

**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF TUMBLER OPERATING
PARTNERS, LLC, FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

Case Nos. 25462-25465

**APPLICATION OF TUMBLER OPERATING
PARTNERS, LLC, FOR APPROVAL OF NON-STANDARD
UNIT AND FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

Case No. 25466

**APPLICATION OF MARATHON OIL PERMIAN, LLC
FOR COMPULSORY POOLING AND APPROVAL OF
NON-STANDARD UNIT,
LEA COUNTY, NEW MEXICO**

Case Nos. 25541-25542

Tumbler Operating Partners, LLC

**Tumbler - David 36-24 Fed Com Wells (Bone Spring W2/W2)
Tumbler - David 36-24 Fed Com Wells (Bone Spring W2/E2)
Tumbler - David 36-24 Fed Com Wells (Bone Spring E2/E2)
Tumbler - David 36-24 Fed Com Wells (Bone Spring E2/W2)
Tumbler Wolfcamp - David 36-24 Fed Com Wells**

SECOND REVISED EXHIBITS

As indicated in the following Table of Contents

Heard on September 16 – 17, 2025

Table of Contents

	Tab
Checklists.....	1
Applications.....	2
Exhibit A – SECOND REVISED Self-Affirmed Statement of Landman Nicholas Weeks	3
Exhibit A-1 - C-102	
Exhibit A-2 - Plats of Tracts and Tract Ownership	
Exhibit A-3 - Unit Recap, Pooled Parties Highlighted, and Applicable Leases	
Exhibit A-4 - Sample Well Proposal Letter and AFEs	
Exhibit A-5 - Detailed Summary of Chronology of Contacts	
Exhibit A-6 - Plat of Proposed Non-Standard Proration Unit	
Exhibit B – Revised Self-Affirmed Statement of Geologist Dylan Collins	4
Exhibit B-1 - Location Map	
Exhibit B-2 - Structure Map	
Exhibit B-3 - Stratigraphic Cross-Section - REVISED	
Exhibit B-4 - Gunbarrel Diagram	
Exhibit B-5 - Gross Isochore Map	
Exhibit C – Self-Affirmed Statement of Engineer Walt Baker	5
Exhibit C-1 – Facilities Development	
Exhibit C-2 – Water Infrastructure	
Exhibit C-3 – Proposed Surface Commingling Area – Bone Spring	
Exhibit C-4 – Proposed Surface Commingling Area – Wolfcamp	
Exhibit D – REVISED Self-Affirmed Statement of Engineer Chris Villarreal.....	6
Exhibit D-1 – Tumbler-Stronghold Relationship	
Exhibit D-2 – Recoverable Reserves	
Exhibit D-3 – Implications of Marathon’s Ownership Percentage	
Exhibit D-4 – Marathon’s Corporate Priorities	
Exhibit D-5 – Marathon’s Lack of Good Faith Efforts – REVISED	
Exhibit D-6 – Marathon’s AFE Revisions	
Exhibit D-7 – Tumbler’s AFEs	
Exhibit D-8 – Unreliability of Marathon’s Pricing	
Exhibit D-9 – Implications of COP’s Corporate Priorities	
Exhibit D-10 – Tumbler’s Development Plan Prevents Waste	
Exhibit D-11 – Tumbler’s Type Curves	
Exhibit D-12 – EUR vs Spacing	
Exhibit D-13 – 3BS Sand – WCA – WCB Flow Unit Activity	
Exhibit D-14 – 3BS Sand – WCA – WCB Flow Unit EUR vs Spacing	

Exhibit E – Self-Affirmed Statement of Lawyer Sharon T. Shaheen.....7

Exhibit E-1 – Sample Notice Letter to All Interested Parties, mailed June 20, 2025

Exhibit E-2 – Chart of Notice to All Interested Parties

Exhibit E-3 – Copies of Certified Mail Receipts and Returns

Exhibit E-4 – Affidavit of Publication, published June 25, 2025 – REVISED

Tab 1

COMPULSORY POOLING APPLICATION CHECKLIST	
ALL INFORMATION IN THE APPLICATION MUST BE SUPPORTED BY SIGNED AFFIDAVITS	
Case: 25462	APPLICANT'S RESPONSE
Date	September 16, 2025
Applicant	Tumbler Operating Partners, LLC
Designated Operator & OGRID (affiliation if applicable)	Tumbler Operating Partners, LLC, 329689
Applicant's Counsel:	Spencer Fane, LLP (Sharon T. Shaheen)
Case Title:	Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Eddy County, New Mexico
Entries of Appearance/Intervenors:	Marathon Oil Permian (Hardy McLean LLC) EOG Resources (Bradfute Sayer, P.C.)
Well Family	David 36-24 Federal Com
Formation/Pool	
Formation Name(s) or Vertical Extent:	Bone Spring Formation
Primary Product (Oil or Gas):	Oil
Pooling this vertical extent:	Bone Spring Formation
Pool Name and Pool Code (Only if NSP is requested):	
Well Location Setback Rules (Only if NSP is Requested):	
Spacing Unit	
Type (Horizontal/Vertical)	Horizontal
Size (Acres)	~395 acres
Building Blocks:	Quarter-quarter section (40 ac)
Orientation:	South-North
Description: TRS/County	W/2W/2 of Section 24, W/2W/2 of Section 25, and Lot 4 (SW/4NW/4) and NW/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico
Standard Horizontal Well Spacing Unit (Y/N), If No, describe and is approval of non-standard unit requested in this application?	Yes
Other Situations	
Depth Severance: Y/N. If yes, description	No
Proximity Tracts: If yes, description	n/a
Proximity Defining Well: if yes, description	n/a
Applicant's Ownership in Each Tract	Tract 1: 11.05%; Tract 2: 11.05%; Tract 3: 11.05%; Tract 4: 0.00%
Well(s)	
Name & API (if assigned), surface and bottom hole location, footages, completion target, orientation, completion status (standard or non-standard)	Add wells as needed
Well #1	David 36-24 Federal Com 101H well, API# 30-025-XXXXX SHL: Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E BHL: 100' FNL & 660' FWL of Section 24, T26S-R34E Completion Target: Avalon at ~9505' Well Orientation: South to North Completion location expected to be standard
Horizontal Well First and Last Take Points	FTP: ~100' FSL & 660' FWL of Section 36, T26S-R34E LTP: ~100' FNL & 660' FWL of Section 24, T26S-R34E
Completion Target (Formation, TVD and MD)	Avalon- TVD (~9505'), MD (~23000')

A	B
34 Well #2	David 36-24 Federal Com 111H, API No. 30-025-XXXXX SHL: Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E BHL: ~100' FNL & 660' FWL of Section 24, T26S-R34E Completion Target: Bone Spring at ~10,830' Well Orientation: South to North Completion location expected to be standard
35 Horizontal Well First and Last Take Points	FTP: ~100' FSL & 660' FWL of Section 36, T26S-R34E LTP: ~100' FNL & 660' FWL of Section 24, T26S-R34E
36 Completion Target (Formation, TVD and MD)	Bone Spring - TVD (~10,830'), MD (~24330')
37 Well #3	David 36-24 Federal Com 121H, API No. 30-025-XXXXX SHL: Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E BHL: ~100' FNL & 440' FWL of Section 24, T26S-R34E Completion Target: Bone Spring at ~11220' Well Orientation: South to North Completion location expected to be standard
38 Horizontal Well First and Last Take Points	FTP: ~100' FSL & 440' FWL of Section 36, T26S-R34E LTP: ~100' FNL & 440' FWL of Section 24, T26S-R34E
39 Completion Target (Formation, TVD and MD)	Bone Spring - TVD (~11220'), MD (~24720')
40 Well #4	David 36-24 Federal Com 131H, API No. 30-025-XXXXX SHL: Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E BHL: ~100' FNL & 660' FWL of Section 24, T26S-R34E Completion Target: Bone Spring at ~12395' Well Orientation: South to North Completion location expected to be standard
41 Horizontal Well First and Last Take Points	FTP: ~100' FSL & 660' FWL of Section 36, T26S-R34E LTP: ~100' FNL & 660' FWL of Section 24, T26S-R34E
42 Completion Target (Formation, TVD and MD)	Bone Spring - TVD (~12395'), MD (~25895')
43 Well #5	David 36-24 Federal Com 135H, API No. 30-025-XXXXX SHL: Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E BHL: ~100' FNL & 660' FWL of Section 24, T26S-R34E Completion Target: Bone Spring at ~11565' Well Orientation: South to North Completion location expected to be standard
44 Horizontal Well First and Last Take Points	FTP: ~100' FSL & 660' FWL of Section 36, T26S-R34E LTP: ~100' FNL & 660' FWL of Section 24, T26S-R34E
45 Completion Target (Formation, TVD and MD)	Bone Spring - TVD (~11565'), MD (~25065')
46 AFE Capex and Operating Costs	
47 Drilling Supervision/Month \$	\$10,000; see Exhibit A, ¶ 22
48 Production Supervision/Month \$	\$1000; see Exhibit A, ¶ 22
49 Justification for Supervision Costs	See AFEs at Exhibit A-4
50 Requested Risk Charge	200%; see Exhibit A, ¶ 23
51 Notice of Hearing	
52 Proposed Notice of Hearing	Submitted with online filing of Application
53 Proof of Mailed Notice of Hearing (20 days before hearing)	Exhibits E, E-1, E-2, E-3
54 Proof of Published Notice of Hearing (10 days before hearing)	Exhibit E-4
55 Ownership Determination	
56 Land Ownership Schematic of the Spacing Unit	Exhibit A-2
57 Tract List (including lease numbers and owners)	Exhibits A-2 and A-3
58 If approval of Non-Standard Spacing Unit is requested, Tract List (including lease numbers and owners) of Tracts subject to notice	n/a
59 Pooled Parties (including ownership type)	Exhibit A-3
60 Unlocatable Parties to be Pooled	See Exhibit C-2

	A	B
61	Ownership Depth Severance (including percentage above & below)	n/a
62	Joinder	
63	Sample Copy of Proposal Letter	Exhibit A-4
64	List of Interest Owners (ie Exhibit A of JOA)	Exhibit A-3
65	Chronology of Contact with Non-Joined Working Interests	Exhibit A-5
66	Overhead Rates In Proposal Letter	Exhibit A-4
67	Cost Estimate to Drill and Complete	See AFEs at Exhibit A-4
68	Cost Estimate to Equip Well	See AFEs at Exhibit A-4
69	Cost Estimate for Production Facilities	See AFEs at Exhibit A-4
70	Geology	
71	Summary (including special considerations)	See Exhibit B, ¶ 13; see also Exhibit B, ¶ 11
72	Spacing Unit Schematic	Exhibits A-2 & A-3
73	Gunbarrel/Lateral Trajectory Schematic	Exhibit B-4
74	Well Orientation (with rationale)	Exhibit B, ¶ 13(i)
75	Target Formation	Exhibits B-3 & B-4
76	HSU Cross Section	Exhibit B-3
77	Depth Severance Discussion	n/a
78	Forms, Figures and Tables	
79	C-102	Exhibit A-1
80	Tracts	Exhibit A-2
81	Summary of Interests, Unit Recapitulation (Tracts)	Exhibit A-3
82	General Location Map (including basin)	Exhibit B-1
83	Well Bore Location Map	See Exhibit A-1, Exhibit B-1
84	Structure Contour Map - Subsea Depth	Exhibit B-2
85	Cross Section Location Map (including wells)	Exhibit B-3
86	Cross Section (including Landing Zone)	Exhibit B-3
87	Additional Information	
88	Special Provisions/Stipulations	n/a
89	CERTIFICATION: I hereby certify that the information provided in this checklist is complete and accurate.	
90	Printed Name (Attorney or Party Representative):	Sharon T. Shaheen
91	Signed Name (Attorney or Party Representative):	<i>Sharon T. Shaheen</i>

COMPULSORY POOLING APPLICATION CHECKLIST	
ALL INFORMATION IN THE APPLICATION MUST BE SUPPORTED BY SIGNED AFFIDAVITS	
Case: 25465	APPLICANT'S RESPONSE
Date	September 16, 2025
Applicant	Tumbler Operating Partners, LLC
Designated Operator & OGRID (affiliation if applicable)	Tumbler Operating Partners, LLC, 329689
Applicant's Counsel:	Spencer Fane, LLP (Sharon T. Shaheen)
Case Title:	Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Eddy County, New Mexico
Entries of Appearance/Intervenors:	Marathon Oil Permian (Hardy McLean LLC) EOG Resources (Bradfute Sayer, P.C.)
Well Family	David 36-24 Federal Com
Formation/Pool	
Formation Name(s) or Vertical Extent:	Bone Spring Formation
Primary Product (Oil or Gas):	Oil
Pooling this vertical extent:	Bone Spring Formation
Pool Name and Pool Code (Only if NSP is requested):	
Well Location Setback Rules (Only if NSP is Requested):	
Spacing Unit	
Type (Horizontal/Vertical)	Horizontal
Size (Acres)	~395 acres
Building Blocks:	Quarter-quarter section (40 ac)
Orientation:	South-North
Description: TRS/County	E/2W/2 of Section 24, E/2W/2 of Section 25, and Lot 3 (SE/4NW/4) and NE/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico
Standard Horizontal Well Spacing Unit (Y/N), If No, describe <u>and</u> is approval of non-standard unit requested in this application?	Yes
Other Situations	
Depth Severance: Y/N. If yes, description	No
Proximity Tracts: If yes, description	n/a
Proximity Defining Well: if yes, description	n/a
Applicant's Ownership in Each Tract	Tract 1: 11.05%; Tract 2: 11.05%; Tract 3: 11.05%; Tract 4: 0.00%
Well(s)	
Name & API (if assigned), surface and bottom hole location, footages, completion target, orientation, completion status (standard or non-standard)	Add wells as needed
Well #1	David 36-24 Federal Com 102H well, API# 30-025-XXXXX SHL: Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E BHL: ~100' FNL & 1980' FWL of Section 24, T26S-R34E Completion Target: Avalon at ~9505' Well Orientation: South to North Completion location expected to be standard
Horizontal Well First and Last Take Points	FTP: ~100' FSL & 1,980' FWL of Section 36, T26S-R34E LTP: ~100' FNL & 1,980' FWL of Section 24, T26S-R34E
Completion Target (Formation, TVD and MD)	Avalon- TVD (~9505'), MD (~23000')

A	B

**STATE OF NEW MEXICO
DEPARTMENT OF ENERGY, MINERALS AND NATURAL RESOURCES
OIL CONSERVATION DIVISION**

**APPLICATION OF TUMBLER OPERATING
PARTNERS, LLC, FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

Case No. 25462

APPLICATION

Tumbler Operating Partners, LLC, OGRID No. 329689 (“Tumbler”), through its undersigned counsel Spencer Fane, LLP (Sharon T. Shaheen), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) pool in a standard 395.05-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2W/2 of Section 24, W/2W/2 of Section 25, and Lot 4 (SW/4NW/4) and NW/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. In support of its application, Tumbler states as follows:

1. Tumbler is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Tumbler seeks to dedicate the following 5 ~2.5-mile wells to the proposed HSU:
 - David 36-24 Federal Com 101H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 111H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 121H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 440' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 440' FWL of Section 24, T26S-R34E;

- David 36-24 Federal Com 131H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 135H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E.

4. Tumbler has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU.

5. Approval of the HSU and the pooling of all mineral interest owners in the Bone Spring formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

6. In order to permit Tumbler to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this HSU should be pooled and Tumbler should be designated the operator of the HSU.

WHEREFORE, Tumbler requests that this application be set for hearing before an examiner of the Oil Conservation Division on July 10, 2025, and that, after notice and hearing as required by law, the Division enter an order:

A. Creating a standard 395.05-acre, more or less, HSU comprised of the W/2W/2 of Section 24, W/2W/2 of Section 25, and Lot 4 (SW/4NW/4) and NW/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico;

B. Pooling all mineral interests in the Bone Spring formation underlying the HSU;

C. Allowing the drilling of the following 5 ~2.5-mile wells in the proposed HSU: David 36-24 Federal Com 101H; David 36-24 Federal Com 111H; David 36-24 Federal Com 121H; David 36-24 Federal Com 131H; and David 36-24 Federal Com 135H.

D. Designating Tumbler as operator of the HSU and the wells to be drilled thereon;

E. Authorizing Tumbler to recover its costs of drilling, equipping and completing the wells;

F. Approving the operating charges and costs of supervision while drilling of \$10,000/month and, after completion, \$1000/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Imposing a 200% penalty for the risk assumed by Tumbler in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

SPENCER FANE, LLP

Attorneys for Tumbler Operating Partners, LLC

Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 395.05-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2W/2 of Section 24, W/2W/2 of Section 25, and Lot 4 (SW/4NW/4) and NW/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 101H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 111H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 121H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 440' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 440' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 131H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; and David 36-24 Federal Com 135H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

**APPLICATION OF TUMBLER OPERATING
PARTNERS, LLC, FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

Case No. 25463

APPLICATION

Tumbler Operating Partners, LLC, OGRID No. 329689 (“Tumbler”), through its undersigned counsel Spencer Fane, LLP (Sharon T. Shaheen), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) pool in a standard 394.75-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2E/2 of Section 24, W/2E/2 of Section 25, and Lot 2 (SW/4NE/4) and NW/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. In support of its application, Tumbler states as follows:

1. Tumbler is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Tumbler seeks to dedicate the following 5 ~2.5-mile wells to the proposed HSU:
 - David 36-24 Federal Com 103H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 113H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 123H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,200' FEL of Section 24, T26S-R34E;

- David 36-24 Federal Com 133H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 137H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E.

4. Tumbler has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU.

5. Approval of the HSU and the pooling of all mineral interest owners in the Bone Spring formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

6. In order to permit Tumbler to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this HSU should be pooled and Tumbler should be designated the operator of the HSU.

WHEREFORE, Tumbler requests that this application be set for hearing before an examiner of the Oil Conservation Division on July 10, 2025, and that, after notice and hearing as required by law, the Division enter an order:

A. Creating a standard 394.75-acre, more or less, HSU comprised of the W/2E/2 of Section 24, W/2E/2 of Section 25, and Lot 2 (SW/4NE/4) and SW/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico;

B. Pooling all mineral interests in the Bone Spring formation underlying the HSU;

C. Allowing the drilling of the following ~2.5-mile wells in the proposed HSU: David 36-24 Federal Com 103H; David 36-24 Federal Com 113H; David 36-24 Federal Com 123H; David 36-24 Federal Com 133H; and David 36-24 Federal Com 137H.

D. Designating Tumbler as operator of the HSU and the wells to be drilled thereon;

E. Authorizing Tumbler to recover its costs of drilling, equipping and completing the wells;

F. Approving the operating charges and costs of supervision while drilling of \$10,000/month and, after completion, \$1000/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Imposing a 200% penalty for the risk assumed by Tumbler in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Case No. 25465

APPLICATION

Tumbler Operating Partners, LLC, OGRID No. 329689 (“Tumbler”), through its undersigned counsel Spencer Fane, LLP (Sharon T. Shaheen), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) pool in a standard 394.89-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the E/2W/2 of Section 24, E/2W/2 of Section 25, and Lot 3 (SE/4NW/4) and NE/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. In support of its application, Tumbler states as follows:

1. Tumbler is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Tumbler seeks to dedicate the following 5 ~2.5-mile wells to the proposed HSU:
 - David 36-24 Federal Com 102H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 112H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 122H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,760' FWL of Section 24, T26S-R34E;

- David 36-24 Federal Com 132H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 136H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E.

4. Tumbler has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU.

5. Approval of the HSU and the pooling of all mineral interest owners in the Bone Spring formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

6. In order to permit Tumbler to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in this HSU should be pooled and Tumbler should be designated the operator of the HSU.

WHEREFORE, Tumbler requests that this application be set for hearing before an examiner of the Oil Conservation Division on July 10, 2025, and that, after notice and hearing as required by law, the Division enter an order:

A. Creating a standard 394.89-acre, more or less, HSU comprised of the E/2W/2 of Section 24, E/2W/2 of Section 25, and Lot 3 (SE/4NW/4) and NE/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico;

B. Pooling all mineral interests in the Bone Spring formation underlying the HSU;

C. Allowing the drilling of the following 5 ~2.5-mile wells in the proposed HSU: David 36-24 Federal Com 102H; David 36-24 Federal Com 112H; David 36-24 Federal Com 122H; David 36-24 Federal Com 132H; and David 36-24 Federal Com 136H.

