ORDER NO. AG-N-45-9

SUPPLEMENTAL GAS PRORATION ORDER FOR THE MONTH  
OF DECEMBER, 1983

This cause came on for public hearing before the Oil Conservation Commission of New Mexico, hereinafter referred to as the "Commission" at Santa Fe, New Mexico, at 9 a.m. on November 16, 1983, pursuant to legal notice for the purpose of setting the allowable production of gas from the following four gas pools in San Juan, Rio Arriba, and Sandoval Counties, New Mexico, for the month of December, 1983:

Basin-Dakota, Blanco-Mesaverde, Blanco-Pictured Cliffs, South, and Tapacito-Pictured Cliffs.

NOW, on this 18th day of November, 1983, the Commission, a quorum being present, having considered the testimony presented and the exhibits received at said hearing, and being fully advised in the premises,

FINDS:

(1) That the total nomination of purchasers of gas produced from the above-listed four gas pools for the month of December, 1983, is 35,572,300 Mcf. The individual pool nominations are as follows:

Basin-Dakota	17,236,100 Mcf
Blanco-Mesaverde	16,082,600 Mcf
Blanco-Pictured Cliffs, South	1,905,700 Mcf
Tapacito-Pictured Cliffs	347,900 Mcf

(2) That the potential producing capacity of all gas wells in the four gas pools listed above is in excess of the nominations of purchasers of gas, and in order to prevent waste and protect correlative rights, the production of gas from the above-listed four gas pools should be limited, allocated, and distributed during the month of December, 1983.

(3) That all the producing gas wells, together with the expected completed or recompleted wells in the four gas pools listed above, can produce a total of 35,572,300 Mcf without causing waste during the month of December, 1983, and an allocation based upon such production would be reasonable and would protect correlative rights.
