Violations:**Known or anticipated acute or chronic health risks associated with the emergency:****Medical attention advised for exposed individuals:****Cause of the upset:**

we lost one unit on high engine rpm which caused the unit beside it to go down on high suction pressure. coupled with wtt booster going down the site pressured up faster than anyone was able to arrive on site.

Actions taken to correct the upset and minimize emissions:

the units were put BOL and the speed controls adjusted to prevent a reoccurrence.

Precautions taken as a result of the release:

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	we lost one unit on high engine rpm which caused the unit beside it to go down on high suction pressure. coupled with wtt booster going down (fuel freeze) the site pressured up faster than anyone was able to arrive on site. (the sites share a common gathering)
Steps taken to limit the duration and magnitude of vent or flare	the units were put BOL and the speed controls adjusted to prevent a reoccurrence.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	the units were put BOL and the speed controls adjusted to prevent a reoccurrence.