D. Designating Tumbler as operator of the HSU and the wells to be drilled thereon.

E. Authorizing Tumbler to recover its costs of drilling, equipping and completing the wells;

F. Approving the operating charges and costs of supervision while drilling of \$10,000/month and, after completion, \$1000/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Imposing a 200% penalty for the risk assumed by Tumbler in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

SPENCER FANE, LLP

Attorneys for Tumbler Operating Partners, LLC

Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 394.89-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the E/2W/2 of Section 24, E/2W/2 of Section 25, and Lot 3 (SE/4NW/4) and NE/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 102H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 112H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 122H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,760' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 132H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; and David 36-24 Federal Com 136H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

OIL CONSERVATION DIVISION**

**APPLICATION OF TUMBLER OPERATING
PARTNERS, LLC, FOR APPROVAL OF NON-STANDARD
UNIT AND FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

Case No. 25466

APPLICATION

Tumbler Operating Partners, LLC, OGRID No. 329689 (“Tumbler”), through its undersigned counsel Spencer Fane, LLP (Sharon T. Shaheen), hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order approving a non-standard 1,579.28-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of Sections 24 and 25 and irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico, and pooling all mineral interests in the Wolfcamp formation (96776 JABALINA; WOLFCAMP, SOUTHWEST) underlying the HSU. In support of its application, Tumbler states as follows:

1. Tumbler is a working interest owner in the proposed HSU and has the right to drill thereon.
2. Tumbler seeks to dedicate the following 11 ~2.5-mile wells to the proposed HSU:
 - David 36-24 Federal Com 201H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 440' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 440' FWL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 202H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,310' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,310' FWL of Section 24, T26S-R34E;
 - David 36-24 Federal Com 203H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 2,200'

FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,200' FWL of Section 24, T26S-R34E;

- David 36-24 Federal Com 204H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,200' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 205H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,310' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,310' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 206H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 440' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 440' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 221H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 880' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 880' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 222H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,760' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 223H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 2,600' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,600' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 224H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 1,760' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,760' FEL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 225H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a first take point 100' FSL & 880' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 880' FEL of Section 24, T26S-R34E.

4. The David 36-24 Fed Com 223H is proposed to be drilled on the boundary of the East Half and the West Half of the sections to be pooled. In addition, Tumbler intends to use common facilities for the proposed wells, which will result in less impact to the surface.

5. Tumbler has in good faith sought and been unable to obtain voluntary agreement for the development of these lands from all of the mineral interest owners in the HSU.

6. Approval of the HSU as a non-standard unit and the pooling of all mineral interest owners in the Wolfcamp formation underlying the HSU will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

7. In order to permit Tumbler to obtain its just and fair share of the oil and gas underlying the subject lands, the non-standard unit should be approved, all uncommitted interests in this HSU should be pooled, and Tumbler should be designated the operator of the HSU.

WHEREFORE, Tumbler requests that this application be set for hearing before an examiner of the Oil Conservation Division on July 10, 2025, and that, after notice and hearing as required by law, the Division enter an order:

A. Approving a non-standard 1579.28-acre, more or less, HSU comprised of Sections 24 and 25 and irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico;

B. Pooling all mineral interests in the Wolfcamp formation underlying the HSU;

C. Allowing the drilling of the following 11 ~2.5-mile wells in the proposed HSU: David 36-24 Federal Com 201H, David 36-24 Federal Com 202H, David 36-24 Federal Com 203H, David 36-24 Federal Com 204H, David 36-24 Federal Com 205H, David 36-24 Federal Com 206H, David 36-24 Federal Com 221H, David 36-24 Federal Com 222H, David 36-24 Federal Com 223H, David 36-24 Federal Com 224H, and David 36-24 Federal Com 225H;

D. Designating Tumbler as operator of the HSU and the wells to be drilled thereon;

E. Authorizing Tumbler to recover its costs of drilling, equipping, and completing the wells;

F. Approving the operating charges and costs of supervision while drilling of \$10,000/month and, after completion, \$1000/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Imposing a 200% penalty for the risk assumed by Tumbler in drilling and completing the well against any interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

SPENCER FANE, LLP

REVISED SELF-AFFIRMED STATEMENT OF LANDMAN NICHOLAS WEEKS

I, Nicholas Weeks, do hereby state and affirm the following:

1. I am over the age of 18 and have the capacity to execute this statement, which is based on my personal knowledge.
2. I am a landman employed as Vice President with Tumbler Operating Partners, LLC (“TOP”), and I am familiar with the subject applications and the lands involved.
3. This testimony is submitted in connection with the filing by TOP of the above-referenced compulsory pooling application (the “Application”) pursuant to 19.15.4.12(A)(1) NMAC.
4. I have previously testified before the New Mexico Oil Conservation Division as an expert witness. My credentials as an expert in petroleum land matters have been accepted by the Division and previously made a matter of record. I graduated from the University of North Texas in 2006 with a B.S. in Biology and from SMU Dedman School of Law in 2011 with a J.D. I have

Exhibit A

worked on New Mexico oil and gas matters since 2015 and currently serve as Vice President of Tumbler Operating Partners, LLC (“TOP”).

5. In Case No. 25462, TOP seeks an order pooling all uncommitted interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) pool in a standard 395.05-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2W/2 of Section 24, W/2W/2 of Section 25, and Lot 4 (SW/4NW/4) and NW/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. TOP proposes to drill the following 2.5-mile wells in the proposed HSU:

- David 36-24 Federal Com 101H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 111H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 121H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 440' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 440' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 440' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 131H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 135H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 660' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FWL of Section 24, T26S-R34E.

6. In Case No. 25463, TOP seeks an order pooling all uncommitted interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) pool in a standard 394.75-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2 E/2 of Section 24, W/2E/2 of Section 25, and Lot 2 (SW/4NE/4) and NW/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. TOP proposes to drill the following 2.5-mile wells in the proposed HSU:

- David 36-24 Federal Com 103H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 113H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 123H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 2,200' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,200' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 133H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 137H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FEL of Section 24, T26S-R34E.

7. In Case No. 25464, TOP seeks an order pooling all uncommitted interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) pool in a standard 394.59-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the E/2 E/2 of

Section 24, E/2E/2 of Section 25, and Lot 1 (SE/4NE/4) and NE/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. TOP proposes to drill the following 2.5-mile wells in the proposed HSU:

- David 36-24 Federal Com 104H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 660' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 114H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FEL of Section 24, T26S-R34E with a first take point 100' FSL & 660' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 124H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 880' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 880' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 880' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 134H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 660' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FEL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 138H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 660' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 660' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 660' FEL of Section 24, T26S-R34E.

8. In Case No. 25465, TOP seeks an order pooling all uncommitted interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) pool in a standard 394.89-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the E/2 W/2 of Section 24, E/2W/2 of Section 25, and Lot 3 (SE/4NW/4) and NE/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. TOP proposes to drill the following 2.5-mile wells in the proposed HSU:

- David 36-24 Federal Com 102H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 112H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 122H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,760' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,760' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 132H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 136H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,980' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,980' FWL of Section 24, T26S-R34E.

9. In Case No. 25466, TOP seeks an order pooling all uncommitted interests in the Wolfcamp formation (96776 JABALINA; WOLFCAMP, SOUTHWEST) in a non-standard 1,579.28-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of Sections 24 and 25 and irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Tumbler seeks to dedicate the following 11 ~2.5-mile wells to the proposed HSU:

- David 36-24 Federal Com 201H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 440' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 440' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 440' FWL of Section 24, T26S-R34E;

- David 36-24 Federal Com 202H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,310' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,310' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,310' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 203H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 2,200' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 2,200' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,200' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 204H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location 100' FNL & 2,200' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,200' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 205H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,310' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,310' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,310' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 206H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 440' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 440' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 440' FEL of Section 24, T26S-R34E;
- David 36-24 Federal Com 221H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 880' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 880' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 880' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 222H well, to be horizontally drilled from a surface hole location in Lot 4 (SW/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,760' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,760' FWL of Section 24, T26S-R34E;
- David 36-24 Federal Com 223H well, to be horizontally drilled from a surface hole location in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 2,600' FWL of Section 24, T26S-R34E, with a first take point 100' FSL & 2,600' FWL of Section 36, T26S-R34E, and a last take point 100' FNL & 2,600' FWL of Section 24, T26S-R34E;

- David 36-24 Federal Com 224H well, to be horizontally drilled from a surface hole location in Lot 2 (SW/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 1,760' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 1,760' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 1,760' FEL of Section 24, T26S-R34E; and
- David 36-24 Federal Com 225H well, to be horizontally drilled from a surface hole location in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, to a bottom hole location ~100' FNL & 880' FEL of Section 24, T26S-R34E, with a first take point 100' FSL & 880' FEL of Section 36, T26S-R34E, and a last take point 100' FNL & 880' FEL of Section 24, T26S-R34E.

10. The completed intervals and first and last take points for the wells proposed in Case Nos. **25462-25465** will meet statewide setback requirements for horizontal wells. In Case No. 26466, the David 36-24 Fed Com 223H is proposed to be drilled on the boundary of the East Half and the West Half of the sections to be pooled. With approval of a non-standard spacing unit, the wells proposed in Case No. **25466** will meet statewide setback requirements for horizontal wells.

11. Approval of the HSUs and pooling of all mineral interest owners in the respective formations, as proposed in Case Nos. **25462-25466**, will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

12. Tumbler intends to use two common facilities for the proposed wells, which will result in less impact to the surface.

13. Marathon Oil Permian, LLC ("Marathon") submitted competing applications in Case Nos. 25541-25542 seeking to compulsory pool interest owners in non-standard 1,579.28-acre horizontal spacing unit(s) comprised of the same acreage and developing the same formations as the wells proposed by TOP.

14. A Form C-102 for each well is included as **Exhibit A-1**. The Form C-102 also indicates the locations of each surface hole, bottom hole, and the first and last take points.

15. A plat for each proposed spacing unit showing tracts, tract ownership, and applicable lease numbers is included in **Exhibit A-2**.

16. **Exhibit A-3** includes the unit recap, highlighting the working interest parties to be pooled for each proposed spacing unit. In addition, Exhibit A-3 includes a list of overriding royalty interest owners (ORRIs) to be pooled. The same ORRIs are being pooled in each spacing unit.

17. A sample of the well proposal letter and the authority for expenditure (“AFE”) for each well is included in **Exhibit A-4**. The estimated costs of the wells set forth in the AFEs are fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

18. A chronology of contacts with the non-joined working interest owners is attached as **Exhibit A-5**.

19. **Exhibit A-6** is a plat of the proposed non-standard proration unit, showing the affected parties who received notice.

20. There are no depth severances in the formations being pooled.

21. TOP has conducted a diligent search of the public records in Eddy County, New Mexico, where the wells will be located, and conducted phone directory and computer searches to obtain contact information for parties entitled to notification. TOP mailed all working interest owners a well proposal, including an Authorization for Expenditure (“AFE”), for each well.

22. TOP has made a good faith effort to obtain voluntary joinder of the working interest owners in the proposed wells.

23. TOP requests the Division to approve operating charges and costs of supervision while drilling of \$10,000/month and, after completion, \$1,000/month, together with a provision adjusting the rates pursuant to the COPAS accounting procedures

24. TOP requests the maximum cost, plus 200% risk charge, be assessed against non-consenting working interest owners.

25. TOP requests that it be designated operator of the wells.

26. Record title indicates that TOP controls approximately 9% interest and Marathon holds approximately 43% in the proposed HSU. The remaining ~48% is divided among 14 working interest owners, only one of which owns more than 15%.

27. TOP obtained its initial working interest in the acreage in November 2019. Marathon acquired its initial interest in 2017 and, after four years, accumulated a plurality in the subject area. Since 2021, however, Marathon has not acquired additional interests. Despite receiving compulsory pooling orders in Case Nos. 23355–23358 (2023) and approved permits for Goliath wells as early as February 2024, Marathon failed to advance development. By April 2024, Marathon held four additional Goliath permits but it sought a one-year extension in Case Nos. 24398–24401 rather than drilling. By December 2024, Marathon had amassed 17 approved Goliath permits and allowed the pooling orders to expire without seeking a further extension or preparing to propose new wells. Marathon’s actions demonstrate a pattern of delay and non-development.

28. Although Marathon controlled the plurality of interest, it does not appear to be sufficient for the project to secure a place on Marathon’s drill schedule. Marathon has described the Goliath wells as “discretionary,” with the land team having to request that the asset team add them to the schedule. In a January 22, 2025 email, Marathon’s own landmen indicated that there was not a timeline for Marathon’s development of the Goliath wells, i.e., the wells were absent from the drill schedule. By June of 2025—more than a month after TOP proposed its David 36-24 development and filed its pooling applications—Marathon asserted that the wells were now on its rig schedule with a “2027” spud date. Despite this assertion, no definitive spud date has ever been communicated. This pattern, and Marathon’s own words, reflect not only repeated deferrals in favor of permit extensions, but also a lack of capital focus on the project. Marathon’s capital

guidance does not appear to support near-term or even mid-term development of the Goliath wells, and the absence of a firm drilling commitment demonstrates that the project is not a priority within Marathon's investment strategy.

29. TOP made a good-faith effort to reach agreement with Marathon before filing its applications, as detailed in Exhibit A-6:

a. Over the course of more than a year, TOP engaged with a succession of Marathon landmen in search of a deal structure that might incentivize Marathon to develop its permits. Responses ranged from sporadic engagement to clear indifference. For example, after TOP submitted one trade concept, Marathon responded that it didn't "have the time to go through our various portfolio to put a trade schedule together for your consideration."

b. TOP also proposed a co-development concept under which it would drill and complete the Goliath wells. In a March 2025 email, Marathon's landman stated that Marathon doesn't need Tumbler's help to drill its wells.

30. If TOP is not named operator, Marathon's past performance and unchanged circumstances suggests that development will continue to be delayed. Although the Goliath wells are now nominally on Marathon's drill schedule, they are not slated to spud before Q1 2027, and Marathon has not provided a firm date. Further, as demonstrated by Marathon's communications, the Goliath wells have been the equivalent of "18+ months out" since February of 2024. As a result, the likely outcome is another set of pooling order extension requests, drilling permit extensions and continued deferral of development. The record suggests Marathon's strategy has been to block third-party development rather than advance its own.

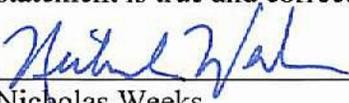

31. TOP sent out its well proposals immediately after Marathon's previous pooling orders expired, on April 25, 2025, and filed the instant applications on June 11, 2025.

32. The exhibits attached hereto were prepared by me or compiled from TOP's business records under my supervision.

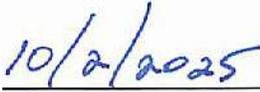

33. The granting of the applications is in the interests of conservation, the prevention of waste, and the protection of correlative rights.

34. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

Nicholas Weeks

Land

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

 Participation Proposal
 All of Sections 24, 25, & 36, Township 26 South, Range 34 East, N.M.P.M., Lea County, New Mexico, limited to all depths from surface to base of Wolfcamp

Dear Sir/Madam:

Tumbler Energy Partners, LLC ("TOP") proposes the drilling of Tumbler Operating Partners, LLC's David 36-24 Fed Com #101H, #102H, #103H, #104H, #111H, #112H, #113H, #114H, #121H, #122H, #123H, #124H, #135H, #136H, #137H, #138H, #131H, #132H, #133H, #134H, #201H, #202H, #203H, #204H, #205H, #206H, #221H, #222H, #223H, #224H, #225H located in All of Sections 24, 25, & 36, Township 26 South, Range 34 East Lea County, New Mexico.

In connection with the above, please note the following:

The estimated cost of drilling, testing, completing, and equipping of each Well is itemized on the thirty-one (31) enclosed Authority for Expenditures ("AFE") dated April 25, 2025.

In the event you/your firm elects to participate in the proposed wells, please execute the enclosed extra set of JOA signature/notary pages and the AFEs before mailing them back to my attention to the address on the letterhead above within thirty (30) days.

TOP reserves the right to modify the locations and drilling plans described above to address topography, cultural, or environmental concerns, among other reasons. TOP will advise you of any modifications.

TOP requests that you indicate your election to participate in the drilling and completion of the Wells in the space provided below, sign and return one (1) copy of this letter to the undersigned.

TOP is proposing to drill the Wells under the terms of the modified 1989 AAPL form of Operating Agreement Horizontal Modifications, which is enclosed for your review. The proposed Operating Agreement dated April 1, 2025, by and between Tumbler Operating Partners, LLC, as Operator and Tumbler Operating Partners, LLC et al as Non-Operators, covers certain depths in All of Sections 24, 25, & 36, Township 26 South, Range 34 East Lea County, New Mexico, and has the following general provisions:

- 100% / 300% / 300% Non-consenting penalty
- \$10,000/\$1,000 Drilling and Producing rate
- Tumbler Operating Partners, LLC named as Operator
- Contract Area of All of Sections 24, 25, & 36, Township 26 South, Range 34 East Lea County, New Mexico, limited to all depths from surface to base of Wolfcamp

If your election is to participate in the drilling and completion of the Wells, please sign and return a copy of the enclosed AFEs within thirty (30) days of receipt of this notice. If we do not reach an agreement within 30 days of the delivered date of this letter, TOP will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed wells.

Please be aware that the enclosed AFEs are only an estimate of costs to be incurred and by electing to participate in the Wells, each working interest owner shall be responsible for its proportionate share of all costs incurred.

Thank you for your consideration of this proposal. Please don't hesitate to contact me if you have any questions.

Sincerely,
Tumbler Operating Partners, LLC

Kristin Wilpitz
Landman

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

Disclaimer of Cost Estimates; Obligations of Participant; Insurance Requirements
 The cost estimates set forth in this Authorization for Expenditure ("AFE") are provided for informational purposes only and shall not be interpreted as fixed or maximum amounts for any individual line item or for the aggregate project cost. The installation of tubing, though approved under this AFE, may be deferred for a period of up to twelve (12) months following the completion of the well.
 By executing this AFE, the Participant agrees to bear its proportionate share of all actual costs incurred in connection with the project. Such costs include, but are not limited to, legal, curative, regulatory, brokerage, and well-related expenses, in accordance with the terms and conditions of the applicable joint operating agreement, regulatory order, or other governing agreement pertaining to the subject well. Unless the Participant provides the Operator, no later than the spud date, with a certificate of insurance evidencing its own coverage in an amount and form acceptable to the Operator, the Participant shall be included under the Operator's well control and general liability insurance policies and shall be billed for its proportionate share of the premiums associated therewith.

(the "Wells")
Participation Proposal
All of Sections 24, 25, & 36, Township 26 South, Range 34 East, N.M.P.M., Lea County, New Mexico, limited to all depths from surface to base of Wolfcamp

Dear Sir/Madam:

Tumbler Energy Partners, LLC (TOP) previously proposed the drilling of TOP's David 36-24 Fed Com wells located in All of Sections 24, 25, & 36, Township 26 South, Range 34 East, N.M.P.M., Lea County, New Mexico,

In connection with the above, please note that the subject participation proposal listed the David 36-24 Fed Com #138H with a proposed last take point located 100' FNL & 660' FWL of Section 24-T26S-34E. I am writing to clarify that the last take point will actually be located 100' FNL & 660' **FEL** of Section 24-T26S-34E,

No other clarification was made to the proposal and no modification has been made to the AFE previously included in the original proposal.

Please reach out to me if you have any questions.

Sincerely,

Tumbler Operating Partners, LLC

Kristin Wilpitz

(the "Wells")
Participation Proposal
All of Sections 24, 25, & 36, Township 26 South, Range 34 East, N.M.P.M., Lea County, New Mexico, limited to all depths from surface to base of Wolfcamp

Dear Sir/Madam:

Tumbler Operating Partners, LLC ("TOP") previously proposed the drilling of TOP's David 36-24 Fed Com wells located in Sections 24, 25, and 36, Township 26 South, Range 34 East, N.M.P.M., Lea County, New Mexico.

Please note that the table included with the initial well proposal letter contained a typographical error. The bottom hole locations were inadvertently shown as being located in Section 24, Township **24** South, Range **36** East. The correct bottom hole location for each proposed well will be located in Section 24, Township **26** South, Range **34** East, consistent with the AFEs enclosed with the original proposal.

An updated table reflecting the correct information is enclosed for your convenience.

