample of the First Bone Spring formation in the area. The target zone is identified by a bracket and the words "Producing Interval." I have also identified approximately where the Ball West First Bone Spring wells fall within the wells I used for the cross-section. Based on the cross section, I conclude that the First Bone Spring is present and porous in the Ball West Development Area.

- 11. **Exhibit C-3-c** is a First Bone Spring Sand Isopach, which shows that the gross reservoir thickens slightly to the south.
- 12. **Exhibit C-3-d** is the Third Bone Spring structure map. The Ball West Development Area is identified by the pink box and the approximate location of the Third Bone Spring wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the reservoir dips gently to the south. This map also identifies the five wells I used for the cross-section, running from A to A'.
- 13. **Exhibit C-3-e** is a stratigraphic cross section of the Third Bone Spring. In my opinion, the well logs on the cross-section give a representative sample of the Third Bone Spring Sand formation in the area. The target zone is identified by a bracket and the words "Producing Interval." I have also identified where the proposed Ball West Third Bone Spring wells falls within the wells I used for the cross-section. Based on the cross section, I conclude that the Third Bone Spring Sand is present and porous in the Ball West Development Area.
- 14. **Exhibit C-3-f** is a Third Bone Spring Sand Isopach, which shows that the reservoir thickens to the southwest.
  - 15. I conclude from the Bone Spring geology study that:
    - a. The horizontal spacing units are justified from a geologic standpoint.
    - b. There are no structural impediments or faulting that will interfere with horizontal development.
    - c. Each quarter-quarter section in the proposed units will contribute more or less equally to production.

# WOLFCAMP GEOLOGY STUDY—CASES 24198 & 24206

- 16. The exhibits behind **Tab C-4** are the geology study I prepared for the Wolfcamp formation. In case numbers 24998 and 24206, FME 3 is proposing a total of four wells—two Wolfcamp A wells and two Wolfcamp B wells. I have prepared two separate sets of slides for each target formation.
- Area is identified by the blue box and the approximate location of the Wolfcamp A wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the reservoir dips slightly to the southwest. This map also identifies the five wells I used for the cross-section, running from A to A'.
- 18. **Exhibit C-4-b** is a stratigraphic cross section of the Wolfcamp A. In my opinion, the well logs on the cross-section give a representative sample of the Wolfcamp A formation in the area. The target zone is identified by a bracket and the words "Producing Interval." I have also identified where the proposed Ball West Wolfcamp A wells falls within the wells I used for the cross-section. Based on the cross section, I conclude that the Wolfcamp A is present and porous in the Ball West Development Area.
- 19. **Exhibit C-4-c** is a Wolfcamp A Isopach, which shows that the reservoir thickens slightly to the south.
- 20. **Exhibit C-4-d** is the Wolfcamp B Structure map. The Ball West Development Area is identified by the blue box and the approximate location of the Wolfcamp B wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the reservoir dips slightly to the southwest. This map also identifies the five wells I used for the cross-section, running from A to A'.

- 21. **Exhibit C-4-e** is a stratigraphic cross section of the Wolfcamp B. In my opinion, the well logs on the cross-section give a representative sample of the Wolfcamp B formation in the area. The target zone is identified by a bracket and the words "Producing Interval." I have also identified where the proposed Ball West Wolfcamp B wells falls within the wells I used for the cross-section. Based on the cross section, I conclude that the Wolfcamp B is present and porous in the Ball West Development Area.
- 22. **Exhibit C-4-f** is a Wolfcamp B Isopach, which shows that the reservoir thickens slightly to the southwest.
  - 23. I conclude from the Wolfcamp geology study that:
    - a. The horizontal spacing units are justified from a geologic standpoint.
    - b. There are no structural impediments or faulting that will interfere with horizontal development.
    - c. Each quarter-quarter section in the proposed units will contribute more or less equally to production.
- 24. In my opinion, FME3's Ball West State development plan prevents waste and protects correlative rights.
- 25. The attachments to my declaration were prepared by me or compiled under my direction or supervision.
- 26. I attest under penalty of perjury the laws of the State of New Mexico that the information provided herein is correct and complete to the best of my knowledge and belief and I will adopt this testimony at the hearing in this matter.

Received by OCD: 8/28/2024 12:01:23 PM

- Black box shows the location of the Ball development area
- Planned wells are located outside of the eastern edge of the Capitan Reef

# **Regional Stress**

 Red box shows the approximate location of the Ball development

- Reported local S<sub>Hmax</sub> (Snee and Zoback, 2018) direction is ENE, around 255°
- The Ball State West wells are planned to drill N-S, nearly orthogonal to S<sub>hmax</sub>, optimal for induced fracture propagation

APPLICATIONS OF MRC PERMIAN COMPANY FOR APPROVAL COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

**CASE NOS. 24369-24370** 

#### SELF-AFFIRMED STATEMENT OF CORY MCCOY

Cory McCoy hereby states and declares as follows:

- 1. I am over the age of 18, I am a Reservoir Engineer for Franklin Mountain Energy, LLC ("FME"), and have personal knowledge of the matters stated herein.
- 2. I have previously testified before the Oil Conservation Division ("Division") and my credentials were accepted as a matter of record.
  - 3. My work for FME3 includes the Permian Basin and Lea County.

