Please explain reason for why this event was beyond this operator's control	Unexpected and unavoidable gas lift pipe rupture resulted in the venting event.
Steps taken to limit the duration and magnitude of vent or flare	Chevron field personnel executed practicable measures to minimize emissions. Once the line rupture was discovered, the line was isolated in order to prevent further venting.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Corrective measures focused on reducing gas flow through the line as quickly and safely as possible to minimize the duration and volume of gas vented. The gas lift line will be repaired as soon as possible to prevent further venting.