Sincerely,

Tumbler Operating Partners, LLC

Kristin Wilpitz
Landman

David 36-24 Fed Com – Summary of Comms

Summary of Communications Between Tumbler Operating Partners and David 36-24 Working Interest Owners		
WI Owner	Date	Description
Marathon Oil Permian	2/29/2024	Tumbler engages with Marathon to discuss development timing for the recently permitted Goliath wells.
Marathon Oil Permian	2/29/2024	Marathon emails Tumbler contact info for landman responsible for Goliath.
Marathon Oil Permian	2/29/2024	Tumbler emails Marathon landman over Goliath
Marathon Oil Permian	3/4/2024	Tumbler follows up on unanswered email to Marathon landman over Goliath
Marathon Oil Permian	3/5/2024	Marathon emails Tumbler: "still looking at scenarios but we are 18+ months out on spudding these"
Marathon Oil Permian	3/5/2024	Tumbler follows up.
Marathon Oil Permian	3/7/2024	Marathon emails Tumbler: "Once planning publishes our newest schedule I will let you know a more definite date"
Marathon Oil Permian	3/7/2024	Tumbler follows up. to set up a call.
Marathon Oil Permian	3/11/2024	Tumbler follows up re: a call.
Marathon Oil Permian	3/20/2024	Tumbler follows up re: a call.
Marathon Oil Permian	3/21/2024	Marathon emails Tumbler: "Goliaths have been moved about 18 months out on our rig schedule as of right now"
Marathon Oil Permian	3/26/2024	Tumbler tries to set up a Teams meeting with Marathon
Marathon Oil Permian	3/28/2024	Tumbler tries to set up a Teams meeting with Marathon
Marathon Oil Permian	4/8/2024	Tumbler continues to engage with Marathon by offering to work with Marathon to acquiring additional interest in the Goliath unit for both parties in order to spur development.
Marathon Oil Permian	4/16/2024	Marathon emails Tumbler providing Goliath well list with Gross AFE costs (24 new wells)
Marathon Oil Permian	4/22/2024	Tumbler requests development schedule / well list for Goliath.
Marathon Oil Permian	4/24/2024	Tumbler follows up with Marathon on its prior offer and suggests additional deal structures that could be favorable to both parties and encourage development.
Marathon Oil Permian	5/25/2024	Marathon secures extensions for its Goliath pooling orders.
Marathon Oil Permian	10/10/2024	Tumbler receives Marathon's proposals for 24 Goliath wells under the pooling orders.
Marathon Oil Permian	10/17/2024	Tumbler follows up with Marathon by email regarding the proposals
Marathon Oil Permian	10/21/2024	Tumbler follows up with Marathon by phone to discuss development timing and request copy of Marathon's proposed Goliath JOA
Marathon Oil Permian	10/30/2024	Marathon emails Tumbler a copy of the proposed Goliath JOA
Marathon Oil Permian	11/4/2024	Tumbler follows up with Marathon and proposes modifications to the Goliath JOA.
Marathon Oil Permian	11/6/2024	Tumbler elects to participate in Goliath wells under the pooling orders
Marathon Oil Permian	11/19/2024	Tumbler continues to negotiate the JOA with Marathon. Marathon notifies Tumbler that Marathon/COP merger will close in 2-3 weeks
Marathon Oil Permian	11/22/2024	Tumbler follows up with Marathon to discuss Tumbler's elections under the orders.
Marathon Oil Permian	1/14/2025	Tumbler emails Marathon to make an introduction to a new landman and discuss development timing for the Goliath unit.
Marathon Oil Permian	1/17/2025	Marathon emails Tumbler setting plans for a phone conference on 1/23/2025 to discuss development plans for Goliath.
Marathon Oil Permian	1/21/2025	Tumbler calls Marathon to discuss plans for operations on the lease.

David 36-24 Fed Com – Summary of Comms

Summary of Communications Between Tumbler Operating Partners and David 36-24 Working Interest Owners		
WI Owner	Date	Description
Marathon Oil Permian	1/21/2025	Tumbler continues to negotiate the JOA and sends draft amendment to the Goliath JOA to Marathon.
Marathon Oil Permian	1/22/2025	Marathon emails Tumbler: "For timing on Goliath, no solid spud date yet. Either way we'll need to re-apply for pooling as mentioned yesterday."
Marathon Oil Permian	1/22/2025	Tumbler calls Marathon and Marathon indicates that there isn't any definitive plan to develop the Goliath position.
Marathon Oil Permian	1/23/2025	Tumbler emails Marathon asking to keep the 1/23/2025 meeting on the calendar and continue to pursue all options to develop this unit in the immediate future.
Marathon Oil Permian	1/23/2025	Marathon emails Tumbler: "COP intends to develop this unit in the near future, though not in 2025"
Marathon Oil Permian	2/9/2025	Tumbler emails Marathon asking for an update.
Marathon Oil Permian	2/10/2025	Marathon emails Tumbler: "No update on Goliath"
Marathon Oil Permian	3/2/2025	Email correspondence from Chris to Caroline and Sean asking if they have any updates on the outlook of Goliath development.
Marathon Oil Permian	3/3/2025	Marathon emails Tumbler: "The Goliath unit won't be developed in 2025, and the drill schedule past '25 is still TBD"
Marathon Oil Permian	3/9/2025	Tumbler emails Marathon offering to provide creative solutions to aid in development, such as Tumbler deploying a rig to proceed with development.
Marathon Oil Permian	3/11/2025	Marathon emails Tumbler "As to the rig situation, let me talk to the asset team and verify whether availability is an issue"
Marathon Oil Permian	3/18/2025	Email correspondence from Chris following up on the proposal to assist COP in drilling this unit.
Marathon Oil Permian	3/19/2025	Marathon emails Tumbler "Rig availability isn't an issue for this project." "Really appreciate Tumbler's willingness to collaborate, but we're confident in our current approach and timeline. "??? "what's driving the urgency around Goliath for Tumbler?"???
Marathon Oil Permian	3/21/2025	Tumbler emails Marathon offering to meet to discuss Tumbler's position.
Marathon Oil Permian	3/25/2025	Tumbler emails Marathon following up on offer to meet
Marathon Oil Permian	3/25/2025	Marathon emails Tumbler: "there aren't any updates, so no need to meet. If you have any questions I'm happy to answer via email."
Marathon Oil Permian	3/27/2025	Email correspondence from Tumbler asking when we should expect the current permits to be drilled and if we could discuss a potential trade to assist.
Marathon Oil Permian	3/28/2025	Tumbler emails Marathon to understand Marathon's unwillingness to pursue the project given permits in hand an pooling orders set to expire. Tumbler reiterates it is willing to discuss any avenue to see these lands get drilled.
Marathon Oil Permian	3/31/2025	Marathon emails Tumbler: "this project and it is absolutely in plan for our development of this area." "we have such a large portfolio of New Mexico inventory competing for capital is ... why COP is not developing the project this year," "capital guidance" and "capital focus" are the cause of delays. "COP plans to develop within the timeframe of the permit term with a tentative earliest estimate of drilling in 2026. " Marathon asserts it is "being transparent about COP's development of the Goliath unit as it currently stands in our drill schedule." ???
Marathon Oil Permian	4/3/2025	Tumbler emails Marathon explaining Tumbler's goals and attempting to engage in trade discussion.
Marathon Oil Permian	4/3/2025	Marathon emails Tumbler asking for tracts that Tumbler might be targeting.
Marathon Oil Permian	4/3/2025	Tumbler emails Marathon listing target areas, asset types, preferred operators and specific units it would be interested in trading into.

David 36-24 Fed Com – Summary of Comms

Summary of Communications Between Tumbler Operating Partners and David 36-24 Working Interest Owners		
WI Owner	Date	Description
Marathon Oil Permian	4/8/2025	Tumbler emails Marathon following up on trade ideas
Marathon Oil Permian	4/9/2025	Marathon emails Tumbler: "my team and I don't have the time to go through our various portfolio to put a trade schedule together for your consideration."
Marathon Oil Permian	4/26/2025	Tumbler mails out David 36-24 proposals and JOA to all parties
Marathon Oil Permian	4/28/2025	Email correspondence from Tumbler to Marathon stating due to Marathon's desire to let pooling expire, it is most prudent for Tumbler to pursue operatorship.
Marathon Oil Permian	5/12/2025	Email correspondence from Marathon stating they received David proposals and asked about potential deal to acquire Tumbler's interest.
Marathon Oil Permian	5/15/2025	Tumbler sends Certified mailed correction well proposal in mail all parties to correct #138 BHL
Marathon Oil Permian	5/15/2025	Email correspondence from Tumbler sending a copy of the correction well proposal correcting #138 BHL
Marathon Oil Permian	5/25/2025	Marathon's Goliath Pooling Orders expire.
Marathon Oil Permian	6/3/2025	Email correspondence from Tumbler clarifying with Marathon which mailing address to use - Marathon or Conoco's. They confirmed 600 Illinois Midland address
Marathon Oil Permian	6/6/2025	Email correspondence from Tumbler to Marathon notifying Marathon of pooling applications, asked if they have any update regarding their farmout/term assignment offer
Marathon Oil Permian	6/10/2025	Tumbler flies to Midland to meet with Marathon and discuss Tumbler's and Marathon's position in the unit. Marathon: Goliath is now slated for a 2027 spud with a focus on third Bone Spring and Wolfcamp.
Marathon Oil Permian	6/11/2025	Tumbler emails Marathon following up about their breakfast conversation and reiterate Tumbler's stance to fully develop the unit and maximize value for all parties involved.
Marathon Oil Permian	6/11/2025	Tumbler files for pooling on David well proposals
Marathon Oil Permian	6/12/2025	Marathon emails Tumbler: Marathon plans to pursue operatorship and it no longer has plans to divest their interest.
Marathon Oil Permian	6/12/2025	Tumbler emails Marathon stating that Tumbler is committed to be a trusted partner, regardless of the outcome we are open to explore a deal to create value.
Marathon Oil Permian	7/10/2025	Marathon's new well proposals for the Goliath unit are received by Tumbler
Marathon Oil Permian	8/26/2025	Received Communitization agreements in the mail from ConocoPhillips for Puma Mineral Partners
Marathon Oil Permian	9/3/2025	Received in the mail updated spacing notification from Conoco for Goliath
Marathon Oil Permian	9/3/2025	Phone conversation between Tumbler and Marathon to discuss pooling. Marathon: The "land team had to request that the asset team put the Goliath wells on the schedule." Wells are on the drill schedule for "Q1 2027." "I am reasonably confident that [Marathon] won't let the permits expire." Goliath wells are "discretionary wells" for Marathon. "Bad timing" with the COP/Marathon merger and pooling orders expiring.
Marathon Oil Permian	9/8/2025	Tumbler mails proposal clarification letter re: typo

REVISED SELF-AFFIRMED STATEMENT OF GEOLOGIST DYLAN COLLINS

I, Dylan Collins, do hereby state and affirm the following:

1. I am over the age of 18 and have the capacity to execute this statement, which is based on my personal knowledge.

2. I am a petroleum geologist employed as a geologist for Tumbler Operating Partners, LLC (“TOP”) and am familiar with the subject applications and geology involved.

3. This testimony is submitted in connection with the filing by TOP of the above-referenced compulsory pooling applications pursuant to 19.15.4.12(A)(1) NMAC.

4. I have not previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology matters. My education and work experience are reflected in my resume, appended hereto. I have worked on New Mexico oil and gas matters since 2018.

5. **Exhibit B-1** is a general location map indicating the location of the proposed horizontal spacing units (“HSU”).

Exhibit B

6. **Exhibits B-2.a through B-2.g** shows a series subsea structure maps depicting the hydrocarbon bearing intervals within the Bone Spring and Wolfcamp Formations, with a contour interval of 200 feet. The structure maps show the David spacing unit near a relatively flat to slightly bowl-shaped structure in the basinal center of the Northern Delaware Basin region. These maps also show the relative location of the proposed wells as dashed red lines, as well as offset producing wells as solid lines color coded by landing interval subsets. I do not observe any faulting, pinchouts, or other geologic discontinuities in the spacing unit.

7. **Exhibit B-3** is a stratigraphic cross section showing displaying open-hole logs run over the Bone Spring and Wolfcamp Formations from the wells denoted from A to A'. For each well in the cross-section, the exhibit shows at least the following logs: gamma ray, resistivity, and porosity. Relevant intervals are labeled and marked. The logs in the cross-section demonstrate continuity in the target intervals.

8. **Exhibit B-4** is a gunbarrel diagram depicting each well. These diagrams show the approximate landing zones in reference to the type log for the area and the associated spacing of the wellbores within the quarter-section width HSUs for the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) and the section width HSUs for the Wolfcamp formation (96776 Jabalina; Wolfcamp, Southwest).

9. **Exhibit B-5** is a gross isopach map and type log of the combined 3rd Bone Spring Sand (“3BSS”), Wolfcamp A (“WCA”) and Wolfcamp B (“WCB”). This map shows these intervals to be among the thickest in the Northern Delaware Basin. In this combined interval, there are no lithological or stress impediments to fracture height growth.

10. In my professional opinion, the interval highlighted in Exhibit B-5 is optimally developed with three landing zones that are spaced far enough apart vertically to allow fracture stimulations to minimally overlap.

11. I have reviewed the well proposals from Marathon Oil Permian, LLC (“MRO”). I believe the following to be true:

- a. Drilling four wells in the WCA is inadequate to develop the resources in that formation.
- b. Failure to develop the 3BSS at the same time as the WCA will significantly deteriorate the resource potential in the 3BSS due to the lack of a fracture stimulation barrier and Parent/Child well interference.
- c. Three wells in the 2nd Bone Spring Sand is insufficient to fully develop the resources in that interval.
- d. Drilling six wells in the 1st Bone Spring will result in a significant reduction in individual well performance in that formation due to its high permeability.

12. The measured depths and true vertical depths for each TOP well are approximately as follows:

13. Based on my geologic study of the area, I conclude the following:
- e. The horizontal spacing and proration units are justified from a geologic standpoint.
 - f. There are no structural impediments or faulting that will interfere with horizontal development.
 - g. Each quarter-quarter section in the Bone Springs HSUs will contribute more or less equally to production.
 - h. Each quarter section in the Wolfcamp HSU will contribute more or less equally to production.

- i. A south-to-north drilling orientation is appropriate to align the producing wellbore perpendicular to maximum horizontal stress (See Lund Snee, J.E. and M.D. Zoback, 2018; <https://doi.org/10.1190/tle37020127.1>).
14. The exhibits to this testimony were prepared by me or compiled from TOP's business records.
15. The granting of the Application is in the interests of conservation, the prevention of waste, and the protection of correlative rights.
16. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

Dylan Collins

Dylan Collins

Dallas, TX | 510-501-2507 | dycollins@gmail.com | www.linkedin.com/in/dylan-c-97869238
Geoscience Leader | Explorationist

Professional Summary

Dynamic geoscience executive with over a decade of leadership in upstream exploration, subsurface mapping, and resource development. **Proven track record of driving billion-dollar exploration programs**, delivering high-impact discoveries, and optimizing technical workflows across major U.S. basins. Adept at leading interdisciplinary teams, integrating advanced geoscience technologies, and aligning exploration strategies with corporate objectives.

Professional Experience

Yukon Exploration Operating

Chief Executive Officer | 2022 – Present

- Direct a multidisciplinary team overseeing technical, financial, operational, and legal functions for a high-growth exploration firm.
- **Raised and deployed \$65M** to acquire 13,000 leasehold acres, leading to *1,000 BOPD production and \$10M annual EBITDAX* through strategic horizontal drilling.
- **Identified and proved 40 Jo Mill Sand horizontal locations**, achieving *55% IRR and 3.4 MOIC*, demonstrating expertise in economic resource appraisal.
- Pioneered vertical well programs targeting Upper Spraberry and Dean formations, enhancing exploration upside.

Stronghold Investment Management

Petrotechnical Director | 2020 – Present

- **Lead a team of 10 engineers and geologists**, aligning subsurface analysis with investment goals across *\$600M in upstream royalty and working interest assets*.
- **Developed automation-assisted workflows** to create forecasting and geologic databases for all major U.S. onshore basins (Permian, Gulf Coast, Haynesville, etc.).

- Spearheaded technical underwriting and operational leadership for a water midstream portfolio, integrating geologic insights into business outcomes.
- Established a training program for technical staff, *fostering innovation and skill development*.

Senior Geologist | 2018 – 2020

- Served as VP of Geology for multiple portfolio companies (Cordero Energy, Junction Resource Partners, Yukon Exploration Partners):
 - Integrated engineering and geologic data to optimize well performance and guide acreage valuations.
 - **Appraised geologic potential** for exploratory step-outs and water resource development in the Midland Basin.
 - Planned horizontal well programs and partnered with Texas BEG QCL consortium to *enhance technical capabilities*.

Pioneer Natural Resources

Senior Geologist – Unconventional Appraisal and Development | 2012 – 2018

- **Led multi-zone appraisal and “Version 3.0” development optimization** for Wolfcamp Shale, *increasing section NPV by 130%* through targeting, spacing, and completion strategies.
- Mapped Lower Spraberry sandstone sequences and **leveraged machine learning** to create regional geologic potential maps, high-grading horizontal targets.
- Interpreted seismic data to define Permian carbonate stratigraphy, supporting water injection programs in the San Andres Formation.
- **Published two innovative technologies** in thermal maturity and development optimization, showcasing thought leadership.

United States Marine Corps

Infantry Leader | 2000 – 2010

- **Led high-stakes operations** in Iraq and Middle East, earning *Navy and Marine Corps Achievement Medal with Combat “V”* for tactical excellence.
 - Trained and mentored teams under pressure, honing *leadership and decision-making skills* transferable to corporate environments.
-

Education

M.S., Paleomagnetism & Structural Geology | University of Texas at Dallas | 2013

Thesis: *Magnetostratigraphy and rock magnetics of the Permian-Triassic red beds of the Palo Duro Basin, West Texas*

B.S., Engineering Geology (Summa cum Laude) | San Diego State University | 2009

Technical Skills

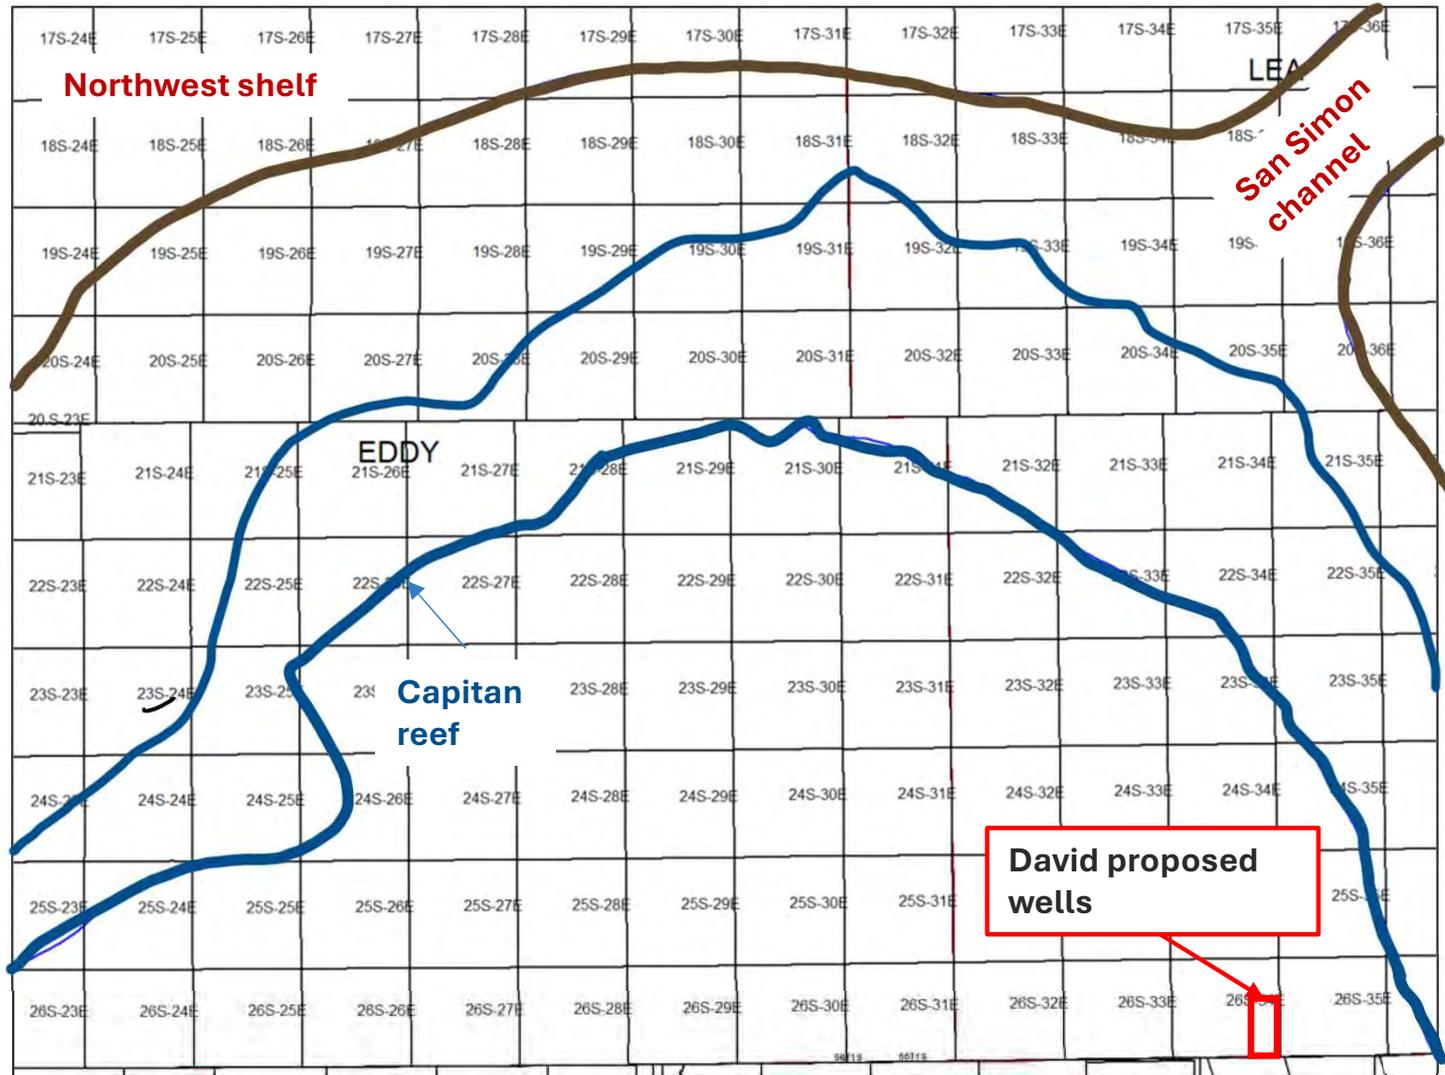

- **Geoscience Tools:** *Petra, Petrel, Kingdom, Paradigm, Transform, Spotfire*
 - **Expertise:** *Subsurface mapping, seismic interpretation, geocellular modeling, petrophysics, reservoir characterization, machine learning applications, exploration program design*
-

Selected Publications

- Waite, L., et al., 2020, *Detrital zircon provenance evidence for an early Permian longitudinal river flowing into the Midland Basin of west Texas*, International Geology Review.
- Collins, D.R., et al., 2015, *An Integrated Approach to Stimulated Reservoir Interpretations of the Permian Wolfcamp Shale*, URTEC.