- 4. I am familiar with the applications FME3 filed in Case Nos.24198, 24199, 24205, and 24206. I am also familiar with the applications filed by MRC Permian ("MRC") in Case Numbers 24367-24370.
- 5. In my opinion, FME3's proposed development plan is more efficient and effective than MRC's plan, has less risk than MRC's plan, and will result in the protection of correlative rights and the prevention of waste.
- 6. Exhibit D-1 compares FME3's plans with MRC's plans and identifies the benches that FME3 is targeting that MRC is not.
- 7. FME3 is targeting reserves that MRC is overlooking, two Wolfcamp A and two Third Bone Springs. Based on offset well data, FME3 estimates there are 750,000 barrels of recoverable oil from the Third Bone Spring formation and there are 580,000 barrels of recoverable oil from the Wolfcamp A formation. This is a total of 2.6 million barrels of additional oil FME3 intends to recover. FME3's wine rack development plan, proven well density and additional landing zones will allow more access to proven reserves. FME3's proposal protects correlative rights and prevents waste because FME3 is targeting additional benches with a superior development plan.
- 8. The Wolfcamp A is a proven target based on offsets, which is demonstrated by **Exhibit D-2**.
- 9. FME3 recently drilled and completed the Norte 702H, a Wolfcamp A well located one mile to the east of FME3's Ball development. The Norte 702H has an estimated ultimate recovery of 530,000 barrels. Additionally, the Beefalo development is directly west of the Ball development has given confidence that FME3's well spacing of four wells per section is correct.

Furthermore, the well performance of these developments have proven the Wolfcamp A is drillable inventory and should be developed.

- 10. FME3's Ball development plan will target the Wolfcamp A, whereas MRC is not targeting the Wolfcamp A.
- 11. The Third Bone Spring is a proven target based on offsets, which is demonstrated by **Exhibit D-3**.
- 12. The Airstrip development located directly west of the Ball development was drilled on four wells per section. This development gives FME3 confidence that four wells per section as proposed is the correct spacing as the Airstrip wells have an average estimated ultimate recovery of 860,000 barrels. FME3 drilled a Third Bone Spring in the Gold development located 3 miles to the west of the Ball development. This well has an estimated ultimate recovery of 770,000 barrels of oil. The Gold Third Bone Spring development coupled with Lario's Sky Dweller Third Bone Spring well directly north of the Gold development gives FME3 confidence that the Third Bone Spring formation is drillable inventory and should be developed.
- 13. FME3's Ball development plan will target the Third Bone Spring, whereas MRC is not targeting the Third Bone Spring.
- 14. Attached as **Exhibit D-4** is a cost comparison between MRC's Condor AFE vs FME3's Ball AFE.
- 15. The two AFE's were compared by formation and by MRC's proposed well count-two First Bone Springs and two Wolfcamp B wells. Taking an aggerate of the two projects, MRC's total AFE cost is \$49 MM whereas FME3's total AFE cost is \$42 MM. FME3's cost is lower by \$7 MM. In my opinion, FME3's AFE costs are both lower and more accurate to the area due to FME3's activity level in the basin. FME3 continues to push performance with drilling and

completions. This has allowed FME3 to continue to refine AFE proposals. FME3 is a prudent operator that is disciplined and efficient with capital expenditures.

- 16. Attached as **Exhibit D-5** is the backup data supporting Exhibits D-1 to D-4.
- 17. To conclude, in my opinion, FME3 is able to prudently operate the property, and FME3's plan will prevent waste because FME3 will be targeting reserves that MRC is not.
- 18. The exhibits to my declaration were prepared by me or under my direction or supervision.
- 19. I attest under penalty of perjury the laws of the State of New Mexico that the information provided herein is correct and complete to the best of my knowledge and belief and I will adopt this testimony at the hearing in this matter.

Formation	Ball W2	Condor			
1BS	2	2			
BBS (	2	0			
WCA <b>(</b>	2	0			
WCB*	2	2			
Total	8	4			

- ■The difference between the Ball and Condor development plans are (2) WCA wells and (2) 3BS wells which FME3 has proposed, and MRC has not.
- Based of offset data, both the 3BS and WCA formations are proven inventory. FME3 estimates 750,000 recoverable BO from the 3BS and 580,000 recoverable BO from the WCA per 10,000' lateral. This is an additional 2.6 MM BO that MRC overlooked and did not propose.
- FME3's wine rack development plan, well landing zone and well density with the additional (2) WCAs (2) 3BS wells are proven and will allow more access to reserves.

