Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	MR MN had this well shut in for maintenance the gatherer had scheduled. Our field ops was informed the maintenance was completed and this well was turned back to production. Because the well had already been shut in for multiple days and it was thought the gatherer's line pressure would go down at any moment, the well flared for this duration.
Steps taken to limit the duration and magnitude of vent or flare	Keep working on improving communication between the gatherer and our operations team.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Improve communications with the gatherer.