SELF-AFFIRMED STATEMENT OF ENGINEER WALT BAKER

I, WALT BAKER, do hereby state and affirm the following:

1. I am over the age of 18 and have the capacity to execute this statement, which is based on my personal knowledge.
2. I am a Petroleum Engineer employed as Vice President with Tumbler Operating Partners, LLCC (“TOP”), and I am familiar with the subject applications and the lands involved.
3. This testimony is submitted in connection with the filing by TOP of the above-referenced compulsory pooling applications pursuant to 19.15.4.12(A)(1) NMAC.
4. I have not previously testified before the New Mexico Oil Conservation Division as an expert witness My education and work experience are reflected in my resume, appended hereto. I have worked on New Mexico oil and gas matters since 2017.
5. **David Unit Operations and Environmental Overview**

Exhibit C

1. As demonstrated on Exhibit C-1, Tumbler Operating's proposed development plan will result in only 37.84 acres of total surface disturbance. This limited footprint consists of 1.88 acres for roads (24-foot corridor), 22.04 acres for well pads, 11.48 acres for two centralized batteries, and 2.44 acres for bulk gathering lines (20-foot corridor). Collectively, this equates to just 2.37% of the Subject Lands. By confining operations to this small fraction of the acreage and strategically locating future well and battery pads in geographic areas with adequate existing infrastructure and takeaway capacity, Tumbler Operating will substantially minimize environmental impacts, preserve the vast majority of the surface undisturbed, and demonstrate a clear commitment to responsible and efficient development.

In addition, Tumbler Operating is committed to implementing enhanced safeguards to further reduce both operational and environmental risks. Tumbler Operating will invest to further reduce spill risk by:

- Installing lined containment around all equipment and pumps
- Equipping containment areas with berm switches to minimize spill potential
- Installing stainless steel piping in high-risk areas to reduce spill likelihood
- Adding pump seal leak detection to minimize the chance of leaks from water transfer pumps

Separation Equipment

- Flow from each well will be routed via flowline to a dedicated three-phase separator. Liquid retention times at expected maximum rates will exceed three minutes.

- Gas will be routed from the first-stage separator directly to sales.
- Hydrocarbon liquids will be discharged from the first-stage separator and commingled into one or more heater treaters.
- Flash gas from the heater treater(s) will either be sent to sales or routed to a compressor if sales line pressure exceeds the MAWP of the heater treater (125 psi).
- From the heater treaters, hydrocarbon liquids will be routed to storage tanks. Vapors from the tanks will be compressed by a Vapor Recovery Unit (VRU), if technically feasible, and sent either to sales or to a compressor if the sales line pressure exceeds the VRU's maximum discharge pressure (~150 psi).

These measures will significantly reduce the potential for spills and emissions while enhancing the overall environmental protection of the facilities.

6. Use of Recycled Water

Through established partnerships in water sourcing, treatment, and transfer, Tumbler Operating will employ existing infrastructure and utilize recycled produced water to meet the majority of water demand for completion activities within the David Unit Development Plan, as shown in Exhibit C-2.

7. David Unit Production Allocation and Commingling

As demonstrated on Exhibit C-3 and C-4. Tumbler Operating will file an application with the New Mexico Oil Conservation Division (NMOCD) and Bureau of Land Management (BLM) for approval of surface commingling of oil and gas production from facilities in the David Unit area. This request will include

both existing and future wells located within the same leases, communitization agreements, and pools identified in the application.

Gas Measurement:

- Each well will be equipped with a dedicated test separator and gas meter to record daily produced gas volumes.
- Each facility will include a sales-quality orifice meter (BLM-approved gas FMP or equivalent) to continuously measure and record total gas volumes prior to leaving the facility.

Oil Measurement:

- Each well will be equipped with a dedicated test separator and oil meter to record daily produced oil volumes.
- Each facility will include a Lease Automatic Custody Transfer (LACT) unit, which will continuously measure oil quality through BS&W testing and record gross volumes prior to leaving the facility.

Allocation of Production:

- Oil, gas, and water production will be allocated to individual wells by comparing gross sales volumes recorded at the LACT and facility gas meters with daily production data from well-level test separators.
- West Tank Battery:

EDUCATION

Colorado School of Mines

Master of Science, Petroleum Engineering

- Apache Corp. Fellowship and Scholarship

Golden, CO

Bachelor of Science, Petroleum Engineering

- ASI: Applied Mathematics

EXPERIENCE

Yukon Exploration Operating

Vice President of Operations

- Managed Northern Midland Basin position: +10,000 gross acres.
- Managed drilling, completions and production operations.
- Improved asset productivity by converting multiple SI wells to producers.

Dallas, TX

Feb 2025 – Present

Reliance Energy Partners

Partner and Engineer

- Secured approximately 3,000 net acres in Nebraska through farmout and cash deals.
- Developed field-wide development plans targeting the Lance (WY), Lansing (NE), and Red River (MT).
- Conducted reserve and production forecasting for developed and undeveloped assets.
- Evaluated acquisition opportunities across NE, KS, WY, MT, CO, and NV, with transaction values ranging from \$100,000 to \$50 million.

Colleyville, TX

Apr 2024 – Dec 2024

Matador Resources

Vice President and Asset Manager

Asset Manager

- Managed Northern Delaware position: 60,200 gross and 23,200 net acres; 35-40 MMBOE proved reserves.
- Increased daily production by over 200%, contributing to 65% of Matador's Q4 2023 growth and 20% YOY production growth.
- Led acquisition evaluations ranging from \$100,000 to \$1.5 billion and secured ~2,000 net acres in 2023 through diverse deal structures.
- Oversaw \$200 million in gross capital expenditure in 2023, delivering 17 wells with a 20% YOY improvement in average well EUR.
- Directed quarterly PDP and PUD forecast reviews and year-end inventory.
- Presented and aided in company-wide meetings, including quarterly board reviews, SEC filings, earnings calls, and annual prospect presentations.

Dallas, TX

Oct. 2022 – Dec. 2023

Nov. 2021 – Dec. 2023

Completions Engineer

- Managed one-third of completions operations and all Delaware Basin frac design initiatives.
- Improved efficiency with innovations such as mono-line systems and remote wellhead tech, achieving a 41% increase in daily pumping hours and a 45% increase in daily CLF.
- Acted as on-site frac supervisor & achieved +\$150,000 in Capex savings.

Nov. 2019 – Nov. 2021

Production Engineer

- Supervised a legacy field of 100+ vertical wells and executed workover and recompletion projects.
- Delivered 43 MBOE EUR through three re-completions, securing over 2,000 net acres.

Nov. 2018 – Nov. 2019

Operations Engineer (Drilling Group)

- Established and implemented a Real-Time Drilling and Geo-Steering Operations Center.
- Achieved 95% targeting efficiency through real-time geo-steering and directional monitoring.
- Reduced drilling costs by \$14.4 million through parameter optimization and dysfunction mitigation.

July 2017 – Nov. 2018

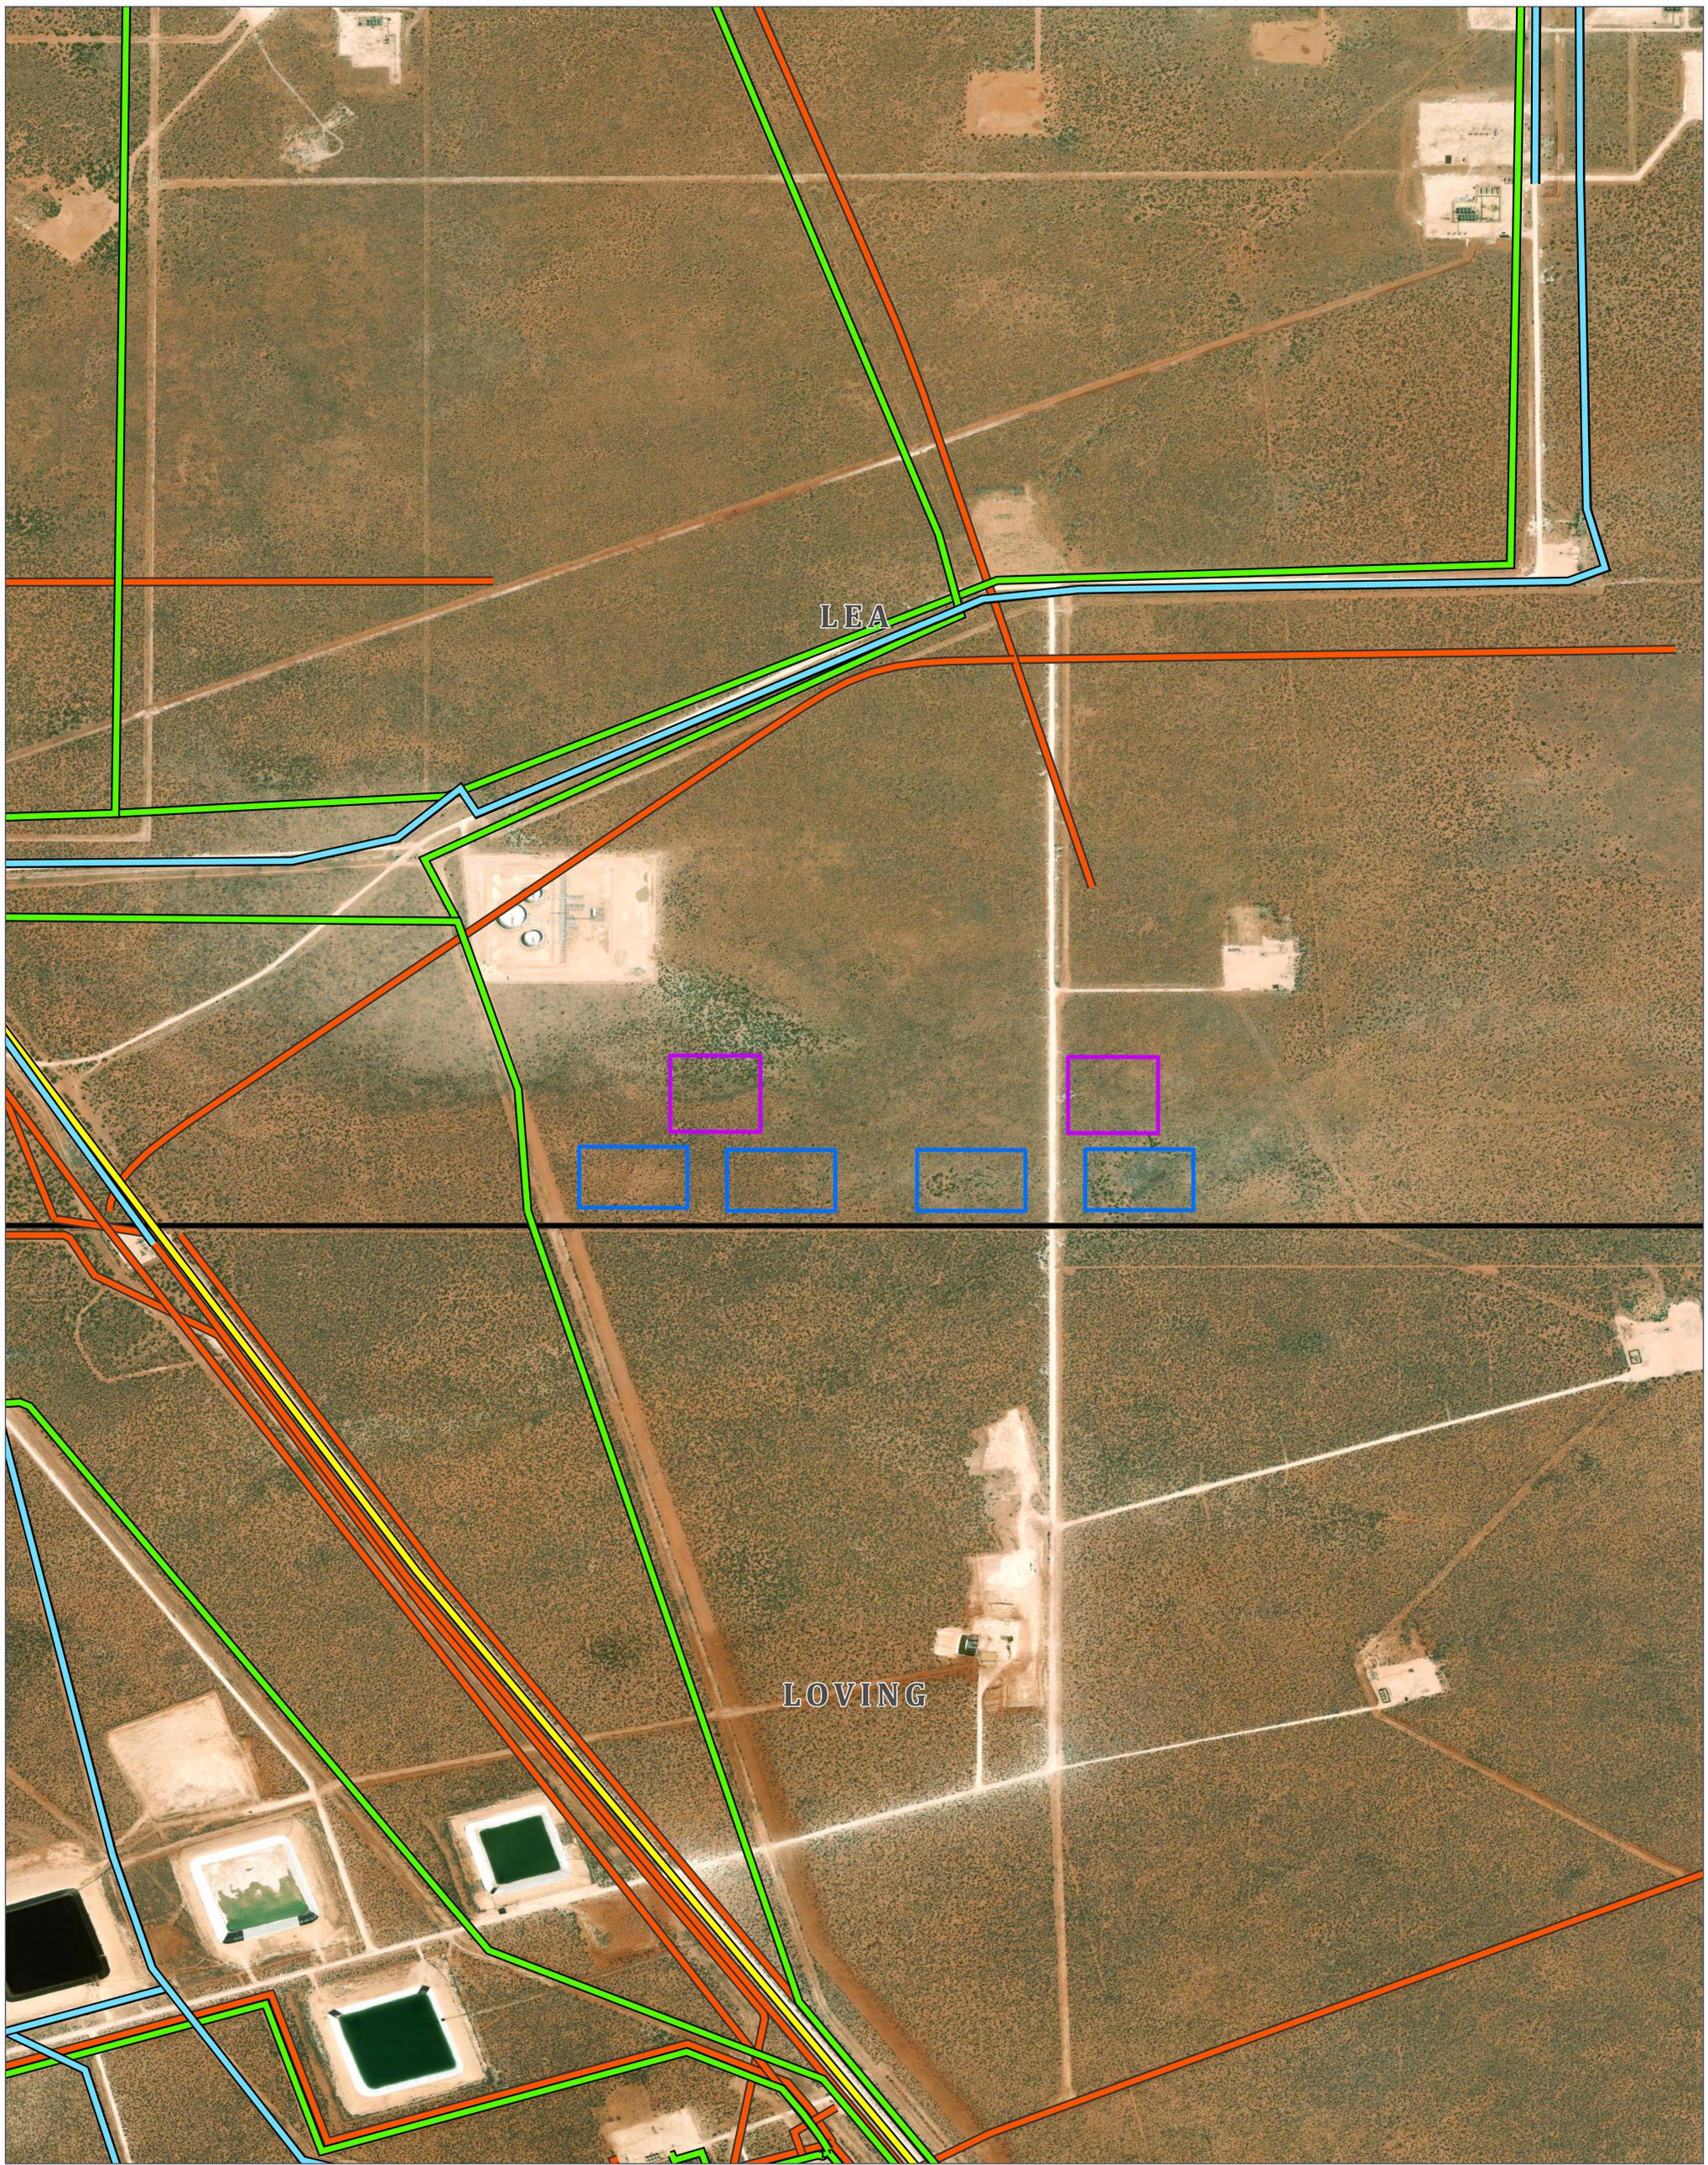

United States Coast Guard (Active Duty)

August 2004 – May 2011

Case Nos. 25541-25542

**REVISED SELF-AFFIRMED STATEMENT OF
ENGINEER CHRIS VILLARREAL, P.E.**

I, Christopher Villarreal, do hereby state and affirm the following:

1. I am over the age of 18 and have the capacity to execute this statement, which is based on my personal knowledge.
2. I am a petroleum engineer employed as Vice President with Tumbler Operating Partners, LLC (“TOP”), and I am familiar with the subject applications and the lands involved.
3. This testimony is submitted in connection with the filing by TOP of the above-referenced compulsory pooling applications pursuant to 19.15.4.12(A)(1) NMAC.
4. I have not previously testified before the New Mexico Oil Conservation Division as an expert witness. My education and work experience are reflected in my resume, appended hereto. I have worked on New Mexico oil and gas matters since 2015.
5. From an engineering perspective, TOP’s development plan is superior to the competing proposal of Marathon Oil Permian LLC (“Marathon”) for the following reasons:

Exhibit D

A. Wolfcamp A Development

Exhibit D-10 compares Tumbler's and Marathon's development plans. It shows that Marathon wastes recovery in the Wolfcamp A through ultra-wide 1,320' spacing, which yields only ~10% uplift in EURs. By contrast, TOP's proposed 880' spacing unlocks ~34% more recovery across the section. **Exhibit D-11.f** provides Tumbler's type curve support based on 26 offset wells co-developed with the Third Bone Spring Sand. **Exhibit D-12.c** demonstrates how Marathon's four-well per section plan delivers only marginal uplift compared to TOP's six-well per section plan.