### Airstrip & Beefalo & Norte Supports WCA Development in Ball

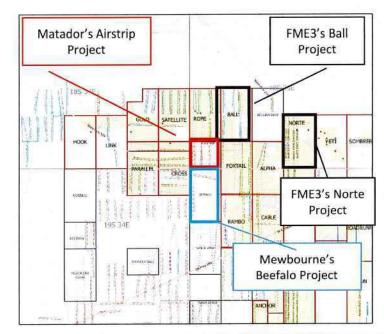

Received by OCD: 8/28/2024 12:01:23 PM

- MRC's Airstrip and Mewbourne's Beefalo developments are west offset of FME3's Ball development
- Airstrip and Beefalo well performance gives confidence in Wolfcamp A (WCA). Beefalo's development (4) wells/section supports FME3's well density
- MRC's WCA proposals are absent and therefore will leave proven reserves behind

### Airstrip & Gold & Sky Dweller Supports 3BS Development in Ball

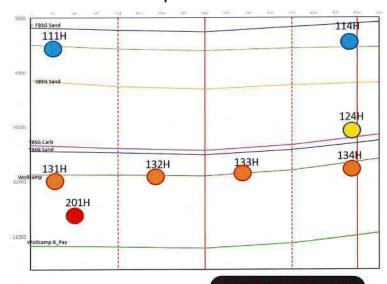

Received by OCD: 8/28/2024 12:01:23 PM

- MRC's Airstrip development is directly west offset of FME3's Ball development
- MRC's Airstrip's Third Bone Spring (3BS) well performance and developmental spacing of (4) wells/section supports FME3's well density and give confidence the 3BS is drillable inventory.
- FME3's Gold 3BS and Lario's Sky Dweller (3BS) are single well developments and are located west of Ball Development. Both projects have a 77 EUR BO/ft
- MRC's 3BS proposals are absent and therefore will leave proven reserves behind

OCD Examiner Hearing 8-27-24 No. 24198, 24199, 24205, 24206

#### FME3's Budget is Lower and FME3's Excellence in Execution

- Aggregate AFE between FME3 and MRC on a 4 well project (2 -1BS & 2 -WCB) as proposed by MRC's Condor
  - Matador's AFE Budget = \$49 MM
  - FME3's AFE Budget = \$42 MM
  - FME3 is \$ 7MM less than MRC

#### TO: AFFECTED PARTIES

This letter is to advise you that Franklin Mountain Energy 3, LLC ("Franklin Mountain Energy") has filed the enclosed applications.

In Case No. 24198, Franklin Mountain Energy 3 seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Ball State Com 702H** and **Ball State Com 802H** wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in

Modrall Sperling Roehl Harris & Sisk P.A.

Tel: 505.848.1800 www.modrall.com

#### Page 2

the NE/4 NW/4 (Unit C) of Section 20. The producing area for the wells is expected to be orthodox. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles west of Hobbs, New Mexico.

In Case No. 24199, Franklin Mountain Energy 3 seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. This spacing unit will be dedicated to the Ball State Com 302H and Ball State Com 602H wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20. The producing area for the wells is expected to be orthodox. The proposed horizontal spacing unit will overlap with a 160-acre horizontal spacing unit comprised of the E/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #002H well (API 30-025-41025). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles West of Hobbs, New Mexico.

In Case No. 24205, Franklin Mountain Energy 3 seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprising the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. This spacing unit will be dedicated to the **Ball State Com 301H** and **Ball State Com 601H** wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20. The producing area for the wells is expected to be orthodox. The proposed horizontal spacing unit will overlap with the following existing Bone Spring spacing units:

- A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #001H well (API 30-025-40814);
- A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 29 dedicated to Marathon Oil Permian LLC's Nighthawk State Com #001H well (API 30-025-41519).

Page 3

Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles West of Hobbs, New Mexico.

In Case No. 24206, Franklin Mountain Energy 3 seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprising the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Ball State Com 701H** and **Ball State Com 801H** wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20. The producing area for the wells is expected to be orthodox. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles west of Hobbs, New Mexico.

The hearing is set for March 7, 2024 beginning at 8:15 a.m. The hearing will be conducted in a hybrid fashion, both in-person at the Energy, Minerals, Natural Resources Department, Wendell Chino Building, Pecos Hall, 1220 South St. Francis Drive, 1st Floor, Santa Fe, NM 87505 and via the WebEx virtual meeting platform. To participate in the electronic hearing, see the instructions posted on the docket for the hearing date: <a href="https://www.emnrd.nm.gov/ocd/hearing-info/">https://www.emnrd.nm.gov/ocd/hearing-info/</a>.

