JOE D. RAMEY,
Director

Dockets Nos. 1-33 and 1-33 are tentatively set for January 5 and January 19, 1983. Applications for hearing must be filed at least 10 days in advance of hearing date.

DOCKET: EXAMINER HEARING - THURSDAY - DECEMBER 16, 1982

9 A.M. - MORGAN HALL - STATE LAND OFFICE
BUILDING, SANTA FE, NEW MEXICO

The following cases will be heard before Richard L. Stanets, Examiner, or Michael E. Stogner, Alternate Examiner:

- ALLOWABLE: (1) Consideration of the allowable production of gas for January, 1983, from fifteen prorated pools in Lea, Eddy, and Chaves Counties, New Mexico.
- (2) Consideration of the allowable production of gas for January, 1983, from four prorated pools in San Juan, Rio Arriba, and Sandoval Counties, New Mexico.

CASE 7753: Application of El Paso Natural Gas Company for the reclassification of marginal gas wells in the prorated gas pools of Northwest New Mexico and the suspension of certain proration rules. Applicant, in the above-styled cause, proposes that there not be any marginal wells in the four prorated gas pools in San Juan, Rio Arriba and Sandoval Counties, during January, February, and March 1983, and to accomplish this, seeks the reclassification of all marginal wells in said pools as non-marginal wells effective January 1, 1983, said wells to become non-marginal with a zero net over/under produced status as of January 1, but to be eligible for reclassification to marginal after March 31, if their production-allowable history from January 1 through March 31 so justifies. Applicant also proposes that all non-marginal wells in December, 1982, would continue to be classified as non-marginal at least until March 31, and would continue to accumulate their net over under produced status. Further, applicant proposes that no well would be reclassified as marginal until after the March, 1983, production has been reported, when all provisions of Rule 16-A of the Special Rules for prorated gas pools in Northwest New Mexico as promulgated by Order No. R-1670, as amended, would be again applicable. Applicant further proposes that Rule 15B of the prorated gas pool rules which pertains to the shutting-in of wells which are six times over-produced would be suspended for the period from January through June of 1983 to accommodate those wells which may be subject to shut-in as the result of assignment of lower than normal allowables during the first six months of 1983.

Application of Amoco Production Company for a unit agreement, Eddy County, New Mexico. Applicant, in the above-styled cause, seeks approval for the Slaughter Canyon Unit Area, comprising 3,840 acres, more or less, of Federal lands in Township 26 South, Range 26 East.

OF A COMPULSORY POOLING, TOWNSHIP 5 *

Case No. 7529

A P P L I C A T I O N

The applicant, JACK J. GRYNBERG, d/b/a JACK GRYNBERG AND ASSOCIATES, by its attorneys Jones, Gallegos, Snead, & Wertheim, P.A., hereby requests an order forming a drilling unit covering 160 acres of land in Chaves County, New Mexico, and in support of its application states:

1. Pursuant to the Oil and Gas Act (Sec. 70-2-17, et seq., N.M.S.A. 1978) the applicant desires to obtain an order of the Division declaring a drilling unit covering those certain lands upon which the specified mineral ownership is held, described as follows:

TOWNSHIP 5 SOUTH, RANGE 24 EAST, N.M.P.M.

Section 4: NE/4 160 Acres

(see Exhibit "A")

2. There presently exists a producing gas well in Township 5 South - Range 24 East, Section 9: SE/4 (Mesa); the potentially producing reservoirs have been reasonably defined by that development and development on surrounding acreage.

3. This application seeks pooling of all the subject acreage from the surface down through and including the Abo formation.

4. The applicant is the holder of State of New Mexico lease LG-564 covering 120 acres of the proposed unit and being within said Section 4 as follows: W/2NE/4, SE/4NE/4. Applicant asks designation as operator of the unit and if he is designated as operator of the unit, he will operate under a unit agreement

1 and plan of operation customary and usual in the Permian Basin of
2 New Mexico, or as otherwise ordered by the Division.

3 5. A map of the proposed drilling unit is attached
4 hereto and marked Exhibit "A" and also illustrates those portions
5 of the unit under lease to the applicant. Additionally, a schedule,
6 Exhibit "B", is attached and sets out the various working interest
7 owners in the unit and their proportionate shares therein.

8 6. The applicant believes that his method of operating,
9 especially with respect to completion of the well sought to be
10 drilled, is superior to that employed by Yates Petroleum Corporation
11 and, accordingly, believes that he would be the more prudent
12 operator of this unit. The applicant also alleges that he is in
13 a position to drill and complete the proposed well for a
14 substantially lower cost than Yates Petroleum Corporation. These
15 factors will lead to greater ultimate recovery, the prevention of
16 waste and the protection of correlative rights.

17 7. If the unit is declared as sought by this application,
18 the applicant will locate the well in a standard location in the
19 NE/4 of Section 4 and will pool formations through and including
20 the Abo, with the probable producing horizon being the Abo.

21 WHEREFORE the applicant requests the Division set this
22 matter down for a hearing before an examiner at the earliest
23 possible date, give notice as required by law and after hearing
24 enter its Order a) compulsory pooling the unit, as described, b)
25 assigning a risk factor for the proposed well, c) providing
26 for overhead to be charged during drilling and producing operations,
27 d) declaring the applicant to be the Operator of said unit, and,
28 e) granting such further relief as is deemed proper.