B. Third Bone Spring Sand Co-Development

Even after underdeveloping the Wolfcamp A, Marathon bypasses the Third Bone Spring Sand, one of the strongest targets in the unit. This failure risks 15–40% productivity losses due to pressure interference. **Exhibit D-13 & Exhibit D-14** confirm the operator consensus that the Third Bone Spring Sand, Wolfcamp A, and Wolfcamp B act as a single flow unit and should be co-developed. **Exhibit B-5** shows the lack of a frac barrier between these zones, further supporting co-development.

C. Second Bone Spring Sand

Marathon spaces wells at >1,500', drilling only three across the unit. This results in ~25% lower recovery with no single-well uplift compared to the standard 1,320'

spacing. Tumbler's type curve support for the Second Bone Spring (**Exhibit D-11.c**) demonstrates a more efficient development approach.

D. Abandoned Reserves

Marathon ignores the Avalon and Third Bone Spring Carbonate formations, leaving behind almost 10 MMBOE. **Exhibit D-11.a** shows Avalon type curve EURs of 681 MBO and 4,390 MMcf, while **Exhibit D-11.d** shows Third Bone Spring Carbonate EURs of 600 MBO and 2,704 MMcf.

E. First Bone Spring Sand Overdevelopment

Marathon drills six wells in the First Bone Spring Sand, resulting in 25% degradation in EURs (**Exhibit D-12.a**). This equates to 4.5 wells for the cost of six, whereas Tumbler's four-well plan is both efficient and responsible.

F. Overall Resource Recovery and Economics

Marathon's 17-well Goliath plan recovers just 30 MMBOE, while TOP's 31-well David plan across seven formations recovers 53 MMBOE. As shown in **Exhibit D-2**, state and federal governments would receive \$335 million under TOP's plan compared to \$186 million under Marathon's. On an undiscounted basis, TOP's plan generates \$1.84 billion versus Marathon's \$1.07 billion.

G. Well Costs and AFE Reliability

Tumbler's well costs average \$1,062 per completed lateral foot, consistent with industry AFEs (**Exhibit D-7**). Marathon's AFEs at \$882 per foot are unreliable, especially given its own prior estimates of \$1,168–\$1,334 per foot just nine months earlier. Conoco's recent AFEs nearby averaged \$1,203 per foot, further undermining Marathon's claims. Independent AFEs from Matador and Devon confirm Tumbler's estimates are in line with industry practice.

H. Marathon's Lack of Commitment

Marathon has not committed to drilling its Goliath wells and merely indicated it will keep permits alive until 2027 (**Exhibit D-8**).¹ Without a schedule tied to contracts, Marathon's AFEs are speculative. By contrast, Tumbler's AFEs are anchored in near-term drilling and current vendor pricing.

6. Marathon's proposed COPAS overhead rates are excessive and reflect an oversized corporate structure in contrast to the disciplined and efficient approach offered by Tumbler. Marathon seeks to charge \$19,134 per month for drilling and \$1,913 per month for producing—nearly double Tumbler's proposed rates of \$10,000 and \$1,000, respectively. With 17 wells planned, Marathon's inflated overhead would impose unnecessary costs on the venture without delivering proportional operational benefits. Tumbler's lean structure ensures overhead remains aligned with industry norms, demonstrating both efficiency and fiscal responsibility. This disparity

¹ Exhibit D-9 was excluded at hearing

underscores Tumbler's ability to manage operations effectively while preserving value for all interest owners.

7. Tumbler does not question Marathon's ability to drill its wells. The issue before the Commission is whether Tumbler has the capability to execute.

- A. Operations will be led by me, a licensed professional engineer. I oversaw three years of safe and responsibly executed drilling, completions, and production in Matador's West Texas and South Texas assets, and I was closely involved in planning Matador's State Line development. I have spent countless days and nights on location in New Mexico as the engineer responsible for drilling operations.
- B. Supporting me is Walt Baker, a petroleum engineer with a B.S. and M.S. from the Colorado School of Mines and more than ten years of experience. At Matador, he spent 4.5 years designing and running completions and over two years managing Northern Eddy operations. He will directly supervise Tumbler's operations.
- C. Land and regulatory will be managed by Nick Weeks, an attorney and Landman with nearly 15 years of experience, including 7.5 years at Matador, where he oversaw all land requirements for drilling and operations in New Mexico.
- D. For permitting, we will partner with Permits West, widely regarded as the basin's leading expert in federal permits. Their team has a proven record of securing APD

approvals efficiently and on schedule. They understand the mandate that once the order is granted, execution must move at warp speed.

- E. Marathon's own statements further confirm their lack of commitment. When questioned, they dismissed their operator responsibilities, stating that they had no *spud date yet* and that either way, they would *need to re-apply for pooling*. They also admitted that Goliath holds no development priority, conceding that the *wells are discretionary for them* and that the *land team had to ask for to be added after Tumbler filed for pooling*.
- F. Perhaps most troubling, Marathon expressed surprise that Tumbler would expect them to do what they had previously represented to the Commission—namely, to develop wells within the unit. Taken together, these statements demonstrate that Marathon has no intention of fulfilling its obligations as operator of the Goliath unit.
- G. Despite repeated obstacles, Tumbler has consistently offered solutions and support to Marathon, even when those efforts were met with dismissal, as documented in **Exhibit D-5 (Revised)**.² On numerous occasions, Marathon refused to attend meetings intended to discuss development, choosing instead to hold the acreage without action.
- H. In good faith, Tumbler proposed multiple avenues to advance development. These included offering to allocate interest to Marathon at no cost in exchange for

² Exhibits D-3 and D-4 were excluded at hearing.

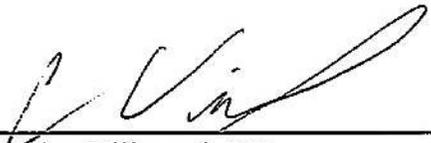

development, selling overriding royalty interests at cost, providing a drilling rig under the Tumbler banner while allowing Marathon effective operational control, proposing an outright purchase of Marathon's interest, and ultimately, suggesting a trade. Yet, after each effort, Marathon declined. Most tellingly, when Tumbler attempted to outline a potential trade, Marathon rejected even this final olive branch.

- I. **Exhibit D-6** raises serious concerns about Marathon's willingness to meaningfully evaluate and allocate resources toward the development of the Goliath unit. Within just two months, Marathon circulated four different versions of AFEs. This pattern reflects a clear lack of diligence and seriousness in advancing the project.
 - J. Their disinterest was evident from the outset. The first AFE submission was little more than a copy-and-paste exercise, with the letter blanketed with the wrong well names. Subsequent versions brought repeated edits, shifting wells, and changing names—issues that should have been resolved before presenting new proposals, let alone issuing them nearly every other week. Such conduct is not consistent with that of an operator committed to responsibly developing a pooled unit. Rather, it underscores Marathon's lack of genuine intent to pursue this project.
8. The exhibits attached hereto were prepared by me or compiled from TOP's business records under my supervision.

9. The granting of TOP's applications is in the interests of conservation, the prevention of waste, and the protection of correlative rights.

10. The foregoing is correct and complete to the best of my knowledge and belief.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

Christopher Villarreal, P.E.

Professional Experience

Stronghold Investment Management, Dallas **2024 - Present**

Private equity firm focused on trading real assets, primarily oil and gas interests, using proprietary non-commercial software to value interests and chain title

EVP Investments & Operations [2024-Present]

- Oversaw all financial & engineering modeling, valuations, offers, and investments for \$150 million of transactions, \$700 million of assets, and over 3,000 offers
- Managed all Land, Investments, Brokers, Legal, Reservoir Engineering, portfolio companies, India operations, HR, and IT for the Firm, encompassing over 130+ personnel
- Started Bangalore, India operations and grew to 90+ staff members across all disciplines in 18 months
- Technical subject matter expert for re-development of reservoir engineer valuation & workflow components of Firm's proprietary software, Insights

Bain and Company, Dallas and Austin **2021 - 2024**

Top-tier global strategy consulting firm

Manager [2023-2024]; **Consultant** [2021-23]

- Led team to co-create solutions with the upstream business unit leaders of a major oil company to close the forecasted gap to a Return on Capital Employed (ROCE) target; solutions included dramatic OPEX reductions across the Permian, pulling forward DUCs, aggressively pursuing JVs in targeted areas, basin-scale A&D, and revising development plans across select South American assets
- Managed team working with the downstream & chemicals business units of the same oil company to identify ROCE accretive initiatives and map a path to execution; solutions included op model redesign, supply chain transformation, and revisions to the capital allocation management process

Matador Resources Company, Dallas **2015 - 2021**

US energy company engaged in unconventional plays in the Delaware Basin in Southeast New Mexico and West Texas, as well as in the Eagle Ford Shale in South Texas and the Haynesville Shale in Northwest Louisiana

Vice President and West Texas Asset Manager **2019 - 2021**

- Led a seven-member technical and support team responsible for the development of 15,000 acres in the company's core position in the Permian's Delaware Basin
- Served with the two other Permian asset managers and the finance team following the 2020 oil price collapse to transform the company's operational plans—moved from operating six to three drilling rigs for a 50% capital expenditure reduction, from \$720 million to \$365 million, while still meeting operational objectives

Asset Manager—South Texas, North Louisiana, and Non-Operated Wells **2018 - 2019**

- Led a seven-member team of contract negotiators, engineers, analysts, and accountants responsible for assets that produced approximately 25% of the company's total daily hydrocarbons
- Managed the planning and execution of a \$60 million, nine horizontal oil well drilling program in South Texas
- Oversaw \$65 million of capital expenditures for non-operated wells, the evaluation of 90+ new well proposals from partners, and approximately \$14 million of yearly operating expenses

Recompletion Team Leader **2017 – 2018**

- Led a team of three engineers and a contract negotiator to assess the economic, technical, and contractual standings of the company's 200+ vintage vertical wells in the Delaware Basin
- Planned and executed remedial operations and critical work to maintain the company's contractual interests, evaluate new geologic targets, test new equipment technology, and increase hydrocarbon production

Petrophysical and Field Operations Engineer **2015 – 2017**

- Designed physics-based models and workflows with a senior engineer to interpret well-log tool readings to describe lithology, identify hydrocarbon zones, and examine over-pressured regions.
- Engineer-in-training role on drilling rigs in Southeast New Mexico and West Texas for hands-on learning of petroleum engineering principles and operational logistics

U.S. Army, Infantry, Georgia, Washington, Afghanistan

2009 - 2014

Stryker Infantry Platoon Leader (PL), Security Detail PL, & Reconnaissance PL

- Held three infantry platoon leader positions during both training and combat deployments to Afghanistan; responsible for the planning, readiness, and tactical employment of the 25-40 man units

Education

Rice University, Master of Business Administration

2021

Texas A&M University, Master of Science, Petroleum Engineering

2016

United States Military Academy, West Point, Bachelor of Science, Civil Engineering

2009

Certifications

- Licensed Professional Engineer (petroleum), TX# 133906
- Petroleum Land Management, Midland College, 2018
- U.S. Army: Ranger School, Survival Evasion Resistance & Escape (SERE-C), Pathfinder, Airborne, Expert Infantryman Badge, Combat Infantryman Badge

Awards

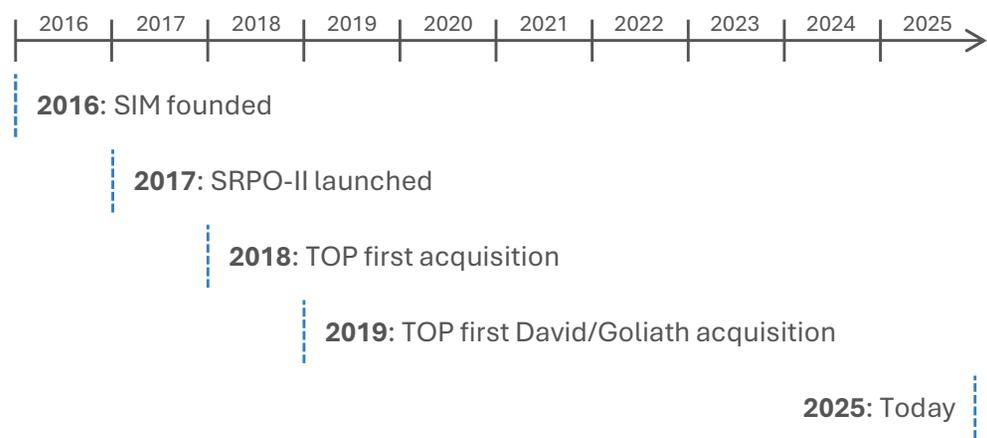

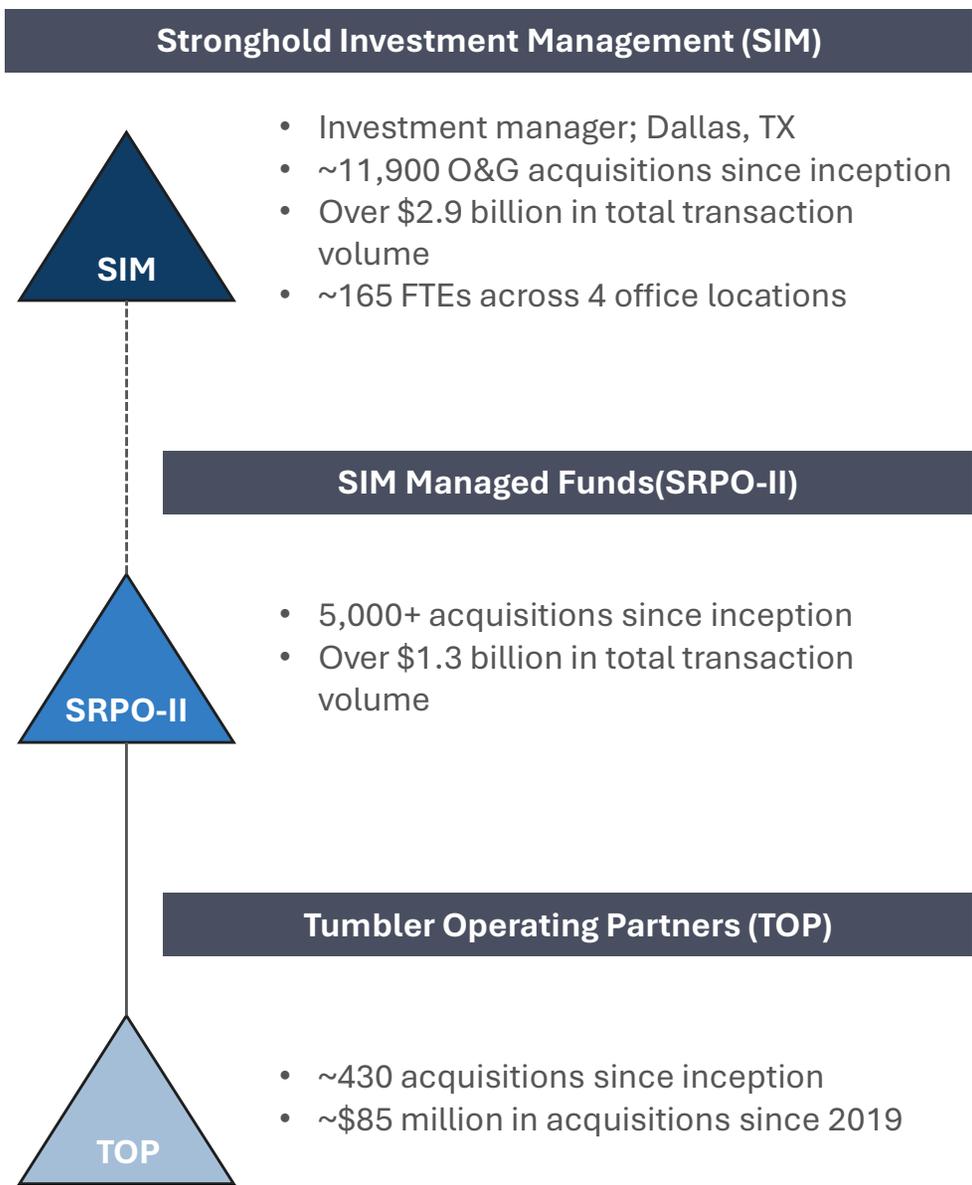

- Bronze Star Medal, U.S. Army, 2013
- Ranger School Officer Leadership Award, Class 04-10, U.S. Army, 2010
- Commandant's Award for civil engineering capstone project, West Point, 2009

Interests

- Kettlebells
- Marathons: Dallas, Marine Corps, Long Island x2, NYC, El Cruce Argentina
- Afghan refugee support: Ground Ops Coordinator for NGO tasked with extracting Afghan ally commandos and interpreters being left behind during US withdrawal; North Carolina, August-September 2021

Investments

Tumbler-Stronghold Relationship

Deep Operational Experience

 Chris Villarreal, P.E. <i>EVP Investments & Ops Petroleum Engineer 10+ years</i> 	 Dylan Collins <i>Petrotechnical Director Geologist 13+ years</i> 
 Nick Weeks <i>SVP Legal, Title, & Regulatory Landman 14+ yrs</i> 	 Walt Baker <i>VP Operations Petroleum Engineer 10+ years</i> 
 Dhruv Patel <i>Reservoir Engineering Mgr. Petroleum Engineer 5+ yrs</i> 	<p>Planned, evaluated, drilled, and completed 100s of wells across the team</p>

TOP's plan more fully captures recoverable reserves and aligns with the Commission's mandate to prevent waste.

Operator	Tumbler Operating Partners, LLC	Marathon Oil Permian, LLC
Proposed Development	Avalon x4 Bone Spring x16 Wolfcamp x11	Avalon x0 Bone Spring x9 Wolfcamp x8
Recoverable Oil (Mbbbl)	1,183 per well 36,673 total	1,198 per well 20,364 total
Recoverable Gas (Mmcf)	2,201 per well 68,237 total	2,285 per well 38,845 total
Recoverable BOE (MBOE)	1,550 per well 48,046 total	1,579 per well 26,838 total
Total CapEx Spend (\$MM)	\$411	\$187

Federal Revenue, 10.13% NRI (\$MM)	\$255	\$142
Private Revenue, 86.71% NRI (\$MM)	\$2,183	\$1,217
Total Revenue (\$MM)	\$2,518	\$1,404
Total Revenue by YE 2026 (\$MM)	\$30	\$0
Total Revenue by YE 2027 (\$MM)	\$465	\$0
Total Revenue by YE 2028 (\$MM)	\$844	\$269

\$149MM more public revenue with TOP's plan (80% increase)

MRO's plan leaves nearly \$1 billion in private revenue unrealized.

\$575 million more flowing into the US economy by YE 2028 with TOP!

Note: ConocoPhillips (COP) completed the acquisition of Marathon Oil Corporation in November 2024; table assumes \$65 / Bbl and \$3.75 / Mcf flat commodity pricing; As of September 2025

MRO's lack of substantive engagement demonstrates a lack of commitment to development or deals at Goliath

Email exchanges from March 2024 – June 2025 reveal despite Tumbler's outreach and incentives, MRO repeatedly deferred, declined, and avoided engagement on Goliath development.

