Steps and Actions to Prevent Waste

For this event, the operator could not have reasonably anticipated the current event and it was beyond the operator's control.	True
Please explain reason for why this event was beyond your operator's control	Pipeline pressure exceeded flare valve set point and routed gas to flare. We had set the flare point at a level where this was unanticipated, so unclear why this happened.
Steps taken to limit the duration and magnitude of venting and/or flaring	Made adjustments to flare set point and controller.
Corrective actions taken to eliminate the cause and reoccurrence of venting and/or flaring	Made adjustments to flare set point and controller. Continue routine inspections and maintenance of facilities.
