Case 6471

APPLICATION

1. Applicant has commenced the drilling of the following
Basin Dakota wells.

2. Applicant seeks a determination pursuant to the F.E.R.C. rules, Part 271.305 (c) that the Division, based upon

a review of its records, implicitly made a finding, and the record developed by the Division prior to commencement of drilling supports an explicit finding that the drilling of each of the new wells was necessary to effectively and efficiently drain that portion of the reservoir covered by the respective proration unit which could not be effectively and efficiently drained by any existing well within each of the units.

Applicant further requests permission to present evidence as to the necessity for the drilling of each of the subject wells to effectively and efficiently drain that portion of the reservoir covered by each respective proration unit which cannot be effectively and efficiently drained by any existing well within each of the units.

WHEREFORE Applicant respectfully requests that this matter be set for hearing before the Oil Conservation Division or its duly appointed Examiner, and that after notice and hearing as required by law the Division enter its order making the well-head price ceiling category determination as requested.

Respectfully submitted,
CONSOLIDATED OIL & GAS, INC.