Refusal to Engage

From: C. Frederick (COP)
To: Chris Villarreal, P.E. (TOP)

Canceling meetings & then not responding to requests to keep on calendar (1/22/25 & 1/23/2025)

Decline meeting requests, offer to reply over email, and then not responding to questions about timing or Tumbler requests to discuss trades (3/25/2025 – 3/27/2025)

Holding Stakeholders Hostage

From: C. Frederick (COP)
To: Chris Villarreal, P.E. (TOP)

Stating it won't be developed in 2025 and there is no visibility past the end of the year (3/3/2025)

[S. Miller, In a breakfast meeting with TOP]

Stating that they can only commit to work to not let permits expire in 2027 (6/10/2025)

Deprioritizing Assets

From: S. Miller (COP)
To: Chris Villarreal, P.E. (TOP)

Stating that their large portfolio and capital allocation drives reason that Goliath is not being developed (3/31/2025)

Deal Dismissals

From: S. Miller (COP)
To: Chris Villarreal, P.E. (TOP)

After given specific non-op tracts, stating they don't have time to do a trade (4/9/2025)

TOP Initiatives

TOP's pursuit of timely development stands in clear contrast to MRO's failure to execute.

- **Proposing the allocation of interest to MRO at no cost** in exchange for drilling Goliath wells
- **Offered to sell overrides at cost** to bolster COP's NRI to incentivize development
- **Offered to pick up a drilling rig** under the Tumbler banner with COP overseeing operations
- **Proposing outright purchases of MRO's interests**
- **Initiating trade discussions** for TOP to trade out of Unit
- **Proposing 31 – 2.5 mile horizontal development plan operated by TOP designed to generate** accretive value for all stakeholders including MRO

MRO's series of AFE revisions points towards unfamiliarity with the Goliath asset internally

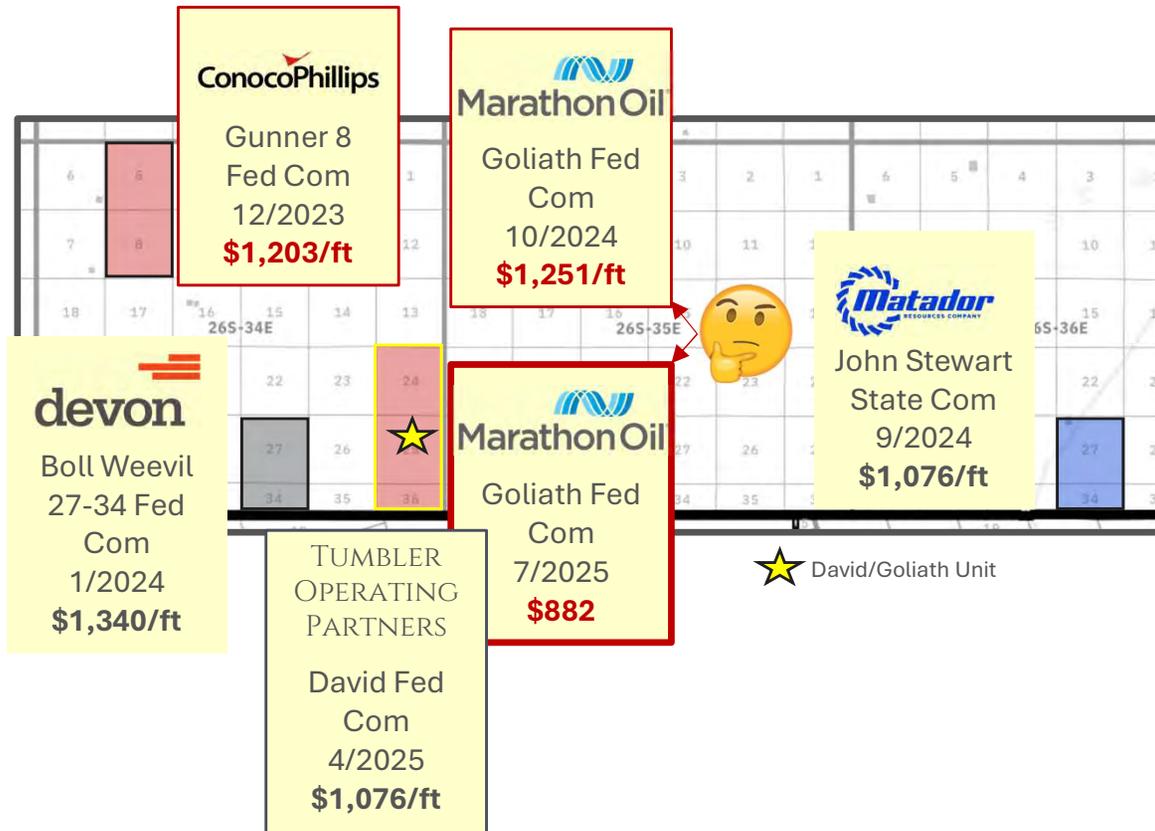

MRO has sent across multiple iterations of well proposals with election errors, missing AFEs, and incoherent changes

Version 1 - 7/9/2025		Version 2 - 7/10/2025	Version 3 - 7/24/2025		Version 4 - 8/25/2025		Pooling Order

MRO's continual restatements raise questions about the level of focus on Goliath

TOP's AFEs align with data from E&P peers, while MRO's deviate from their own and others

Recent AFEs presented to the Commission and COP's previous Goliath AFEs raise concerns about the reliability of COP's current Goliath AFEs

Multiple indicators point towards likelihood of MRO's AFE costs not to materialize

- MRO submitted **counter-AFEs over two months after** receiving Tumbler's David AFE
- MROs **current Goliath AFEs are ~30% lower than its own Goliath AFEs** sent less than a year ago
- **COP's own Gunner 8 Fed Com AFEs** (12/2023) were **36% higher** than the AFEs it now presents
- In nearby units presented to the Commission, **Matador and Devon AFEs expose the unreliability of MRO's numbers**
- By contrast, **Tumbler's AFEs align with peer data** and even with COP's own prior Goliath AFEs

MRO's pricing reliability diminishes given their stated potential development to occur far into the future

Tumbler AFEs grounded in actual vendor pricing for near term execution

Marathon cannot accurately price D&C costs for hypothetical wells 2+ years out

Future prices are a giant question mark:

*“U.S. core inflation expected to push higher... with the expectation to remain sticky”
-JPMorgan, June 2025*

Policy swings inducing price volatility:

*“Tariffs Give U.S. Steelmakers a Green Light to Lift Prices”
- WSJ, Feb 2025*

Note: ConocoPhillips completed the acquisition of Marathon Oil Corporation in November 2024

3BS Carb	-	-	-	-	-
3BS Sand	-	-	-	-	-
WCA	4	1,413	2,016	1,749	6,994
WCB	4	1,273	2,321	1,659	6,638
Total	17	5,019	12,381	7,082	29,612

Note: Single well and total EURs are P50 estimates based on analog production in comparable geology/rock quality around the David/Goliath unit location; ConocoPhillips completed the acquisition of Marathon Oil Corporation in November 2024

TOP to Deliver Nearly Double the Recovery

- TOP's David Unit (31 wells) projected to recover 52.9 MMBOE
- COP's Goliath Unit (17 wells) expected to recover only 29.6 MMBOE
- TOP's plan yields nearly 2x the total recovery

COP's Goliath Unit plan risks significant waste and sub-optimal reserves development

Wasting Potential Recovery in Wolfcamp A

- COP's ultra-wide 1,320' spacing in Wolfcamp A yields only ~10% uplift in well EURs
- Standard 880' spacing would unlock ~34% more recovery across the section

Ignoring Co-Development Punishes 3rd Bone Spring Potential

- COP fails to co-develop Bone Spring 3rd Sand with Wolfcamp A
- This risks 15–40% productivity losses in future Bone Spring wells due to pressure interference

Under Developing 2nd Bone Spring Sand

- COP spaces >1,500', drilling just 3 wells across the unit
- Results in ~25% lower recovery, with no single-well uplift versus standard 1,320' spacing

Abandoning Proven Reserves

- COP neglects the Avalon and 3rd Bone Spring Carbonate formations
- Leaving behind ~9.9 MMBOE of recoverable reserves

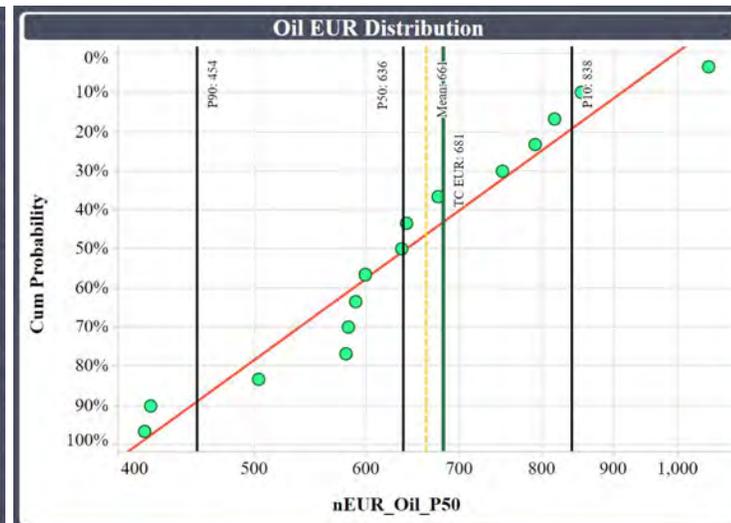

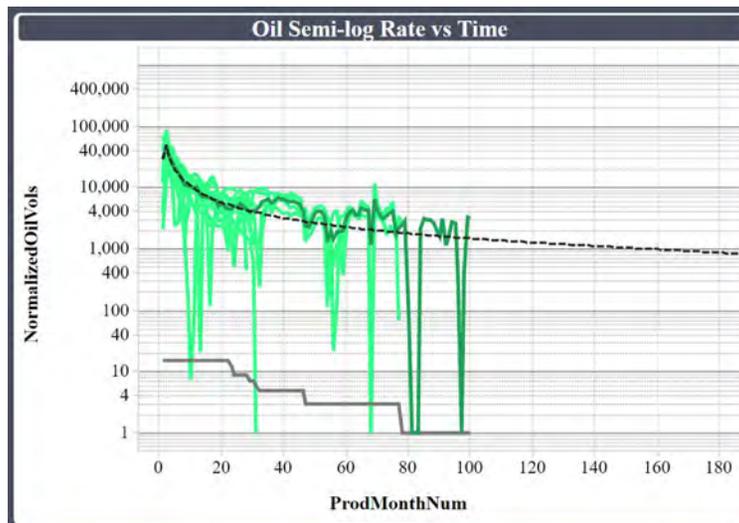

10,000' Normalized Type Curve: David Unit, Avalon

Type Curve Summary

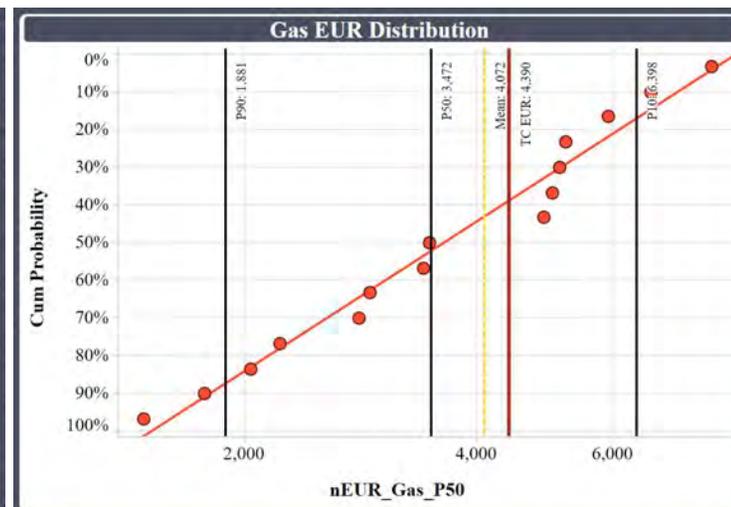

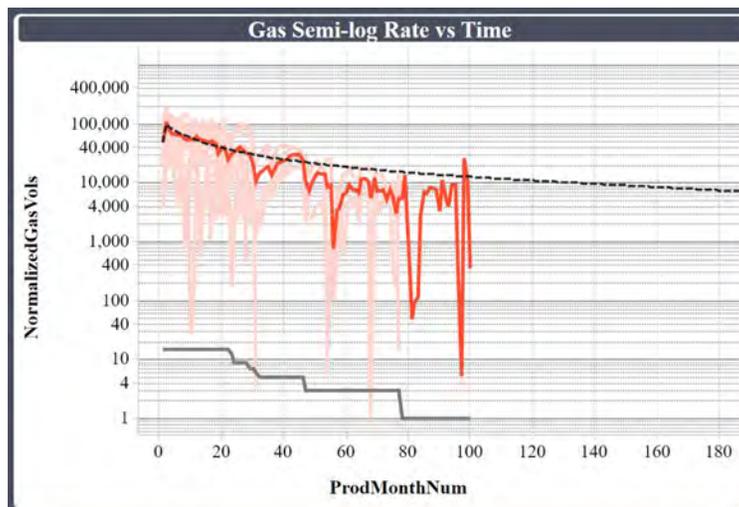

- Avalon type curves are generated using 15 offset wells that are within 15 miles radius of David Unit and started production 01/2017 or after
- All type curve offset wells are completed using 2250-2750 ppf and 40-60 bbl/ft and are spaced at > 1,000' in-zone spacing and targeting the Upper Avalon
- Production data was normalized to 10,000' lateral length and the type curve was generated by projecting the average of offsets

Parameters	Statistics
Oil EUR (MBO)	681
Gas EUR (MMcf)	4,390
Lateral Length (ft)	10,000'
Offset Spacing (ft)	1,320'
Water Cut (%)	70%

Avalon - Oil Type Curve

Avalon - Gas Type Curve

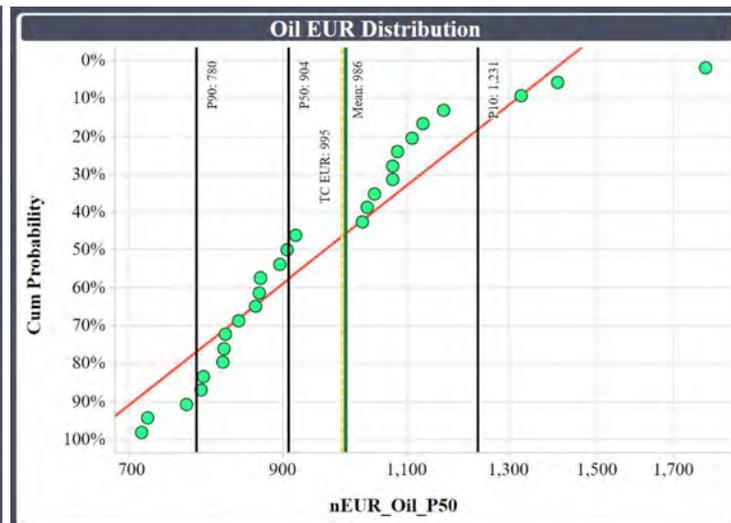

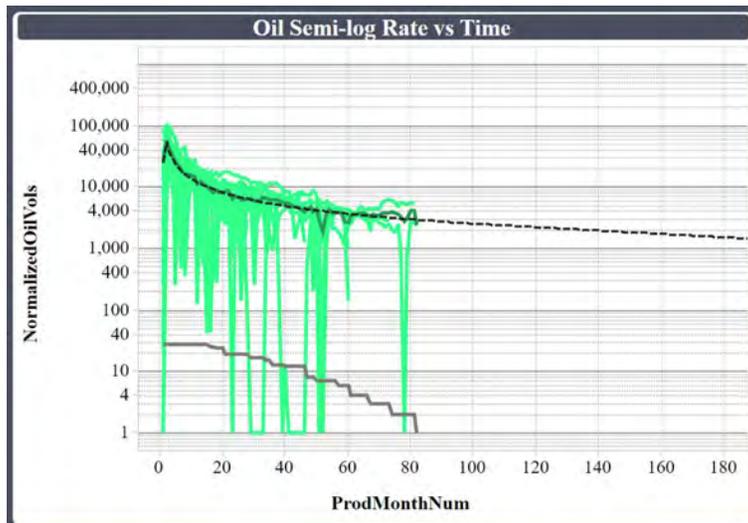

Offset wells are operated by prudent operators such as EOG and Permian Resources

10,000' Normalized Type Curve: David Unit, 1st Bone Spring Sand

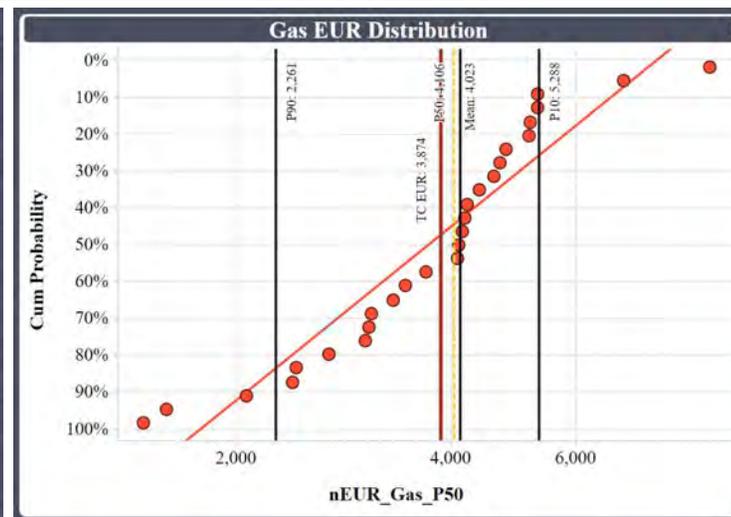

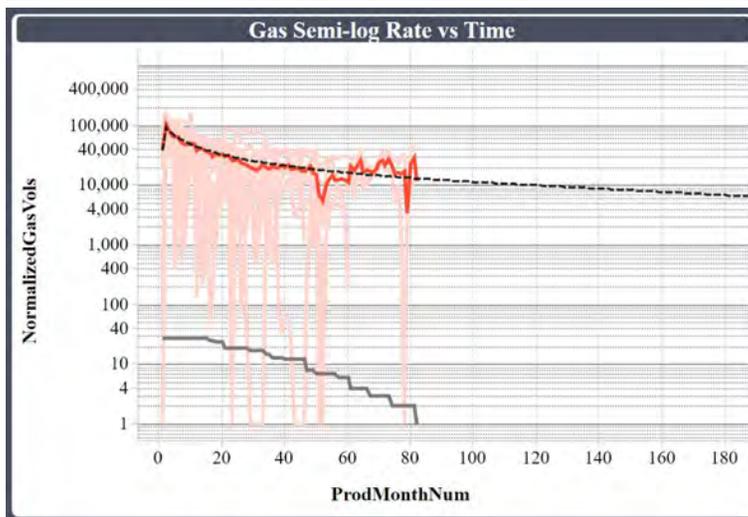

Type Curve Summary

- Bone Spring 1st Sand type curves are generated using 27 offset wells that are within 15 miles radius of David Unit and started production 01/2018 or after
- All type curve offset wells are completed using 2250-2750 ppf and 40-60 bbl/ft and are spaced at >1,000' in-zone spacing
- Production data was normalized to 10,000' lateral length and the type curve was generated by projecting the average of offsets, matching Mean EUR

Bone Spring 1st Sand - Oil Type Curve

Bone Spring 1st Sand - Gas Type Curve

Parameters	Statistics
Oil EUR (MBO)	995
Gas EUR (MMcf)	3,784
Lateral Length (ft)	10,000'
Offset Spacing (ft)	1,320'
Water Cut %	65%

Offset wells are operated by prudent operators such as EOG, Matador, Civitas, Permian Resources and Devon

