Other Released Details	Not answered.
Additional details for Measured or Estimated Volume(s). Please specify	Not answered.
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	No
Was notification of downstream activity received by this operator	Not answered.
Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Our newest well has been intermittently flowing gas at rates that shut our compressor down. These sporadic surges are unpredictable.
Steps taken to limit the duration and magnitude of vent or flare	Restarted compressor and shut in all wells with the exception of the newest two wells to limit the magnitude of the flaring event.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	We are waiting on Enterprise Products to build a new pipeline that will enable us to inject gas into the gathering system regardless of our compressor's limitations.
