If a Watercourse was Impacted, Describe Fully.\*

N/A

Describe Cause of Problem and Remedial Action Taken.\*

Transfer pump shaft separated at this site and the high level alarms failed to reach call out. Pump was repaired and alarms reset. This action caused the tanks to run over and 400 bbls of produced water to spill onto the ground. The fluids did stay within the fire walls of the battery and all free standing fluids were recovered via Vac Truck that was in the area at the time of the spill. Remediation efforts continue at this site and will be to NMOCD guidelines.

Describe Area Affected and Cleanup Action Taken.\*

Will Remediate to NMOCD Requirements.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