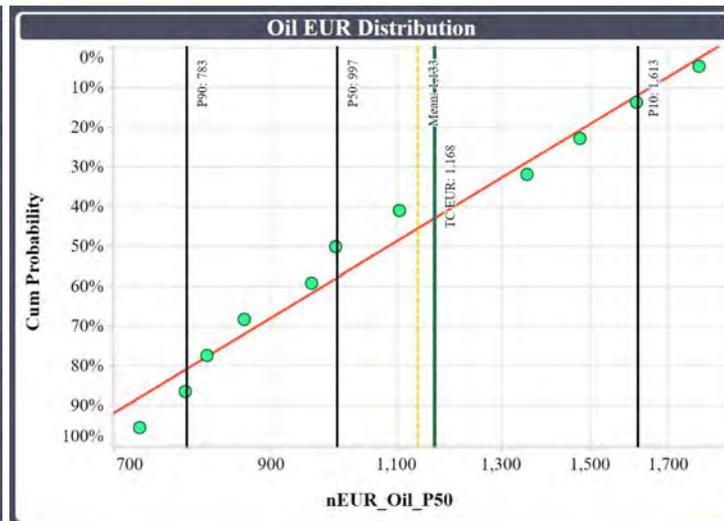

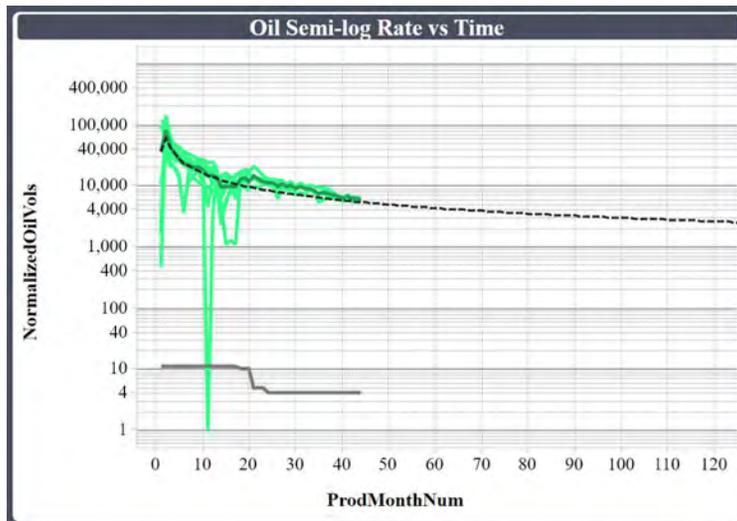

10,000' Normalized Type Curve: David Unit, 2nd Bone Spring Sand

Type Curve Summary

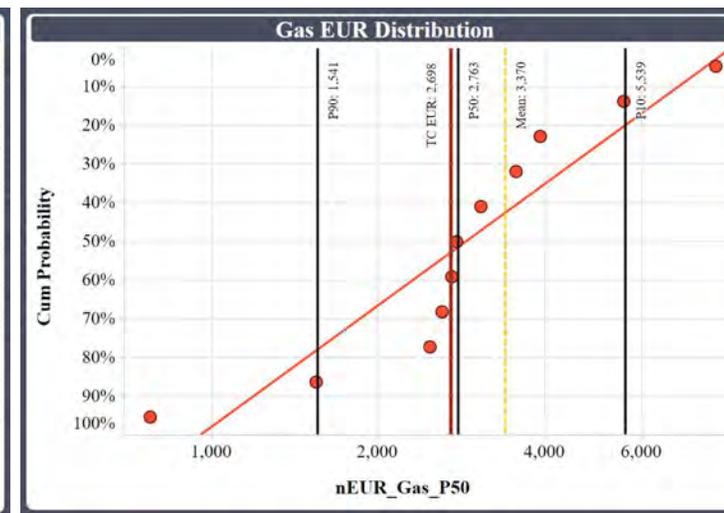

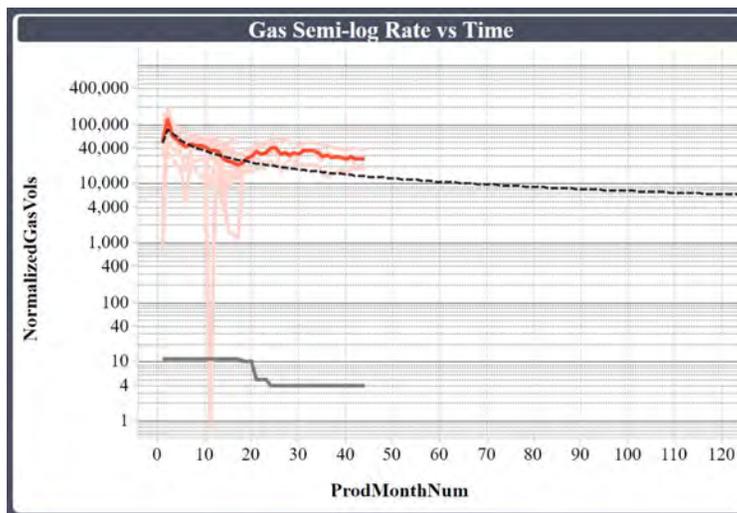

- Bone Spring 2nd Sand type curves are generated using 12 offset wells that are within 15 miles radius of David Unit and started production 01/2017 or after
- All type curve offset wells are completed using 2250-2750 ppf and 40-60 bbl/ft and are spaced at > 1,000' in-zone spacing
- Production data was normalized to 10,000' lateral length and the type curve was generated by projecting the average of offsets
- Spacing wells wider than 1320' does not provide any uplift to single well EURs as shown on the EUR vs spacing plot

Parameters	Statistics
Oil EUR (MBO)	1,168
Gas EUR (MMcf)	2,698
Lateral Length (ft)	10,000'
Offset Spacing (ft)	1,320'
Water Cut (%)	55%

Bone Spring 2nd Sand - Oil Type Curve

Bone Spring 2nd Sand - Gas Type Curve

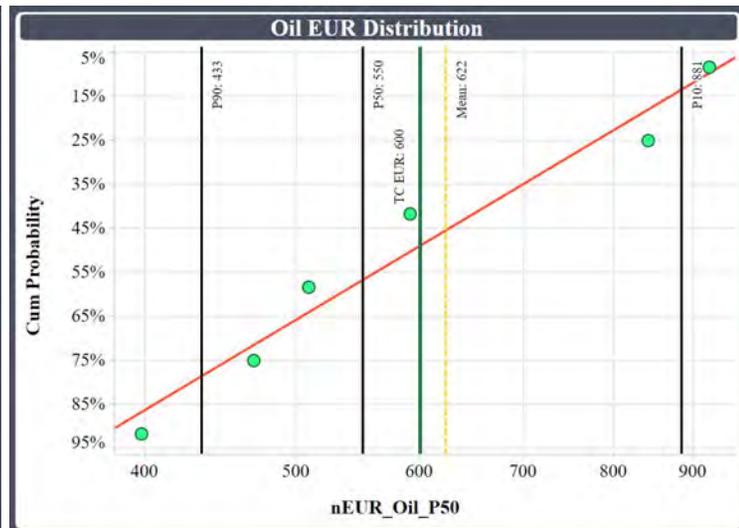

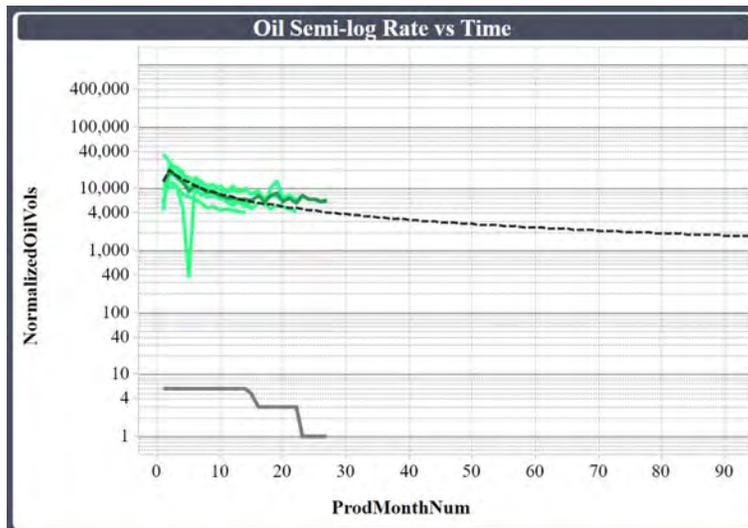

Offset wells are operated by prudent operators such as EOG, Matador, Civitas, Permian Resources and Devon

10,000' Normalized Type Curve: David Unit, 3rd Bone Spring Carb

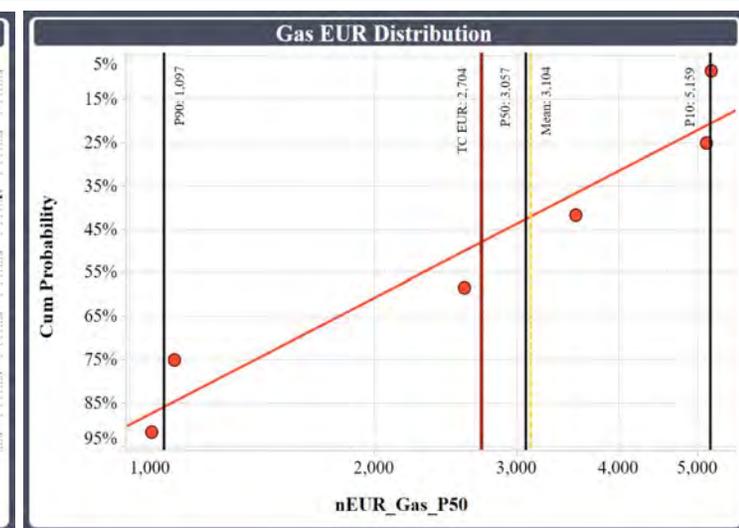

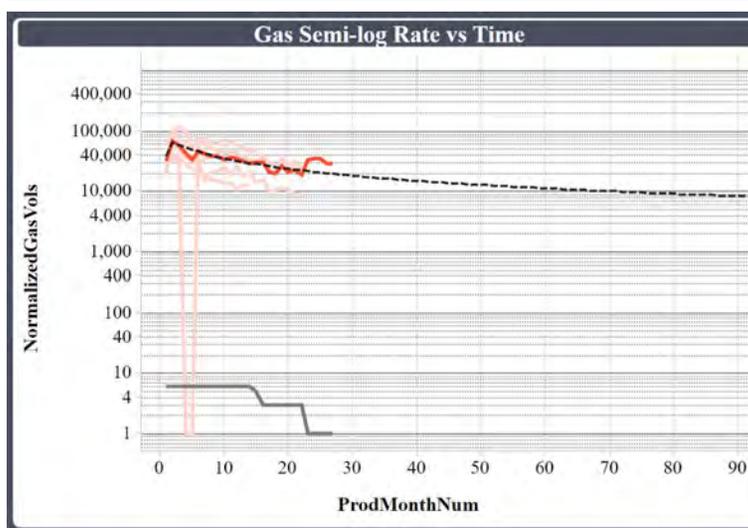

Type Curve Summary

- Bone Spring 3rd Carb type curves are generated using 6 offset wells that are within 15 miles radius of David Unit and started production 01/2023 or after
- All type curve offset wells are completed using 2250-2750 ppf and 40-60 bbl/ft and are spaced at > 1,300' in-zone spacing
- Production data was normalized to 10,000' lateral length and the type curve was generated by projecting the average of offsets
- A total of 64 Bone Spring 3rd Carb wells have been drilled since 2021 within a 15 mile radius of the David Unit – significant activity provides increased confidence in co-developing this target

Lateral Length (ft)	10,000'
Offset Spacing (ft)	1056'
Water Cut (%)	80%

Offset wells are operated by prudent operators such as EOG, Matador, Devon and Tap Rock

1st Bone Spring Sand – EUR vs Spacing

At least 25% degradation in single well EURs expected at 6 wps relative to 4 wps offset spacing; poor incremental section EUR ~620 MBOE20 by drilling 2 additional wells

David Unit 1st Bone Spring Sand 4 wps TC
EUR ~1,180 MBOE20
(Section EUR ~ 4,720 MBOE20)

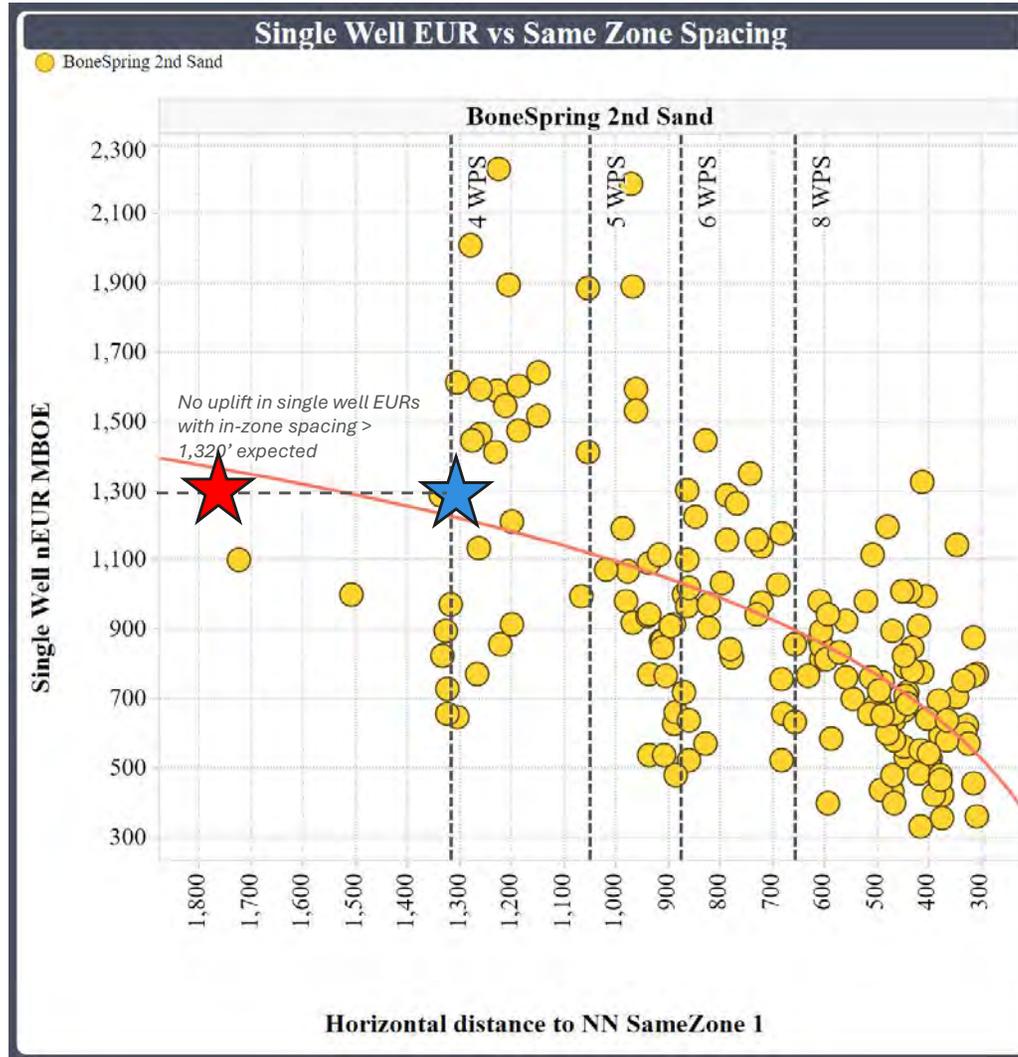

Goliath Unit 1st Bone Spring Sand 6 wps TC
EUR ~890 MBOE20
(Section EUR ~ 5,340 MBOE20)

Bone Spring 1st Sand offset wells within 15 miles radius of David Unit selected to perform above analysis

2nd Bone Spring Sand – EUR vs Spacing

No single well EUR uplift anticipated if Bone Spring 2nd Sand wells are spaced wider than 1,320'

David Unit 2nd Bone Spring Sand TC EUR ~1300 MBOE20

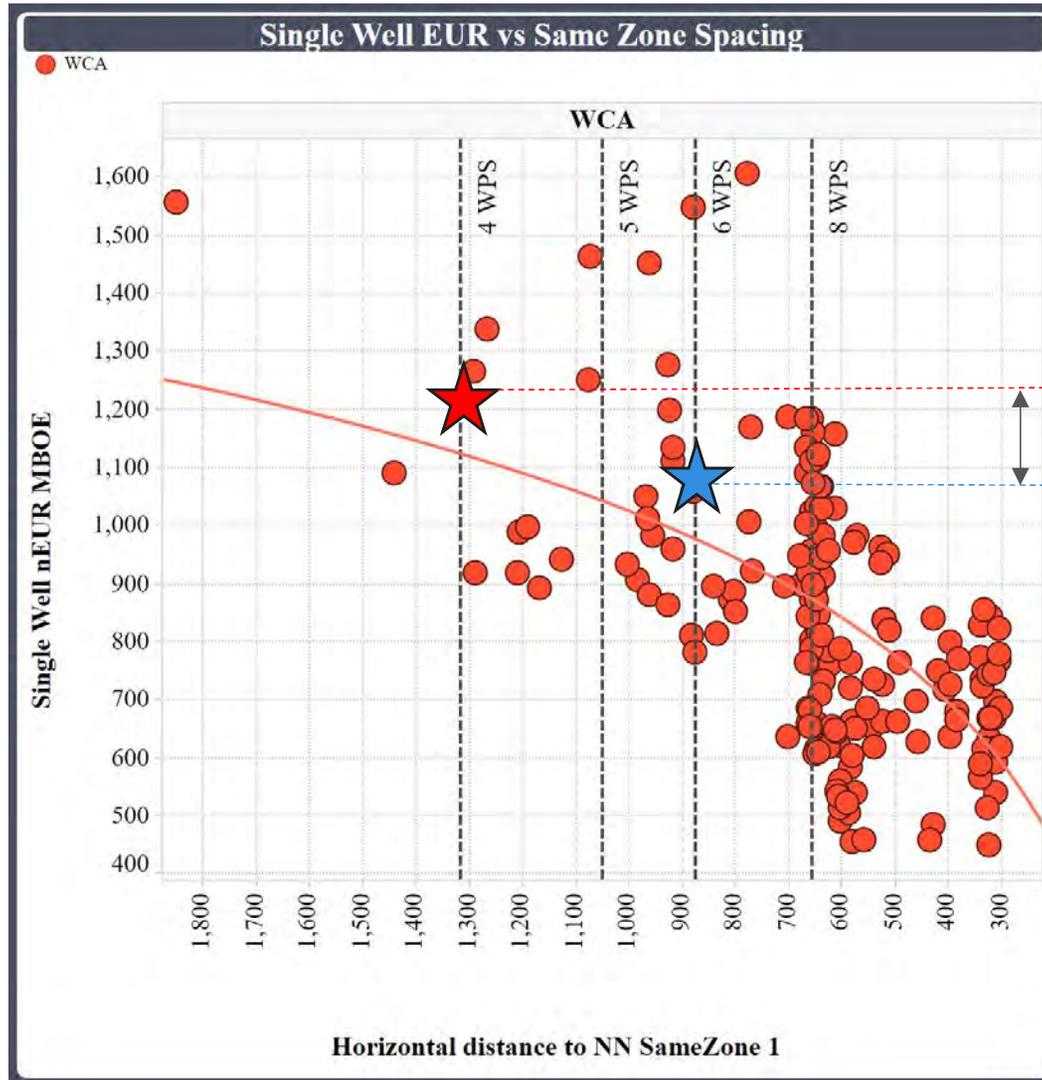

Goliath Unit 2nd Bone Spring Sand TC EUR ~1300 MBOE20

Bone Spring 2nd Sand offset wells within 15 miles radius of David Unit selected to perform above analysis

Wolfcamp A – EUR vs Spacing

Only 10% uplift in single well EURs anticipated by drilling wider than 6 wps; leaving behind ~1700 MBOE20 reserves by out spacing to conservative 4 wps