As a party who may be affected by these applications, we are notifying you of your right to appear at the hearing and participate in these cases, including the right to present evidence either in support of or in opposition to the applications. Failure to appear at the hearing may preclude you from any involvement in these cases at a later date.

You are further notified that if you desire to appear in these cases, then you are requested to file a Pre-Hearing Statement with the Division at least four business days in advance of a scheduled hearing before the Division or the Commission, but in no event later than 5:00 p.m. mountain time, on the Thursday preceding the scheduled hearing date, with a copy delivered to the undersigned.

Sincerely,

Page 4

Wellina H. Bennett Deana M. Bennett

Attorney for Applicant

#### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. \_ 24198

#### **APPLICATION**

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprised of the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. In support of this application, Franklin states as follows:

- 1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
- 2. Franklin seeks to dedicate the spacing unit to the **Ball State Com 702H** and **Ball State Com 802H** wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
- 5. The pooling of all interests in the Wolfcamp formation underlying the proposed unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law, the Division enter its order:

- A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
  - B. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS & SISK, P.A.

#### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, AND, TO THE EXTENT NECESSARY, APPROVAL OF AN OVERLAPPING SPACING UNIT, LEA COUNTY, NEW MEXICO.

CASE NO. 24199

#### **APPLICATION**

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprised of the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

- 1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
- 2. Franklin seeks to dedicate the spacing unit to the **Ball State Com 302H** and **Ball State Com 602H** wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. This proposed horizontal spacing unit will overlap with a 160-acre horizontal spacing unit comprised of the E/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #002H well (API 30-025-41025).

Released to Imaging: 2/6/2024 3:39:34 PM

Page 2 of 4

5. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate

in the drilling of the wells or to otherwise commit their interests to the wells.

The pooling of all interests in the Bone Spring formation underlying the proposed 6.

unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling

of unnecessary wells, prevent waste and protect correlative rights.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of

the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law,

the Division enter its order:

Pooling all uncommitted interests in the Bone Spring formation underlying a A.

horizontal spacing unit within E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East,

N.M.P.M., Lea County, New Mexico;

Approving, to the extent necessary, the proposed overlapping spacing unit; B.

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

Authorizing Franklin to recover its costs of drilling, equipping and completing the D.

wells;

E. Approving actual operating charges and costs charged for supervision, together

with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

Setting a 200% charge for the risk involved in drilling and completing the wells in F.

the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS

& SISK, P.A.

CASE NO. 24199 : Application of Franklin Mountain Energy 3, LLC for compulsory pooling and, to the extent necessary, approval of an overlapping spacing unit, Lea County, New Mexico. Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. This spacing unit will be dedicated to the Ball State Com 302H and Ball State Com 602H wells to be horizontally drilled from a surface hole location in the NE/4 NW/4 (Unit C) of Section 32 to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 20. The producing area for the wells is expected to be orthodox. The proposed horizontal spacing unit will overlap with a 160-acre horizontal spacing unit comprised of the E/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #002H well (API 30-025-41025). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 17 miles West of Hobbs, New Mexico.

#### STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, AND, TO THE EXTENT NECESSARY, APPROVAL OF AN OVERLAPPING SPACING UNIT, LEA COUNTY, NEW MEXICO.

CASE NO. \_ 24205

#### APPLICATION

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Bone Spring horizontal spacing unit comprised of the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

- 1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
- 2. Franklin seeks to dedicate the spacing unit to the **Ball State Com 301H** and **Ball State Com 601H** wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. This proposed horizontal spacing unit will overlap with the following existing Bone Spring spacing units:

- a. A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 20 dedicated to COG Operating LLC's Condor State #001H well (API 30-025-40814);
- b. A 160-acre horizontal spacing unit comprised of the W/2 W/2 of Section 29 dedicated to Marathon Oil Permian LLC's Nighthawk State Com #001H well (API 30-025-41519).
- 5. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
- 6. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law, the Division enter its order:

- A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
  - B. Approving, to the extent necessary, the proposed overlapping spacing unit;
  - C. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

- E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

MODRALL, SPERLING, ROEHL, HARRIS & SISK, P.A.

# STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF FRANKLIN MOUNTAIN ENERGY 3, LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

### **APPLICATION**

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this application with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 320-acre, more or less, Wolfcamp horizontal spacing unit comprised of the W/2 W/2 of Sections 20 and 29, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. In support of this application, Franklin states as follows:

- 1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
- 2. Franklin seeks to dedicate the spacing unit to the **Ball State Com 701H** and **Ball State Com 801H** wells to be horizontally drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 32 to a bottom hole location in the NW/4 NW/4 (Unit D) of Section 20.
  - 3. The producing area for the wells is expected to be orthodox.
- 4. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
- 5. The pooling of all interests in the Wolfcamp formation underlying the proposed unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division on March 7, 2024, and after notice and hearing as required by law, the Division enter its order:
