Western Refining Southwest, Inc. – Bloomfield Terminal  
Class I (Non-Hazardous) Disposal Well UICI-011 (WDW #2)  
API#: 30-045-35747**

Dear Mr. Chavez;

Western Refining Southwest, Inc. (“Western”) is providing a summary of the operational data pertaining to the operations of the Class I injection well located at the Bloomfield Terminal facility in Bloomfield, NM. The enclosed data are for operations and activities conducted between October 1<sup>st</sup>, 2020 and December 31<sup>st</sup>, 2020, which includes the following:

- Attachment A: 2020 Quarterly Injection Well Summary Table
- Attachment B: Analytical summary of quarterly samples collected in December 2020
- Attachment C: Copy of quarterly analytical report
- Attachment D: Summary of Well Operational Logs
- Attachment E: Groundwater Monitoring Well Data

If you should have any questions or require additional information, please do not hesitate to contact me at 505-632-4166 or krobinson3@marathonpetroleum.com

Sincerely,

Kelly Robinson

RE: Injection Well 2 4Q2020

OrderNo.: 2012A28

Dear Kelly Robinson:

Hall Environmental Analysis Laboratory received 1 sample(s) on 12/19/2020 for the analyses presented in the following report.

These were analyzed according to EPA procedures or equivalent. To access our accredited tests please go to [www.hallenvironmental.com](http://www.hallenvironmental.com) or the state specific web sites. In order to properly interpret your results, it is imperative that you review this report in its entirety. See the sample checklist and/or the Chain of Custody for information regarding the sample receipt temperature and preservation. Data qualifiers or a narrative will be provided if the sample analysis or analytical quality control parameters require a flag. When necessary, data qualifiers are provided on both the sample analysis report and the QC summary report, both sections should be reviewed. All samples are reported, as received, unless otherwise indicated. Lab measurement of analytes considered field parameters that require analysis within 15 minutes of sampling such as pH and residual chlorine are qualified as being analyzed outside of the recommended holding time.

Please don't hesitate to contact HEAL for any additional information or clarifications.

ADHS Cert #AZ0682 -- NMED-DWB Cert #NM9425 -- NMED-Micro Cert #NM0901

Sincerely,

A handwritten signature in black ink, appearing to read "Andy Freeman".

## Analytical Report

Lab Order 2012A28

Date Reported: 1/7/2021

## Hall Environmental Analysis Laboratory, Inc.

CLIENT: Western Refining Southwest, Inc.

Client Sample ID: Injection Well #2

Project: Injection Well 2 4Q2020

Collection Date: 12/18/2020 8:00:00 AM

Lab ID: 2012A28-001

Matrix: AQUEOUS

Received Date: 12/19/2020 7:30:00 AM

## ANALYTICAL REPORT

January 05, 2021

**Hall Environmental Analysis Laboratory**

Sample Delivery Group: L1299519

Samples Received: 12/22/2020

Project Number:

Description:

Report To: Jackie Bolte  
4901 Hawkins NE  
Albuquerque, NM 87109

Entire Report Reviewed By:

John Hawkins  
Project Manager

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by Pace Analytical National is performed per guidance provided in laboratory standard operating procedures ENV-SOP-MTJL-0067 and ENV-SOP-MTJL-0068. Where sampling conducted by the customer, results relate to the accuracy of the information provided, and as the samples are received.

| Wet Chemistry by Method 4500 CN E-2011 | WG1598368 | 1        | 12/29/20 09:07        | 12/29/20 19:20     | JER                 | Mt. Juliet, TN     |

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

John Hawkins  
Project Manager

### Project Narrative

---

All Reactive Cyanide results reported in the attached report were determined as totals using method 9012B.

All Reactive Sulfide results reported in the attached report were determined as totals using method 9034/9030B.

Collected date/time: 12/18/20 08:00

## Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Results Disclaimer - Information that may be provided by the customer, and contained within this report, include Permit Limits, Project Name, Sample ID, Sample Matrix, Sample Preservation, Field Blanks, Field Spikes, Field Duplicates, On-Site Data, Sampling Collection Dates/Times, and Sampling Location. Results relate to the accuracy of this information provided, and as the samples are received.

### Abbreviations and Definitions

|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MDL                          | Method Detection Limit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| ND                           | Not detected at the Reporting Limit (or MDL where applicable).                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| RDL                          | Reported Detection Limit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Rec.                         | Recovery.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| RPD                          | Relative Percent Difference.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| SDG                          | Sample Delivery Group.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| U                            | Not detected at the Reporting Limit (or MDL where applicable).                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Analyte                      | The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.                                                                                                                                                                                                                                                                                                                                                                                                 |
| Dilution                     | If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.                                                                                    |
| Limits                       | These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.                                                                                                                                                                                                                                                      |
| Original Sample              | The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.                                                                                                                                                                                                                                                                                                                            |
| Qualifier                    | This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.                                                                                                                                                                  |
| Result                       | The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state "ND" (Not Detected) or "BDL" (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte. |
| Uncertainty (Radiochemistry) | Confidence level of 2 sigma.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Case Narrative (Cn)          | A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.                                                                                                                                                                          |
| Quality Control Summary (Qc) | This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.                                                                                                                                                                                              |
| Sample Chain of Custody (Sc) | This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.                                                              |
| Sample Results (Sr)          | This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.                                                                                                                                                                                             |
| Sample Summary (Ss)          | This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.                                                                                                                                                                                                                                                                                                                                                            |

### Qualifier Description

|    |                                                                                           |
|----|-------------------------------------------------------------------------------------------|
| P1 | RPD value not applicable for sample concentrations less than 5 times the reporting limit. |
| T8 | Sample(s) received past/too close to holding time expiration.                             |

Pace National is the only environmental laboratory accredited/certified to support your work nationwide from one location. One phone call, one point of contact, one laboratory. No other lab is as accessible or prepared to handle your needs throughout the country. Our capacity and capability from our single location laboratory is comparable to the collective totals of the network laboratories in our industry. The most significant benefit to our one location design is the design of our laboratory campus. The model is conducive to accelerated productivity, decreasing turn-around time, and preventing cross contamination, thus protecting sample integrity. Our focus on premium quality and prompt service allows us to be YOUR LAB OF CHOICE.

\* Not all certifications held by the laboratory are applicable to the results reported in the attached report.

\* Accreditation is only applicable to the test methods specified on each scope of accreditation held by Pace National.

## State Accreditations

### Chain of Custody

1. Is Chain of Custody complete? Yes ☒ No ☐ Not Present ☐
2. How was the sample delivered? Courier

### Log In

3. Was an attempt made to cool the samples? Yes ☒ No ☐ NA ☐
4. Were all samples received at a temperature of  $>0^{\circ}\text{C}$  to  $6.0^{\circ}\text{C}$ ? Yes ☒ No ☐ NA ☐
5. Sample(s) in proper container(s)? Yes ☒ No ☐
6. Sufficient sample volume for indicated test(s)? Yes ☒ No ☐
7. Are samples (except VOA and ONG) properly preserved? Yes ☒ No ☐
8. Was preservative added to bottles? Yes ☐ No ☒ NA ☐
9. Received at least 1 vial with headspace  $<1/4"$  for AQ VOA? Yes ☒ No ☐ NA ☐
10. Were any sample containers received broken? Yes ☐ No ☒
11. Does paperwork match bottle labels?  
(Note discrepancies on chain of custody) Yes ☒ No ☐
12. Are matrices correctly identified on Chain of Custody? Yes ☒ No ☐
13. Is it clear what analyses were requested? Yes ☒ No ☐
14. Were all holding times able to be met?  
(If no, notify customer for authorization.) Yes ☒ No ☐

# of preserved  
bottles checked  
for pH: 26  
( $<2$  or  $>12$  unless noted)

Adjusted? NO

Checked by: JR 12/21/20

### Special Handling (if applicable)

15. Was client notified of all discrepancies with this order? Yes ☐ No ☐ NA ☒

July 20, 2016

immediately or within a specified time period, or assess a civil penalty, or both (see Section 74-6-10 NMSA 1978). The compliance order may also include a suspension or termination of this Discharge Permit. OCD may also commence a civil action in district court for appropriate relief, including injunctive relief (see Section 74-6-10(A)(2) NMSA 1978). The Permittee may be subject to criminal penalties for discharging a water contaminant without a discharge permit or in violation of a condition of a discharge permit; making any false material statement, representation, certification or omission of material fact in a renewal application, record, report, plan or other document filed, submitted or required to be maintained under the Water Quality Act; falsifying, tampering with or rendering inaccurate any monitoring device, method or record required to be maintained under the Water Quality Act; or failing to monitor, sample or report as required by a Discharge Permit issued pursuant to a state or federal law or regulation (see Section 74-6-10.2 NMSA 1978).

## 2. GENERAL FACILITY OPERATIONS:

**2.A. QUARTERLY MONITORING REQUIREMENTS FOR CLASS I NON-HAZARDOUS WASTE INJECTION WELL:** The Permittee shall properly conduct waste management injection operations at its facility by injecting only non-hazardous (RCRA exempt and RCRA non-hazardous, non-exempt) oil field waste fluids. Injected waste fluids shall not exhibit the RCRA characteristics, i.e., ignitability, reactivity, corrosivity, or toxicity under 40 CFR 261 Subpart "C" 261.21 – 261.24 (July 1, 1992), at the point of injection into WDW-2, based upon environmental analytical laboratory testing. Pursuant to 20.6.2.5207B, the Permittee shall provide analyses of the injected fluids at least quarterly to yield data representative of their toxicity characteristic.

The Permittee shall also analyze the injected fluids quarterly for the following characteristics:

- ○ pH (Method 9040);
- ○ Eh;
- ○ Specific conductance;
- ○ Specific gravity;
- ○ Temperature;
- ○ Major dissolved cations and anions, including: fluoride, calcium, potassium, magnesium, sodium bicarbonate, carbonate, chloride, sulfate, bromide, total dissolved solids, and cation/anion balance using the methods specified in 40 CFR 136.3; and,
- ○ EPA RCRA Characteristics for Ignitability (ASTM Methods); Corrosivity (SW-846) and Reactivity (determined through Permittee's application of knowledge or generating process).

The Permittee shall analyze the injected fluids quarterly for the constituents identified in the Quarterly Monitoring List (below) to demonstrate that the injected fluids do not exhibit the characteristic of toxicity using the Toxicity Characteristic Leaching Procedure, EPA SW-846 Test Method 1311 (see Table 1, 40 CFR 261.24(b)).

**WESTERN REFINING SOUTHWEST, INC.**  
**WASTE DISPOSAL WELL NO. 2**

UICI-011 (WDW-2)  
 July 20, 2016

|      |                       |                |       |
|------|-----------------------|----------------|-------|
| D010 | Selenium              | 1311           | 1.0   |
| D011 | Silver                | 1311           | 5.0   |
| D039 | Tetrachloroethylene   | 8260B          | 0.7   |
| D040 | Trichloroethylene     | 8021B<br>8260B | 0.5   |
| D041 | 2,4,5-Trichlorophenol | 8270D          | 400.0 |
| D042 | 2,4,6-Trichlorophenol | 8041A<br>8270D | 2.0   |
| D043 | Vinyl chloride        | 8021B<br>8260B | 0.2   |

*If o-, m-, and p-cresol concentrations cannot be differentiated, then the total cresol (D026) concentration is used. The regulatory level of total cresol is 200 mg/L.*

*If the quantitation limit is greater than the regulatory level, then the quantitation limit becomes the regulatory level. If metals (dissolved), the EPA 1311 TCLP Laboratory Method is required with the exception of Mercury (total).*

1. **Monitor and Piezometer Wells:** Groundwater with a total dissolved solids concentration of less than 10,000 mg/L occurs at an estimated depth of approximately 10 - 30 ft. below ground surface at the WDW-2 well (hereafter, "uppermost water-bearing unit"). Groundwater monitoring well (MW) with GW sampling capability shall be installed proximal to and hydrogeologically downgradient from WDW-2 in order to monitor the uppermost water-bearing unit. The MW shall be screened (15 ft. screen with top of screen positioned 5 ft. above water table) into the uppermost water-bearing unit. The Permittee shall propose a monitoring frequency with chemical monitoring parameters in order to detect potential groundwater contamination either associated with or not associated with WDW-2.

2.B. **CONTINGENCY PLANS:** The Permittee shall implement its proposed contingency plan(s) included in its application to cope with failure of a system(s) in the Discharge Permit.

2.C. **CLOSURE:** Prior to closure of the facility, the Permittee shall submit for OCD's approval, a closure plan including a completed form C-103 for plugging and abandonment of the waste injection well. The Permittee shall plug and abandon its well pursuant to 20.6.2.5209 NMAC and as specified in Permit Condition 2.D.

1. **Pre-Closure Notification:** Pursuant to 20.6.2.5005A NMAC, the Permittee shall submit a pre-closure notification to OCD's Environmental Bureau at least 30 days prior to the date that it proposes to close or to discontinue operation of WDW-2. Pursuant to 20.6.2.5005B NMAC, OCD's Environmental Bureau must approve all proposed well closure activities before the Permittee may implement its proposed closure plan.
2. **Required Information:** The Permittee shall provide OCD's Environmental Bureau with the following information in the pre-closure notification specified in Permit Condition 2.C.1:
  - o Name of facility;
  - o Address of facility;
  - o Name of Permittee (and owner or operator, if appropriate);

**ATTACHMENT E**

**Groundwater Monitoring Well Data Summary**

## **Attachment E Monitoring Well Information**

Western Refining Southwest, Inc. – Bloomfield Terminal (“Western”) has contracted with a third-party consultant to install an additional monitoring well downstream and within proximity to WDW #2 pursuant to Injection Well Permit UICI-01 1 Condition 2.A.1. The field activities were initially scheduled to occur in April 2020, coinciding with the scheduled facility groundwater sampling activities. Pursuant to Governor Michelle Lujan Grisham’s March 11, 2020 Executive Order 2020-004 declaring a State of Public Health Emergency as part of the State’s efforts to respond to the novel coronavirus (COVID-19), Marathon Petroleum Company, the parent company to Western Refining Southwest, Inc., submitted a letter to the New Mexico agencies requesting temporary relief from conducted the drilling activities in an effort to minimize risk of exposure to COVID-19 to field personnel. Therefore, field activities have been delayed until such time that the non-essential work practices can be performed with protective measures in-place for personnel involved. As of December 1, 2020, the State’s Executive Order for non-essential work restrictions has remained in-place for San Juan County. Therefore, the following groundwater evaluation is based on the information gathered from the existing network of monitoring wells within the vicinity of WDW #2.

### **Groundwater Monitoring Activities**

WDW #2 is a positive pressure injection well located within the eastern portion of the Terminal, north of County Road 4990. Groundwater sampling and field monitoring activities are conducted semi-annually at the Bloomfield Terminal pursuant to the requirements outlined in Section 2.F. of the Discharge Permit GW-001. Based on the groundwater contours in this area, groundwater flow within the uppermost water-bearing unit (i.e. Jackson Lake Terrace Formation) flows primarily in the northwest direction. Using the existing groundwater monitoring network of wells at the Terminal, Monitoring Well (MW)-52 and MW-68 represent the closes monitoring location upstream and downstream of WDW #2, respectively. The following is a summary of the sampling activities conducted in 2020 pertaining to the water quality within the vicinity of WDW #2.

- Groundwater Elevation: Depth-to-groundwater measurements were collected in May 2020 and August 2020. The field information was used to calculate the groundwater elevation across the facility. The data collected from the monitoring wells within the vicinity of WDW #2 are as follows:

| Well ID                   | Date     | Corrected Groundwater Elevation<br>(ft amsl) |
|---------------------------|----------|----------------------------------------------|
| <b>Upstream of WDW #2</b> |          |                                              |
| MW-52                     | 08/04/20 | 5503.78                                      |
|                           | 05/28/20 | 5503.20                                      |

|                             |          |         |
|-----------------------------|----------|---------|
| <b>Downstream of WDW #2</b> |          |         |
| MW-29                       | 08/04/20 | 5503.31 |
|                             | 05/27/20 | 5502.85 |
| MW-68                       | 08/04/20 | 5501.99 |
|                             | 05/26/20 | 5502.58 |

- Chlorides concentrations detected in waters injected into WDW #2 were above the New Mexico WQCC standard of 250 mg/L. The December 2020 analytical results for samples collected at WDW #2 indicated a chloride concentration of approximately 890 mg/L (Refer to Attachment B for the Analytical Summary). Below is a summary of the detected chloride concentration for samples collected in August 2020 at monitoring wells within the upstream and downstream vicinity of WDW #2. Sulfates were detected in concentrations above the WQCC standard of 600 mg/L at monitoring wells upstream of WDW #2. Concentrations detected at samples collected from WDW #2 are consistently below the WQCC standard.

|          | WQCC Standards | WDW #2    |           |           |            | MW-53    | MW-52    | MW-68      | MW-29      |
|----------|----------------|-----------|-----------|-----------|------------|----------|----------|------------|------------|
|          |                | 3/25/2020 | 6/30/2020 | 9/18/2020 | 12/18/2020 | Upstream | Upstream | Downstream | Downstream |
| Chloride | 250 *          | 1200      | 1200      | 830       | 890        | 940      | 560      | 20         | 65         |
| Sulfate  | 600 *          | 87        | 78        | 86        | 72         | 930      | 980      | 230        | 340        |

### **Results Summary**

The consistent groundwater elevation gradient across the facility indicates that WDW #2 operations has not impacted a change in the groundwater gradient, which has consistently been in the northwest direction. In addition, based on comparison of the general chemistry concentrations up-stream and downstream of WDW #2 to the sample results collected at the injection well, there is no indication that the waters from the injection wells have impacted the shallow water-bearing aquifer.