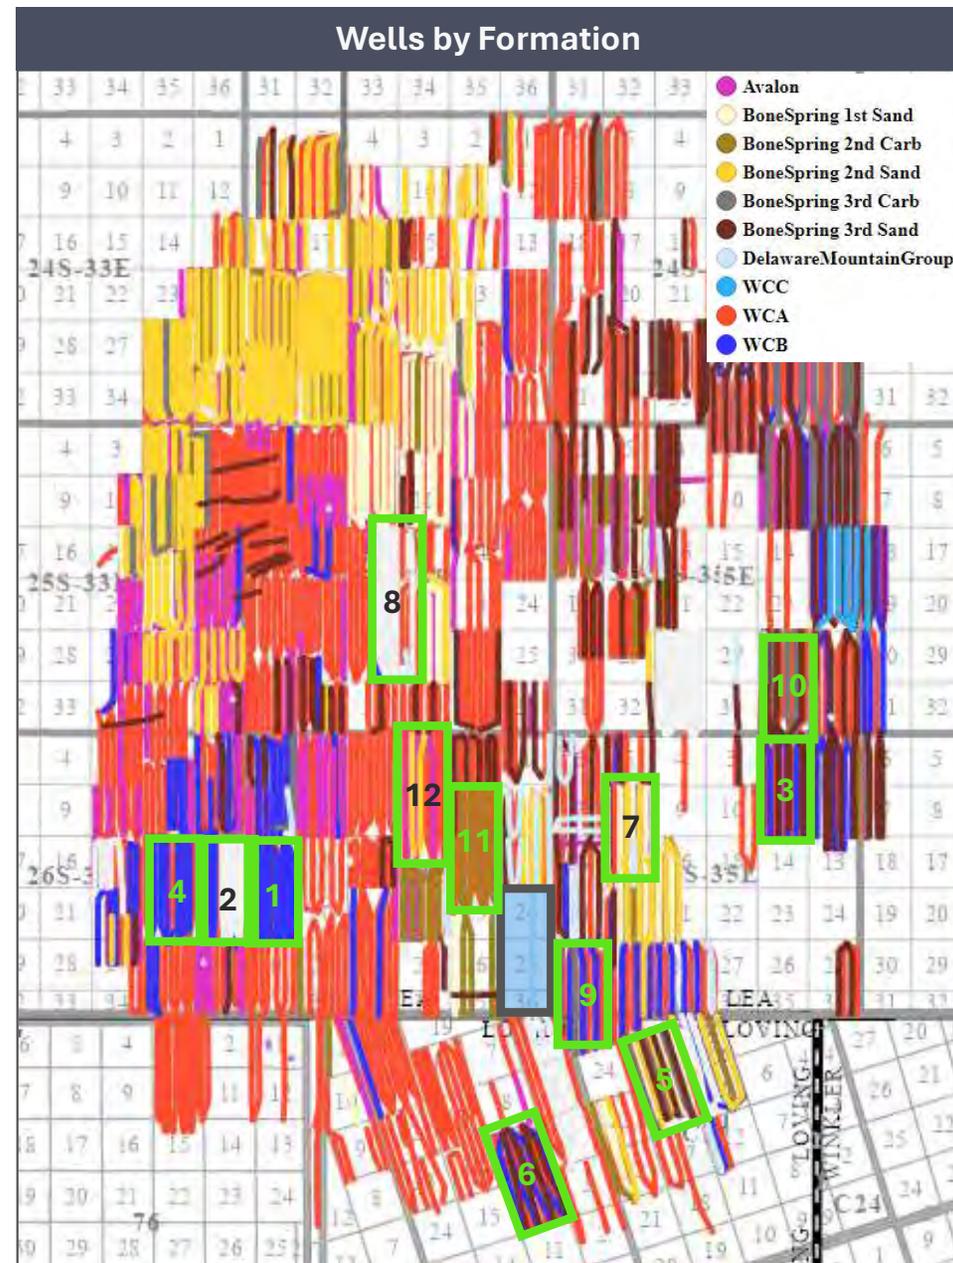

- ★ David Unit WCA TC
EUR ~1,088 MBOE20
(Section EUR ~ 6,528 MBOE20)
- ★ Goliath Unit WCA TC
EUR ~1,211 MBOE20
(Section EUR ~ 4,844 MBOE20)

WCA offset wells within 15 miles radius of David Unit selected to perform above analysis

3BS Sand – WCA – WCB Flow Unit Activity

Example	Operator	Unit	Dev Year	3BS Sand	WCA	WCB	Total
1	Devon	Fighting Okra 18-19	2018/2024	0	10	9	19
2	EOG	Peachtree 24 Fed Com	2019/2021	0	10	7	17
3	Franklin	Tatanka Fed Com	2022	5	5	6	16
4	EOG	Dogwood 23 Fed Com	2018/2020	0	8	7	15
5	Tap	Queen Robyn	2023	3	7	4	14
6	Admiral	Thunderball	2022/2024	3	6	5	14
7	Titus	Lonesome Dove Fed Com	2021	0	8	4	12
8	EOG	Lakewood 28 Fed Com	2020/2022	0	8	4	12
9	Earthstone	Los Vaqueros	2023	0	7	4	11
10	Franklin	Forge Fed Com	2023	3	8	0	11
11	Devon	Muskie 23-11	2022	0	9	0	9
12	Devon	Blondie 15-13 Fec Com	2021	0	9	0	9

- 12x 3BSS – WCA – WCB development examples from established operators in the basin in immediate vicinity of David Unit clearly show:
 - Operators have always targeted the flow unit at a higher well density than COP’s conservative 8 wells (4xWCA + 4xWCB)
 - Operators have developed at least 9 wells across the 3BSS - WCA vs COP’s conservative proposal of 4 wells
 - Operators codevelop the 3BSS and WCA landings; no examples of operators coming back to infill 3BSS after draining the WCA or vice versa – COP’s Goliath development plan creates waste

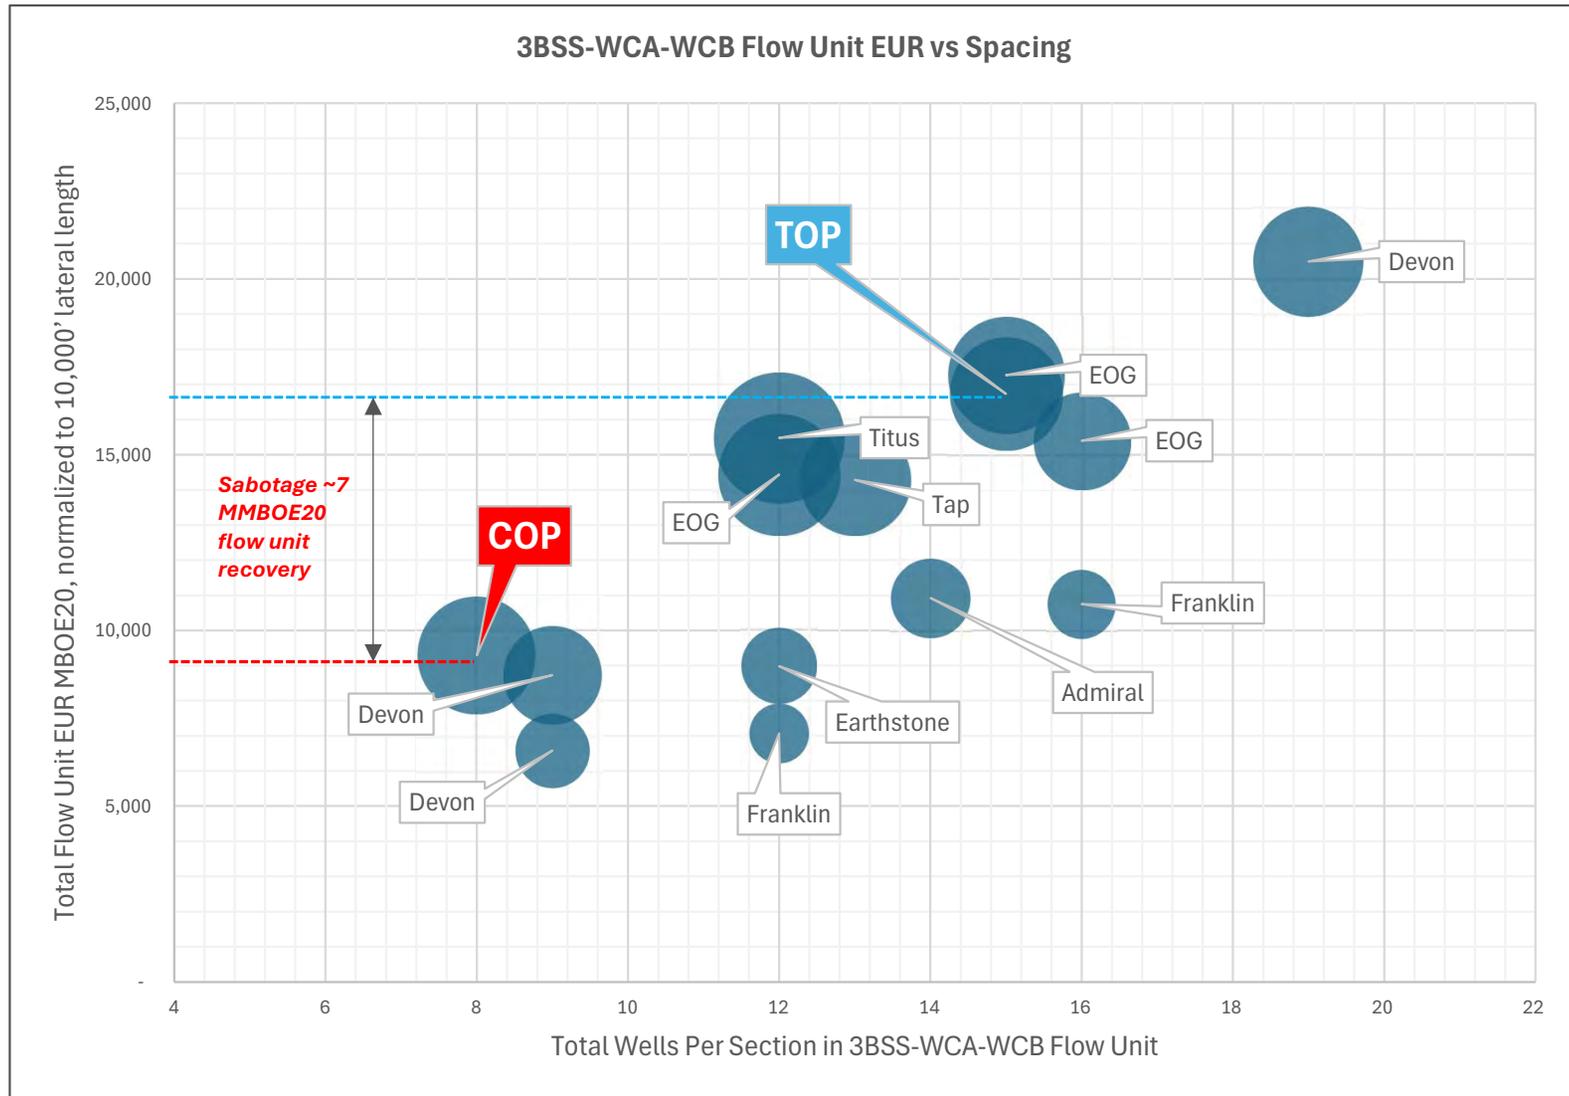

Dev Year = year in which majority of the wells were spud in the unit of interest

Note: ConocoPhillips completed the acquisition of Marathon Oil Corporation in November 2024

3BS Sand – WCA – WCB Flow Unit EUR vs Spacing

COP proposing one of the most conservative flow unit spacing relative to other major operator development around; potentially recovering ~75% less than optimum flow unit EUR

Same example units as D-13 used in this analysis; bubble sizes by average EUR per well in the flow unit

SELF-AFFIRMED STATEMENT OF SHARON T. SHAHEEN

I, Sharon T. Shaheen, attorney for Tumbler Operating Partners, LLC (“Tumbler”), the Applicant in the above-captioned matter, state and affirm the following:

I caused notice of the application to be sent by certified mail through the United States Postal Service on June 20, 2025, to all interest owners sought to be pooled in this proceeding. A sample notice letter to all interested parties is attached hereto as Exhibit E-1. A chart showing the results of certified mailing of the notice letter to all interested parties is attached as Exhibits E-2 and E-3. Notice was also directed to all interested parties by publication in the Hobbs Daily Sun News on June 25, 2025, as shown in the Affidavit of Publication attached hereto as Exhibit E-4. The attached exhibits demonstrate to my satisfaction that all owners sought to be pooled were properly served.

Tumbler has conducted a good faith, diligent effort to find the names and correct addresses for the interest owners entitled to receive notice of the Application filed herein.

I affirm under penalty of perjury under the laws of the State of New Mexico that this statement is true and correct.

TO: ALL INTEREST OWNERS ON ATTACHED LIST

Re: Case Nos. 25462-25465 – Applications of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico (David 36-24 Federal Com Bone Spring wells), Sections 24, 25, & 36, T-26S, R-34E

Re: Case No. 25466 - Application of Tumbler Operating Partners, LLC for Approval of Non-Standard Unit and for Compulsory Pooling, Lea County, New Mexico (David 36-24 Federal Com Wolfcamp Wells), Sections 24, 25, & 36, T-26S, R-34E

Dear Interest Owner:

This will advise that Tumbler Operating Partners, LLC (“Tumbler”) has filed the attached applications with the New Mexico Oil Conservation Division (“Applications”). You are receiving this notice because you may have an interest in one or more of these wells or in a surrounding tract.

Case No. 25462. Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 395.05-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2W/2 of Section 24, W/2W/2 of Section 25, and Lot 4 (SW/4NW/4) and NW/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 101H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 111H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 121H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 440' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 440' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 131H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; and David 36-24 Federal Com 135H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback

All Interest Owners

SpencerFane®

requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

Case No. 25463. *Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico.* Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 394.75-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the W/2E/2 of Section 24, W/2E/2 of Section 25, and Lot 2 (SW/4NE/4) and NW/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 103H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 113H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 123H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 2,200' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 133H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E; and David 36-24 Federal Com 137H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

Case No. 25464. *Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico.* Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 394.59-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the E/2E/2 of Section 24, E/2E/2 of Section 25, and Lot 1 (SE/4NE/4) and NE/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 104H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 114H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 124H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 880' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 880' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 134H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E,

and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E; and David 36-24 Federal Com 138H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

Case No. 25465. *Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico.* Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 394.89-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of the E/2W/2 of Section 24, E/2W/2 of Section 25, and Lot 3 (SE/4NW/4) and NE/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 102H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 112H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 122H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,760' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 132H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; and David 36-24 Federal Com 136H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

Case No. 25466. *Application of Tumbler Operating Partners, LLC for Approval of a Non-Standard Unit and Compulsory Pooling, Lea County, New Mexico.* Applicant in the above-styled cause seeks an order from the Oil Conservation Division approving a non-standard 1,579.28-acre, more or less, horizontal spacing and proration unit (“HSU”) comprised of Sections 24 and 25 and irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico and pooling all uncommitted interests in the Wolfcamp formation (96776 JABALINA; WOLFCAMP, SOUTHWEST) underlying the HSU. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 201H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 440' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 440' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 202H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36,

T26S-R34E, with a FTP 100' FSL & 1,310' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,310' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 203H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,200' FWL of Section 36, T26S-R34E, and a LTP 100' FNL & 2,200' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 204H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 2,200' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 205H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,310' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,310' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 206H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 440' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 440' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 221H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 880' FWL of Section 36, T26S-R34E, and a LTP 100' FNL & 880' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 222H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and a LTP 100' FNL & 1,760' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 223H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,600' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 2,600' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 224H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,760' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,760' FEL of Section 24, T26S-R34E; and David 36-24 Federal Com 225H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 880' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 880' FEL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

The Applications will be set for hearing before a Division Examiner at the New Mexico Oil Conservation Division on July 10, 2025. Hearings are currently conducted in a hybrid fashion, both in-person at the Energy, Minerals, Natural Resources Department, Wendell Chino Building, Pecos Hall, 1220 South St. Francis Drive, 1st Floor, Santa Fe, NM 87505 and via the WebEx virtual meeting platform. To participate in the electronic hearing, see the instructions posted on the docket for the hearing date: <https://www.emnrd.nm.gov/ocd/hearing-info/>. You are not required to attend this hearing, but as an owner of an interest that may be affected, you may appear and present testimony.

Failure to appear at that time and become a party of record will preclude you from challenging these Applications at a later time. If you intend to present testimony or evidence at the hearing, you must enter your appearance **eight days prior to the hearing**, no later than **July 2, 2025**, and serve the Division, counsel for the Applicant, and other parties with a pre-hearing statement **seven days prior to the hearing**, no later than **July 3, 2025**, in accordance with Division Rule 19.15.4.13 NMAC.

Tumbler Operating Partners, LLC has filed applications with the New Mexico Oil Conservation Division as follows:

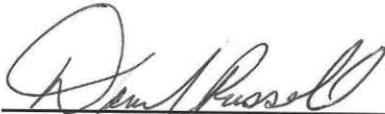

Case No. 25462. Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 395.05-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the W/2W/2 of Section 24, W/2W/2 of Section 25, and Lot 4 (SW/4NW/4) and NW/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following: 2.5-mile wells in the HSU: David 36-24 Federal Com 101H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 111H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 121H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 440' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 440' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 131H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E; and David 36-24 Federal Com 135H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FWL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

Case No. 25463. Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 394.75-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the W/2E/2 of Section 24, W/2E/2 of Section 25, and Lot 2 (SW/4NE/4) and NW/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following: 2.5-mile wells in the HSU: David 36-24 Federal Com 103H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 113H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 123H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 2,200' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 133H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E; and David 36-24 Federal Com 137H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FEL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

This newspaper is duly qualified to publish legal notices or advertisements within the meaning of Section 3, Chapter 167, Laws of 1937 and payment of fees for said publication has been made.

Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 394.59-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the E/2E/2 of Section 24, E/2E/2 of Section 25, and Lot 1 (SE/4NE/4) and NE/4NE/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 104H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 114H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 124H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 880' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 880' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 134H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E; and David 36-24 Federal Com 138H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 660' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 660' FEL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

Case No. 25465. Application of Tumbler Operating Partners, LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division pooling all mineral interests in the Bone Spring formation (WC-025 G-08 S233412K; Bone Spring; 96672) in a standard 394.89-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of the E/2W/2 of Section 24, E/2W/2 of Section 25, and Lot 3 (SE/4NW/4) and NE/4NW/4 of irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 102H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 112H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 122H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,760' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 132H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E; and David 36-24 Federal Com 136H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,980' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,980' FWL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

Case No. 25466. Application of Tumbler Operating Partners, LLC for Approval of a Non-Standard Unit and Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Oil Conservation Division approving a non-standard 1,579.28-acre, more or less, horizontal spacing and proration unit ("HSU") comprised of Sections 24 and 25 and irregular Section 36, Township 26 South, Range 34 East in Lea County, New Mexico and pooling all uncommitted interests in the Wolfcamp formation (96776 JABALINA; WOLFCAMP, SOUTHWEST) underlying the HSU. Applicant proposes to drill the following 2.5-mile wells in the HSU: David 36-24 Federal Com 201H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 440' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 440' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 202H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,310' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 1,310' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 203H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,200' FWL of Section 36, T26S-R34E, and a LTP 100' FNL & 2,200' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 204H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,200' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 2,200' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 205H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,310' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,310' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 206H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 440' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 440' FEL of Section 24, T26S-R34E; David 36-24 Federal Com 221H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 880' FWL of Section 36, T26S-R34E, and a LTP 100' FNL & 880' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 222H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,760' FWL of Section 36, T26S-R34E, and a LTP 100' FNL & 1,760' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 223H well, to be horizontally drilled from a SHL in Lot 3 (SE/4 NW/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 2,600' FWL of Section 36, T26S-R34E, and LTP 100' FNL & 2,600' FWL of Section 24, T26S-R34E; David 36-24 Federal Com 224H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 1,760' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 1,760' FEL of Section 24, T26S-R34E; and David 36-24 Federal Com 225H well, to be horizontally drilled from a SHL in Lot 1 (SE/4 NE/4) of Section 36, T26S-R34E, with a FTP 100' FSL & 880' FEL of Section 36, T26S-R34E, and LTP 100' FNL & 880' FEL of Section 24, T26S-R34E. The completed intervals and first and last take points will meet the setback requirements set forth in the statewide rules for horizontal oil wells. Additional considerations will be the cost of drilling and completing the well and allocation of such costs, the designation of Applicant as operator of the HSU and well to be drilled thereon, and a 200% charge for the risk involved in drilling and completing the well. The well and lands are located approximately 13 miles Southwest of Jal City, New Mexico.

These applications will be set for hearing before a Division Examiner at the New Mexico Oil Conservation Division on **July 10, 2025**, beginning at 9:00 a.m. Hearings are currently conducted in a hybrid fashion, both in-person and at the Energy, Minerals, Natural Resources Department, Wendell Chino Building, Pecos Hall, 1220 South St. Francis Drive, 1st Floor, Santa Fe NM 87505 and via the Web Ex virtual meeting platform. To participate in the electronic hearing, see the instructions posted on the docket for the hearing date: <https://www.emnrd.nm.gov/ocd/hearing-info/>. You are not required to attend this hearing, but as an owner of an interest that may be affected, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging this application at a later time. If you intend to present testimony or evidence at the hearing, you must enter your appearance by **July 2, 2025**, eight (8) days before the hearing, and serve the Division, counsel for the Applicant, and other parties with a pre-hearing statement by **July 3, 2025**, seven days before the hearing in accordance with Division Rule 19.15.4.13 NMAC. For further information, contact the applicant's attorney, Sharon T. Shaheen, Spencer Fane, LLC, 325 Paseo de Peralta, Santa Fe, New Mexico 87501, (505) 986-2678.
